This Syllabus is brought to you for free and open access by the NJIT Syllabi at Digital Commons @ NJIT. It has been accepted for inclusion in Chemical and Materials Engineering Syllabi by an authorized administrator of Digital Commons @ NJIT. For more information, please contact digitalcommons@njit.edu.
CHE 380 – Introduction to Biotechnology  
Spring Semester 2019

1. Logistics

Instructor: Dr. Sagnik Basuray  
361 Tiernan Hall  
sagnik.basuray@njit.edu

Class Time: M/R: 01:00 PM - 2:20 PM

Class Location: ECEC 115

Office Hours: W: 2:30 – 3:30 P.M. (Dr. Basuray) – Room 361, Tiernan Hall

Text: Introduction to Biotechnology (3rd Edition) by William J. Thieman (Author), Michael A. Palladino (Author).....And hand-outs, lecture notes and presentations will be available on Moodle

Communication: A Moodle website for the course provides assignments, required materials, and a schedule of lectures. Other than normal office hours, you can meet me anytime by appointment.

2. Course Information

Description: The course will cover basic scientific knowledge and its application in biotechnology. We will start with an introduction to molecular biology (cells, proteins, DNA) and its practical applications with some historical examples. The fundamentals of Chemical engineering processes will be used to provide sufficient tools and basic knowledge to understand biotechnology. During the course, some simple formulas for calculations related to molecular biology useful in biotechnology will be introduced as and when possible. We will discuss in details the emerging areas of biotechnology, for example Plants, Forensics, Sequencing, Regulatory pathways and agencies. Towards the end of the course, we will see how the application of Nanotechnology and Electronics is changing the face of the biotechnology industry from cancer detection to wearables. In addition ethical, legal and social issues related to some provocative themes and issues in Biotechnology like genetically modified (GM) food or organisms (GMO), genetic testing, stem cells among others will be touched on.

Course Objectives: The anticipated knowledge, skills and/or attitude to be developed by the student are:

- Understand what “biotechnology” means and what it encompasses
- Appreciate the diversity of molecular biology; from eukaryotic and prokaryotic cells, to the concept of gene, nucleotide structure, type of RNA and replication process.
- Develop an appreciation of the different molecular biology techniques from recombinant DNA technology to proteomics
- Have fundamental understanding and be able to broadly categorize biotechnological processes based on the products formed and/or the process or substrates used
- Have an understanding of the common methods of application and significance of biotechnology and its resultant industries from medicine to human genome project
- Appreciate the multidisciplinary nature of biotechnology
- Have an awareness of the regulatory framework regarding biotechnology and some of the current and future ethical issues surrounding biotechnology

Prerequisites: Undergraduate classwork in CHEM 122 – Fundamentals of Chemical Principles or CHEM 126 – General Chemistry II

Objectives of CHE 380: Besides the technical objectives (Instructional Objectives) that will be distributed weekly, the Learning Objectives of CHE 380 are as follows:

<table>
<thead>
<tr>
<th>Outcomes</th>
<th>Assessed</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Apply knowledge of math, science, and chemical engineering to biotechnology</td>
<td>Homework and exams</td>
</tr>
</tbody>
</table>
Goals: The course aims to fulfill several academic and professional goals.

- Address students’ research needs
- Improve scientific communication. Cultivate critical thinking
- Allows students to understand, relate and appreciate the field of biotechnology.

3. Schedule of Classes, Assignments

<table>
<thead>
<tr>
<th>Topic</th>
<th>Readings/HW</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Section 1: Fundamentals of Biotechnology</strong></td>
<td></td>
</tr>
<tr>
<td>Genes and Genome, The molecules of Life</td>
<td></td>
</tr>
<tr>
<td>• Eukaryotic and Prokaryotic cells</td>
<td>Section 2.1</td>
</tr>
<tr>
<td>• Cell structure, definition</td>
<td>Section 2.1</td>
</tr>
<tr>
<td>• Concept of gene as genetic materials</td>
<td>Section 2.2</td>
</tr>
<tr>
<td>• Structure of nucleotide</td>
<td>Section 2.3</td>
</tr>
<tr>
<td>• Type of RNA and protein Synthesis</td>
<td>Section 2.4</td>
</tr>
<tr>
<td>Homework 1</td>
<td></td>
</tr>
<tr>
<td><strong>First Mid-Term</strong></td>
<td></td>
</tr>
<tr>
<td>Recombinant DNA technology</td>
<td></td>
</tr>
<tr>
<td>• Mutations and DNA Cloning</td>
<td>Section 3.1</td>
</tr>
<tr>
<td>• Restriction Enzymes, Plasmid DNA</td>
<td>Section 3.1</td>
</tr>
<tr>
<td>• Bacterial Transformation</td>
<td>Section 3.1</td>
</tr>
<tr>
<td>• Polymerase Chain Reaction</td>
<td>Section 3.3</td>
</tr>
<tr>
<td>Application of Recombinant DNA technologies</td>
<td></td>
</tr>
<tr>
<td>• Gel electrophoresis</td>
<td>Section 3.4</td>
</tr>
<tr>
<td>• DNA sequencing</td>
<td>Section 3.4, 3.5</td>

