HSS 408, Robots + Work

Dr. Bernadette Longo, Fall 2018

Section 461: online via Moodle (<http://moodle.njit.edu>)
Instructor Office: Cullimore Hall 419
Office Hours: Tuesdays 11:00 a.m.– 12:30 p.m. and by appt.
Phone: 973-596-5384 or 973-596-3266 (Humanities office)
E-mail: blongo@njit.edu

Course Description: Humanities senior seminar. Combine current theory with practice to prepare students as socially conscious technology developers. Analyze complex social and technical situations to develop socially appropriate responses through tasks that involve problem analysis, ethical considerations, and technology issues regarding “influences on the distribution of jobs and nature of work. While advances promise to inject great value into the economy, they can also be the source of disruptions as new kinds of work are create and other types of work become less needed due to automation” ([Partnership on AI](#)).

[Open questions we will explore include](#) (from [DeepMind Ethics & Society](#)):

- How can we understand and estimate the effect AI will have on the changing labor market? What are the possible risks, benefits, and consequences of these changes?
- How and when will AI affect the relative earning power of different economic groups in society? What forms of inequality could this create or exacerbate?
- How can the social and economic impact of AI be anticipated and modelled, given that they are predicated on technological advances yet to be made?
- What new opportunities do these technologies create, and what responses are needed to ensure positive economic effects, inclusivity and equal access to benefits?

Learning Objectives

1. Be familiar with historical ideas relating to automation and impacts on labor markets. Be able to relate historical information with current and future trends in technology development and its social implications.
2. Be familiar with effects of automation and robotics on current labor markets and business practices. Analyze effects and apply them to future trends in technology development and its social implications.
3. Analyze and effects of trends in automation, robotics, and business practices on conditions of various economic groups in society. Apply analysis to specific cases and their social implications.
4. Analyze ethical issues relating to trends in automation, robotics, and business practices. Apply analysis to specific cases and their social implications.
5. Write effective prose that is professionally appropriate and mechanically correct.

Course Materials

- Kaplan, Jerry. *Humans Need Not Apply*. New Haven: Yale University Press, 2015.
- Ross, Alec. *The Industries of the Future*. NY: Simon & Schuster, 2016.
- Schwab, Klaus. *The Fourth Industrial Revolution*. NY: Crown Business, 2016.
- West, Darrell M. *The Future of Work: Robots, AI, and Automation*. Washington, D.C.: Brookings Institute Press, 2018.

Additional resources available on Moodle course site.

- Article: "[Silicon Valley's Giants Take Their Talent Hunt to Cambridge](#)," *New York Times*, July 5, 2018.
- [Generation Robot](#). Mouser Electronics. Five-part series of short videos.
- [AI Now 2016 Symposium](#) at NYU and [2017 Symposium](#) at MIT.
- [Rossum's Universal Robots](#) (R.U.R.) audiobook at [this link](#). This 1920 science fiction play introduced the term "robot" into our lexicon. This play by Czech writer Karel Capek also sets out an archetypal plot for human-machine relations that continues to impact and reflect our relations with intelligent machines. The language in this play may seem dated, but it's worth listening to this early dramatization of a foundational plot.

Academic Integrity: "Academic Integrity is the cornerstone of higher education and is central to the ideals of this course and the university. Cheating is strictly prohibited and devalues the degree that you are working on. As a member of the NJIT community, it is your responsibility to protect your educational investment by knowing and following the academic code of integrity policy that is found at:

<http://www5.njit.edu/policies/sites/policies/files/academic-integrity-code.pdf>. Please note that it is my professional obligation and responsibility to report any academic misconduct to the Dean of Students Office.

Any student found in violation of the code by cheating, plagiarizing or using any online software inappropriately will result in disciplinary action. This may include a failing grade of F, and/or suspension or

dismissal from the university. If you have any questions about the code of Academic Integrity, please contact the Dean of Students Office at dos@njit.edu

Students with disabilities: Appropriate accommodations will be made for all students with documented disabilities. If you have a disability requiring accommodation in this class, please notify me as soon as possible. This information will be kept confidential. For more information, see <http://www.njit.edu/studentsuccess/disability-support-services-0/>.

