

Siri Ojamaa

Steam report

My name is Siri Ojamaa I am in 5th grade at Theodore Roosevelt school. I live in Weehawken, NJ. I really love Steam and I wanted to tell you about my experience with Steam.

. I have been in two science fairs that were really amazing. In one of them I created the brealla bag which was a backpack that can hold your umbrella for you from a little latch on the strap. I also created the do it all binder which was a solution to having so much unorganized stuff.. I have done multiple projects for steam. Like I made a constellation box you move the arrow to the month and it will tell you what constellations you will see that month. I have done multiple projects that were really amazing. I love to create new things. Another one of my favorite projects that I have made was a marble track where I used toilet paper rolls and paper rolls to make it and I had to find ways to make the marble get to the bottom of the course. I have done many Steam projects and really enjoyed doing all of them. I feel that steam is a really great way to get kids minds moving in a very fun way.

I really love Steam and am so happy I got this opportunity
thank you so much for taking the time to read my report on
Steam.