### GRADING

<table>
<thead>
<tr>
<th>Component</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>Problem Sets:</td>
<td>5%</td>
</tr>
<tr>
<td>(5 Homework sets, each 1 point, not submitting a homework will carry -2 penalty)</td>
<td></td>
</tr>
<tr>
<td>Exam 1, Exam 2 and Exam 3: (Mid-Term 1)</td>
<td>50% (Best of 2 Mid-Term's)</td>
</tr>
<tr>
<td>Exam 3: (Finals)</td>
<td>30%</td>
</tr>
<tr>
<td>Class Participation:</td>
<td>5%</td>
</tr>
<tr>
<td>(pop quizzes)</td>
<td></td>
</tr>
<tr>
<td>Final Project and Presentation:</td>
<td>10%</td>
</tr>
</tbody>
</table>

### CLASS PARTICIPATION:

- The quality of questions to and responses to questions from course instructor
- Preparation for, and interaction with, instructor on specialty topics
• Use of Moodle and participation in discussion board topics as assigned
• Punctuality, attendance, and prior negotiation of approved absences for causes other than illness
• Pop quizzes, in class assignments will be given randomly throughout the semester. Students who read the assigned readings will have no problems passing the quizzes.

HOMEWORK
1. Homework assignments will be uploaded on Moodle. Typically, it will be a mix of problems: reading assignments, perform calculations, and literature search.
2. Late Problem Sets will not be accepted. Problem Sets are considered late if received later after Moodle closes. No extensions, since you have all of the assignments on Moodle.
3. Problem Sets should be turned with your name, assignment number on the top to get the credit.
4. Any question that requires diagrams, graphs, etc. has to be made by you. Do NOT copy and paste a figure from a digital source. However feel free to draw it using any software.
5. If you use a reference (published paper, textbook, website) to find information, including diagrams, graphs, etc., list the source as a reference at the end of the problem you used it in. Use AIChE style for referencing. Not including a reference where a reference is needed will carry a penalty of a 1 point.
6. Students are encouraged to work together on homework assignments, but you must turn in your own solutions. Also, you must list your collaborators name on the first page of the Problem Set.
7. Each problem will be graded according to the homework guidelines.
8. Lastly, if I or the TA cannot read your handwriting, I will give your sets a zero. Make sure you write neatly so I can give you the grade you deserve.

Homework Grading Guidelines (will be provided to the Teaching Assistant), the score will be awarded using the following guidelines (adapted from the Chemical Engineering Department at the University of Colorado, Boulder):
10. Problem completely correct as intended, or completely correct based on an interpretation that could be correctly inferred from the problem statement
9. Substantially complete and correct - but with one minor error like arithmetic
8. Substantially complete and correct - but with multiple minor errors or one major error such as a bad assumption
7. Demonstrates acceptable understanding of the problem, and knowledge of the proper method of solution; but solution is neither complete nor correct
6. Minimum passing grade - appears to understand the problem and have a general idea of the correct method of solution
5. Indication of understanding of the problem, but wrong approach to solution
4. Indication of understanding of the problem. No solution attempted
3. Indication of incomplete understanding of the problem. No solution or completely wrong approach.
2. Something on papers such as a diagram or equation not provided in the problem statement
1. Nothing on paper that was not provided in the problem statement

EXAM: The exam questions will range in difficulty from easy to challenging. There will be an appropriate mix of questions from multiple objective type, true/false questions to summary questions. Some questions will involve mathematical computations. I will take improvement during the course into account in the final grade determination. The exam will be cumulative and will be taken during a class period. There will be no make-up tests for students who miss an exam unless there is a legitimate excuse.

