This Syllabus is brought to you for free and open access by the NJIT Syllabi at Digital Commons @ NJIT. It has been accepted for inclusion in Chemistry and Environmental Science Syllabi by an authorized administrator of Digital Commons @ NJIT. For more information, please contact digitalcommons@njit.edu.
NJIT Academic Integrity Code: All Students should be aware that the Department of Chemistry & Environmental Science (CES) takes the University Code on Academic Integrity at NJIT very seriously and enforces it strictly. This means that there must not be any forms of plagiarism, i.e., copying of homework, class projects, or lab assignments, or any form of cheating in quizzes and exams. Under the University Code on Academic Integrity, students are obligated to report any such activities to the Instructor.

COURSE INFORMATION
Course Description: The preparation and properties of the various classes of organic compounds are discussed, with attention given to industrial sources such as coal and petroleum. Also covers the commercial utilization of these materials in the synthesis of useful products used in areas such as foods, cosmetics, textiles, plastics, and pharmaceuticals.

Number of Credits: 3

Prerequisites: Chem 123 or Chem 126 with a grade of C or better.

Course-Section and Instructor
Chem 243-101   Dr. A. Castro
Lecture:       Tiernan Lecture Hall 2 (Tier Lect 2) M: 6-9:05 pm
Office:        Tiernan (TIER) 323A   Email: castroa@njit.edu
Office Hours:  M: 5-6 pm.  And by appointment.

Required Textbook:  Organic Chemistry by Wade and Simek, 9th edition (2017); Pearson, Glenview, IL.
An inexpensive set of molecular models is highly recommended and models cannot be used during exams.

University-wide Withdrawal Date: The last day to withdraw with a W is Monday, November 12, 2018. It will be strictly enforced.

Learning Outcomes:
Upon completion of the course you should have a facility in accomplishing the following:

1. Understand the fundamental principles that govern organic chemistry reactions.
2. Assign IUPAC names to given structures and draw correct structures from given names.
3. Draw correct structures of products expected for a given set of reactants.
4. Apply fundamental principles to rational design of synthetic routes for organic compounds.
5. Write mechanisms for the reactions covered, including Nucleophilic Substitution and Elimination.
6. Improve logical reasoning ability, and to learn to integrate seemingly unrelated properties into patterns.
POLICIES
All CES students must familiarize themselves with, and adhere to, all official university-wide student policies. CES takes these policies very seriously and enforces them strictly.

Grading Policy: The final grade in this course will be determined as follows:

Exam 1 - 100 points
Exam 2 - 100 points
Exam 3 - 100 points
The lowest of the three exams will be dropped.
Final Exam - 100 points
The final exam will be partially cumulative with an emphasis on the understanding of fundamental concepts applied to a variety of systems. Specific questions on the chapters covered after Exam 3 will be emphasized.

Online Homework from www.masteringchemistry.com -100 points (Course ID: MCASTRO44722)
(In order to receive credit for their work, students must complete the assignments by the posted due date. Deadline extensions will only be given in case of documented medical reasons or emergency reasons approved by the Dean of Students. Extensions will not be granted because of website difficulties, internet being down, or your own computer problems)
The final grade will be calculated from a total of 400 points. The final exam and the online homework will not be dropped.

Your final letter grade in this course will be based on the following tentative curve:
A (90-100%), B+ (85-89%), B (84-80%), C+ (79-75%), C (74-70%), D (69-65%), F (below 64%)

Attendance Policy: Attendance at classes will be recorded and is mandatory. Each class is a learning experience that cannot be replicated through simply “getting the notes.” Students are responsible for all the material covered and announcements made in class. All email communication should done using the “njit.edu” domain.

Make-up Exam Policy: There will normally be NO MAKE-UP EXAMS during the semester. In the event that a student has a legitimate reason for missing an exam, the student should contact the Dean of Students office and present written verifiable proof of the reason for missing the exam, e.g., a doctor’s note, police report, court notice, etc. clearly stating the date AND time of the mitigating problem. The student must also notify the CES Department Office/Instructor that the exam will be missed so that appropriate steps can be taken to make up the grade.

Cellular Phones: All cellular phones and other electronic devices must be switched off during all class periods. Such devices must be stowed in bags during exams.
Chemistry Tutoring Center: Located in the Central King Building, Lower Level, Rm. G12. Hours of operation are Monday – Friday 10:00 am - 6:00 pm. For further information please click here.

Accommodation of Disabilities: Office of Accessibility Resources and Services (formerly known as Disability Support Services) offers long term and temporary accommodations for undergraduate, graduate and visiting students at NJIT. If you are in need of accommodations due to a disability please contact Chantonette Lyles, Associate Director at the Office of Accessibility Resources and Services at 973-596-5417 or via email at lyles@njit.edu. The office is located in Fenster Hall Room 260. A Letter of Accommodation Eligibility from the Office of Accessibility Resources Services office authorizing your accommodations will be required.

For further information regarding self-identification, the submission of medical documentation and additional support services provided please visit the Accessibility Resources and Services (OARS) website at:

Course Outline
Chapter 1: Structure and Bonding
Chapter 2: Acids and Bases; Functional Groups
Chapter 3: Structure and Stereochemistry of Alkanes
Exam 1
Chapter 4: The Study of Chemical Reactions
Chapter 5: Stereochemistry
Chapter 6: Alkyl Halides, Nucleophilic Substitution
Exam 2
Chapter 7: Structure and Synthesis of Alkenes; Elimination
Chapter 8: Reactions of Alkenes
Chapter 9: Alkynes
Exam 3
Chapter 10: Structure and Synthesis of Alcohols
Chapter 11: Reactions of Alcohols
Final Exam