Grading: Your assignment grades will be given in points. Ten percent of the maximum assignment grade will be deducted each day that an assignment is not posted after an assignment deadline. The maximum number of points possible in the course is 1000. Your final course grades will be assigned according to the following scale:

Grade	Point totals	Significance
A	901-1000	Superior
B+	867-900	Excellent
B	801-866	Very Good
C+	767-800	Good
C	701-766	Acceptable
D	601-700	Minimum
F	000-600	Inadequate

Incomplete coursework is a major inconvenience for students and instructors. I expect you to do everything in your power to avoid this situation. Legitimate excuses include verified illnesses and family emergencies. No incompletes will be given unless you have a prior written agreement with me. If you have questions about the NJIT grading policy, please [click here](#). If you have questions about your responsibilities for course requirements, please [click here](#).

Assignments

Week 1A + 1B	40 pts.
Week 2	45 pts.
Week 3	50 pts.
Week 4.....	50 pts.
Week 5	50 pts.
Week 6	55 pts.
Week 7	50 pts.
Week 8	100 pts.
Week 9A + 9B.....	80 pts.
Week 10	50 pts.
Week 11	70 pts.
Week 13	30 pts.
Week 14.....	200 pts.
Week 15	130 pts.
Total points possible	1000 points

ENG 352 Class Activities

Week 1: September 4-9

Topic: Impacts of Automation on Employment

Reading:

- Campa, Riccardo. "Chapter 1: Engineers and Automata." *Humans and Automata: A Social Study of Robotics*. Frankfurt am Main: Peter Lang, 2015. Pages 23-36.
- Gaskell, Adi. "What Impact Is Robotics Having on the Labor Market?" *Forbes Magazine* (April 4, 2018). Online at [this link](#) and in resource folder on course site.
- National Council on Compensation Insurance. "The Impact of Automation on Employment – Part I." Online at [this link](#) and in resource folder on course site.
- Schwab, Klaus. "Introduction and Chapter 1." *The Fourth Industrial Revolution*. Pages 1-13.
- DeepMind. "Economic impact: inclusion and equality." Online at [this link](#).

Assignment 1: post by **Sunday, September 9** at midnight

- **1A: Post an introduction of yourself** for the others in class to get to know you. Use your creativity regarding media and types of documents you use in your introduction. Answer the following questions and add what you will:
 - Your name and major
 - Your goals for work in this senior seminar
- **1B: Post your initial thoughts** on one or more of these open questions [from DeepMind](#) that we will be exploring this semester. There will be discussion boards available for each question on the course site.
 - How can we understand and estimate the effect AI will have on the changing labor market? What are the possible risks, benefits, and consequences of these changes?
 - How and when will AI affect the relative earning power of different economic groups in society? What forms of inequality could this create or exacerbate?
 - How can the social and economic impact of AI be anticipated and modelled, given that they are predicated on technological advances yet to be made?
 - What new opportunities do these technologies create, and what responses are needed to ensure positive economic effects, inclusivity and equal access to benefits?

Week 2: September 10-16

Topic: Impacts of Automation on Society

Reading:

- George A. Bekey. "Current Trends in Robotics: Technology and Ethics." *Robot Ethics: The Ethical and Social Implications of Robotics*. Eds. Patrick Lin, Keith Abney, George A. Bekey. Cambridge, MA: The MIT Press. 2012. Pages 17-34.
- Lin, Patrick. "Introduction to Robot Ethics." *Robot Ethics: The Ethical and Social Implications of Robotics*. Eds. Patrick Lin, Keith Abney, George A. Bekey. Cambridge, MA: The MIT Press. 2012. Pages 1-16.
- Longo, Bernadette. "Human+Machine Culture: Where We Work." *Digital Literacy for Technical Communication: 21st Century Theory and Practice*. Ed. Rachel Spilka. NY:

Routledge. 2009. Pages 147-168.

- Schwab, Klaus. "Chapter 3.4: Society" and "3.5 The Individual" *The Fourth Industrial Revolution*. Pages 91-105.

Assignment 2: post by **Sunday, September 16** at midnight

- Post your responses to these questions:
 - 2.1 Are some jobs too important, or too dangerous, for machines to take over?
 - 2.2 What ethical implications do you see in this statement from the Bekey reading: "It is evident that shared, cooperative work between humans and robots may enhance the working environment, but it may also reduce human-human interaction and communication."
 - 2.3 How do you respond to this statement from the Schwab reading: "When one's life becomes fully transparent and when indiscretions big or small become knowable to all, who will have the courage to assume top leadership responsibilities?"