FINAL PROJECT: Please refer to the project information document on Moodle.

GRADES: The grades will be based on the following grading scale:
93.00 – 100.00% A
85.00 – 92.99% B+
75.00 – 84.99% B
62.00 – 74.99% C+
50.00 – 61.99% C
5. **ABET outcomes**

A) Understand the basic concepts of Biotechnology
   1. Identify the main differences between different types of Biotechnology with examples
   2. Identify the main differences between prokaryotic and eukaryotic cells through the functions of the organelles in the cell

B) Introduction to DNA molecule and DNA biochemistry
   3. Describe the DNA molecule, the genetic code and DNA replication
   4. Describe RNA and protein synthesis
   5. Describe mutations: different types and sources

C) Understanding Recombinant DNA technology and applying it to conceptual problems
   6. Define recombinant DNA technology, through bacterial transformations, restriction enzymes and plasmid DNA’s
   7. Apply the concepts in recombinant technology to understand, solve and interpret applied biotechnology problems

D) Understanding concepts in biomolecules other than DNA and application to biotechnology
   8. Apply the concepts of protein engineering to understand protein structure, function and manufacturing
   9. Apply the concepts of DNA and proteins to understand microbial technology

E) Applications of Biotechnology
   10. Understand the concepts of biotechnology to apply it to forensics.
   11. Understand the concepts of biotechnology to apply it to bioremediation.

F) Apply the concepts of Biotechnology to design bioreactors
   12. Describe concepts, such as specific growth rate, substrate consumption and growth phases, associated with cell growth kinetics

G) Apply the concepts in biotechnology to work on a current problem in biotechnology (team effort)
   13. An ability to work in a multidisciplinary team for presenting a contemporary bioengineering problem to a broader audience using group reports and group presentations.
   14. Identify, Formulate and present the contemporary bioengineering problem to a broader audience through a group presentation and report.
   15. An ability to identify, formulate, and describe a contemporary bioengineering problem

---

**Statement of Academic Integrity**

Academic integrity is fundamental to the activities and principles of a university. All members of the academic community must be confident that each person's work has been responsibly and honorably acquired, developed, and presented. Any effort to gain an advantage not given to all students is dishonest whether or not the effort is successful. The academic community regards breaches of the academic integrity rules as extremely serious matters. Sanctions for such a breach may include academic sanctions from the instructor, including failing the course for any violation, to disciplinary sanctions ranging from probation to expulsion. When in doubt about plagiarism, paraphrasing, quoting, collaboration, or any other form of cheating, consult the course instructor.

6. **Plagiarism and Academic Integrity**

The approved “University Code on Academic Integrity” is currently in effect for all courses. Should a student fail a course due to a violation of academic integrity, they will be assigned the grade of “XF” rather than the “F” and this designation will remain permanently on their transcript.
All students are encouraged to look over the University Code on Academic Integrity and understand this document. Students are expected to uphold the integrity of this institution by reporting any violation of academic integrity to the Office of the Dean of Students. The identity of the student filing the report will be kept anonymous. NJIT will continue to educate top tier students that are academically sound and are self-disciplined to uphold expected standards of professional integrity. Academic dishonesty will not be tolerated at this institution.

7. Student Disability Services
NJIT is committed to providing students with documented disabilities equal access to programs and activities. If you have, or believe that you may have, a physical, medical, psychological, or learning disability that may require accommodations, please contact Student Disability Services. Information on the self-identification, documentation and accommodation process can be found on the webpage at: http://www.njit.edu/counseling/services/disabilities.php.

8. Getting Help - General
The IST Helpdesk is the central hub for all information related to computing technologies at NJIT. This includes being the first point of contact for those with computing questions or problems. There are three ways to contact the Helpdesk:
1. Call 973-596-2900, Monday - Friday 8 am - 7 pm.
2. Go to Student Mall Room 48. Monday - Friday 8 am - 7 pm

9. Getting Help - Moodle
In addition to the Helpdesk, NJIT has a number of resources available to help you learn/use Moodle. Please be aware of the following:
2. Student Moodle Tutorials: http://moodle.njit.edu/tutorials/students/index.php
3. Student Moodle FAQs: http://moodle.njit.edu/tutorials/students/faq.php
