Course Description:
This course examines the relationship between technology and society throughout the history of the United States. We will analyze the roles and impacts of major technological innovations within their cultural and historical contexts seeking to understand how these contexts shaped and were shaped by these technologies including electricity, railroads, computers, the internet, among others. In doing so, we will highlight the ways in which technologies articulated, exacerbated, and undermined social identities and relationships of power.

Learning Objectives:
By the end of this course students will be able to:
- Identify, analyze, and deploy secondary sources to make historical arguments
- Practice the skills necessary to analyze, discuss, and write about primary and secondary sources related to the study of American culture and technology
- Identify, analyze, and differentiate key terms and ideas in the history of technology
- Demonstrate understanding of the relationship between technology and American society at various points in US history

Course Materials:
- All course materials are available on Canvas

Grading:
You must complete all assignments to pass the course. Failure to do so will result in an automatic F.

1. Assignments: 10%
   There will be a total of 4 short writing assignments due over the first half of the course. See the course schedule for due dates, and Canvas for detailed prompts.
2. Paper 1: 20%
   Due in class on Oct 29
3. Paper 2: 20%
   Due in class on Dec 3
4. Final Exam: 35%
On scheduled exam day. Will consist of one long essay (for which you’ll get the question beforehand), and several shorter essays and identifications.

5. **Participation + quizzes: 15%**

Students are expected to have completed all readings before class, participate actively in all class discussions and activities, to be respectful to the instructor and their fellow classmates, to arrive to class on time, and to stay focused on what is happening in our classroom not on chatting or using digital devices. Participation will be assessed on the quality of contributions to class discussions. Quality participation demonstrates the following:

- Understanding of the historical context as gleaned from lectures and readings
- Completion of that week’s assignments such as readings and reading responses
- A willingness to engage in critical assessment of course texts and lectures

Since we only meet once a week, students are expected to attend all classes and to be punctual both to the start of class, and after our mid-class 10-minute break. Students are allowed no more than 3 unexcused absences. Chronic lateness will count toward absences. Excused absences must be either arranged in advance or have a doctor’s note submitted.

**Assignment Submission Guidelines:**

**Late Assignments:** Papers will lose 1/3 of a grade for every day late (A to A--; A- to B+; etc.). Papers will not be accepted more than 1 week late.

**Paper Formatting:** All papers must be typed, double-spaced, 12 pt Times New Roman, 1” margins, and be submitted as in a hard copy in class, as well as a digital copy on Canvas.

**Grading Scale** (for assignments only, course grades will not include: A+, A-, B-, C-, D+):

**Academic Integrity:** An essential part of NJIT’s policy of academic integrity is that students demonstrate honesty and integrity in their courses. It is also a policy that
will serve you in good stead in the rest of your personal and professional life. Turning in a paper that includes plagiarism, was written by someone else and passed off as your own work, or cheating on an examination will result in a 0 for that assignment. All cases of suspected plagiarism/cheating will be reported to the office of the Dean of Students for investigation. If you’re unclear on what constitutes an honor code violation, please see the university policy on academic integrity at: 
https://www.njit.edu/policies/sites/policies/files/academic-integrity-code.pdf

**Technology Policy:** I fully understand the irony inherent in banning laptops from a course that deals with the history of technology. That being said, I ask that you take notes on paper and leave your laptops and cell phones in your bags during class. Texting, using Twitter, playing games, etc. interrupts the flow of discussion, distracts other students, and will inevitably embarrass you when I have to call you out and confiscate your device for the remainder of the lecture. If you need to send an important text or take an important call, please excuse yourself from the room and reenter when you can return your attention to the course. Students are also prohibited from using headphones or keeping headphones in their ears during class. Essentially, you are in class once a week for approximately 3 hours. Please be present and prepared while you are here.

**Cell phones:** Use of a cell phone in class for unauthorized activity will result in student’s choosing either:
1. Immediate expulsion from class
2. Placement of the student’s cell phone at the front of class with the instructor for the remainder of that class and each class for the remainder of the semester.

**Students with Disabilities or Special Needs:**
Students who have disabilities or special needs should contact NJIT’s Student Disability Services to help procure accommodations in completing coursework. The center can be found at http://www.njit.edu/counseling/services/disabilities.php.

**Other Resources:**
There are several writing assignments both big and small for this course, and if you need them, the Writing Center can provide you with help on every part of the writing process. Also, please don’t hesitate to drop by my office hours or send me an email if you’re having difficulties.

We all need a support network. If you need them, the Center for Counseling and Psychological Services (C-CAPS) in Campbell Hall, Room 205, is available to listen and to help.