Week 3: September 17-23

Topic: Changing Labor Market

Reading:

- Casselman, Ben. "Robots? Training? Factories Tackle the Productivity Puzzle." New York Times, June 25, 2018. Online at [this link](#) and posted on Moodle course site.
- McKinsey Global Institute. "What is the future of work?" December 2017. Podcast and transcript online at [this link](#).
- Ross, Alec. "Introduction" and "Chapter 1: Here Come the Robots." *The Industries of the Future*. NY: Simon & Schuster. Pages 1-43.

Assignment 3: post by **Sunday, September 23** at midnight

- Post your response to this [Open Question 1](#):
 - How can we understand and estimate the effect AI will have on the changing labor market? What are the possible risks, benefits, and consequences of these changes?

Week 4: September 24-30

Topic: Economies Around the World

Reading:

- Ross, Alec. "Chapter 6: The Geography of Future Markets" and "Conclusion: The Most Important Job You Will Ever Have." *The Industries of the Future*. NY: Simon & Schuster. Pages 186-249.

Assignment 4: post by **Sunday, September 30** at midnight

- Post your response to this statement from the Ross reading:
 - "The growing economic diversity and increasing pace of change means that investors and people in global business will have to be as mobile and able to work across cultures as people newly entering the workforce."

Week 5: October 1 - 7

Topic: Earning Power of Economic Groups

Reading:

- McKinsey Global Institute. "How will automation affect jobs, skills, and wages?" March 2018. Podcast and transcript online at [this link](#).
- McKinsey Global Institute. "Jobs Lost, jobs gained: What the future of work will mean for jobs, skills, and wages." December 2017. Article and full report available online at [this link](#).

Assignment 5: post by Sunday, October 7 at midnight

- Post your response to this [Open Question 2](#):
 - How and when will AI affect the relative earning power of different economic groups in society? What forms of inequality could this create or exacerbate?

Week 6: October 8 - 14

Topic: Anticipating Economic Impacts

Reading:

- Lee, Kristin. "Artificial Intelligence, Automation, and the Economy." The White House, December 20, 2016. Online at [this link](#). Full report posted on course site.
- Wladawsky-Berger, Irving. "AI, Automation, and the U.S. Economy." *MIT IDE*, January 16, 2017. Online at [this link](#) and on course site.

Assignment 6: post by Sunday, October 14 at midnight

- Post your response to this question:
 - On page 3 of the December 20, 2016 White House report, the authors say, "Technology is not destiny; economic incentives and public policy can play a significant role in shaping the direction and effects of technological change. Given appropriate attention and the right policy and institutional responses, advanced automation can be compatible with productivity, high levels of employment, and more broadly shared prosperity." They then present three policy strategies for anticipating economic impacts of AI. What are your reactions to these policy statements?

Week 7: October 15 - 21

Topic: Modeling the Future

Reading:

- PWC. "The macroeconomic impact of artificial intelligence." Online at [this link](#). Full report posted on course site.
- Duke SciPol. "Artificial Intelligence, Automation, and the Economy." Online at [this link](#). Full report posted on course site.

Assignment 7: post by **Sunday, October 21** at midnight

- Post your response to this [Open Question 3](#):
 - How can the social and economic impact of AI be anticipated and modelled, given that they are predicated on technological advances yet to be made?

Week 8: October 22-28

Topic: Position Paper Midterm

Reading:

- Model UN Preparation. "Position Papers." Online at [this link](#).

Assignment 8: post by **Sunday, October 28** at midnight

Using the readings in Weeks 1-7, write a position paper on what you've learned about the topic of Robots + Work so far this semester. Structure your paper around these open questions (from [DeepMind Ethics & Society](#)):

- How can we understand and estimate the effect AI will have on the changing labor market? What are the possible risks, benefits, and consequences of these changes?
- How and when will AI affect the relative earning power of different economic groups in society? What forms of inequality could this create or exacerbate?
- How can the social and economic impact of AI be anticipated and modelled, given that they are predicated on technological advances yet to be made?

Your audience will be Dr. Longo and the other students in class this semester. Your purpose is to demonstrate what you have learned about the topic and how you can apply your knowledge outside the classroom to society-at-large as a technology professional.

Week 9: October 29 - November 4

Topic: Social Responsibility and Collaborative Writing

Reading:

- Your partner's Week 8 position paper.
- Singer, Natasha. "Tech's Ethical 'Dark Side': Harvard, Stanford, and Others Want to Address It." New York Times, February 12, 2018. Online at [this link](#) and posted on course site.

Assignment 9: post by **Sunday, November 4** at midnight

- As a team, complete the following and turn in 1 assignment for your team:
 - 9A: Read each other's position paper** and write a comparison of each of your positions on Open Questions 1-3. How might you reconcile your positions into a team position on these questions?
 - 9B: Write your team's reaction** to this statement from this week's reading: "Technology is not neutral," said Professor Sahami, who formerly worked at Google as a senior research scientist. "The choices that get made in building technology then have social ramifications."

Week 10: November 5-11

Topic: Opportunities and Responses

- Kaplan, Jerry. "Chapter 8: Take This Job and Automate It," Chapter 9: The Fix Is In," and "Outroduction: Welcome to Your Children's Future." *Humans Need Not Apply*. New Haven: Yale University Press, 2015. Pages 129-208.

Assignment 10: post by **Sunday, November 11** at midnight

- As a team, post your response to this [Open Question 4](#):
 - What new opportunities do these technologies create, and what responses are needed to ensure positive economic effects, inclusivity and equal access to benefits?

Week 11: November 12-18

Topic: Opportunities and Responses Position Paper

Reading:

- Model UN Preparation. "Position Papers." Online at [this link](#).
- West, Darrell M. "Chapter 4: Rethinking Work," "Chapter 5: A New Social Contract," and "Chapter 6: Lifetime Learning." *The Future of Work: Robots, AI, and Automation*. Washington, D.C.: Brookings Institute Press, 2018. Pages 63-124.

Assignment 11: post by **Sunday, November 18** at midnight

- Post your team's position paper on [Open Question 4](#):
 - What new opportunities do these technologies create, and what responses are needed to ensure positive economic effects, inclusivity and equal access to benefits?

Week 12: November 19-25

Enjoy the Thanksgiving holiday!

Week 13: November 26-December 2

Topic: Position Paper Draft

Reading:

- Model UN Preparation. "Position Papers." Online at [this link](#).

Assignment 13: post by **Sunday, December 2** at midnight

- As a team and using the readings in Weeks 1-11, post a draft position paper on what your team has learned about the topic of Robots + Work this semester. Structure your paper around these [open questions](#) (from [DeepMind Ethics & Society](#)):
 - How can we understand and estimate the effect AI will have on the changing labor market? What are the possible risks, benefits, and consequences of these changes?
 - How and when will AI affect the relative earning power of different economic groups in society? What forms of inequality could this create or exacerbate?
 - How can the social and economic impact of AI be anticipated and modelled, given that they are predicated on technological advances yet to be made?

- What new opportunities do these technologies create, and what responses are needed to ensure positive economic effects, inclusivity and equal access to benefits?

Your audience will be the people working at [AI Now Institute](#) at New York University, Dr. Longo, and the other students in class this semester. Your purpose is to persuasively advocate for your team's position based on what you have learned about the topic. The point of this assignment is to practice applying your knowledge as a technology professional to technology+society issues outside the classroom.

Week 14: December 3 – 9

Topic: Position Paper

Assignment 14: post by **Sunday, December 9** at midnight

- As a team, revise your position paper into a final version.

Week 15: December 10 - 12

Topic: Final Analysis of Robots+Work

Assignment 15: post by **Wednesday, December 12** at midnight

- As an individual, post an analysis of the course topic "Robots+Work" covering the following points:
 1. What is your historical understanding of how robots have been incorporated into workplaces? Why is this understanding important for your position on the course topic?
 2. What is your understanding of the current situation regarding robots in workplaces? How did you come to this understanding? Why is this understanding important for your position on the course topic?
 3. What is your understanding of ethical questions regarding robots in workplaces? How did you come to this understanding? Why is this understanding important for your position on the course topic?
 4. What is your understanding of social implications regarding robots in workplaces? How did you come to this understanding? Why is this understanding important for your position on the course topic?
 5. What is your understanding of your social responsibility as a technology professional regarding robots in workplaces? How did you come to this understanding? Why is this understanding important for your career? Why is this understanding important for society-at-large?
 6. What is the main thing you learned this semester about Robots+Work? Why is this important and how might you use this experience in the future?

This syllabus and the due date schedule may be revised by the instructor at any time during the semester. All revisions will be reasonable and based on class needs.
