Recommended Citation

This Syllabus is brought to you for free and open access by the NJIT Syllabi at Digital Commons @ NJIT. It has been accepted for inclusion in Civil and Environmental Engineering Syllabi by an authorized administrator of Digital Commons @ NJIT. For more information, please contact digitalcommons@njit.edu.

Prof. Joseph Baladi, P.E, P.P. Email: joseph.baladi@njit.edu

Class 6:00 pm - 9:05 pm W Central King Building 220 Sep 04, 2018 - Dec 21, 2018

Tutoring will be available, schedule will be emailed to students.

Prerequisites: Phys 111 and Math 112, For chemical engineering and electrical engineering majors. Statics provides an understanding of the equilibrium of particles and rigid bodies, including simple machines, trusses, and frictional forces. Mechanics of materials covers pressure vessels, thermal stresses, torsion of shafts, stresses and deflection in beams, and column action.

**Basis of Grading**

<table>
<thead>
<tr>
<th>Component</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Homework</td>
<td>10%</td>
</tr>
<tr>
<td>Class Participation</td>
<td>5%</td>
</tr>
<tr>
<td>Quizzes</td>
<td>60% (20% each)</td>
</tr>
<tr>
<td>Final</td>
<td>25%</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>100%</strong></td>
</tr>
</tbody>
</table>

**Grade Distribution**

- A = 88 to 100
- B+ = 82 to 87
- B = 76 to 81
- C+ = 70 to 75
C = 65 to 69
D = 60 to 64
F = 59 or less
W = Voluntary before deadline
Incomplete may be given in rare instances when the student is unable to attend or otherwise do the course due to illness etc. All of the missed work must be made up during the following semester.

**Policies**

Attendance: Attendance will be taken at the beginning of the class.

*The NJIT Honor Code will be upheld and any violations will be brought to the immediate attention of the Dean of Students.

*Students will be consulted with by the instructor and must agree to any modifications or deviations from the syllabus throughout the course of the semester.

**QUIZZES:** All quizzes and finals will be "Closed Book". Only the FE Handbook is permitted as a resource, but NO notes may be added. You should not write in the FE Handbook. The quizzes will be given approximately at the end of the fourth, eighth and twelfth weeks. Information regarding the exact dates and the times will be provided by the instructor. No make-up quizzes will be given. Instead, the weight for the final examination may be proportionately higher to make up the legitimately missed quiz. (Note from a physician, etc).

**HOMEWORK:** Problems on the course outline sheet are to be solved and submitted at the beginning of the first lecture in the week following the assignment. Homework will be graded and returned to the student during the following week. To obtain full credit, you must submit the work on time and in the proper form. A minimum of 70% of the homework must be submitted to receive a passing grade.

1. Use 5-square per inch National Computation pad paper ONLY (sold at the NJIT Bookstore). Problems should be done on one side of the 8-1/2 x 11 pad paper.

2. On the top of each page, in the space provided, Print your instructor's name, section, problem number, student's name (LAST, FIRST) date, and page number.

3. The problems must be presented in numerical order as assigned, with one problem per page. Letters and numbers must be neat, clear and legible.

4. Draw neat, clear, free body diagrams as required. Use a straight edge or other drawing instruments as needed.

5. Box in the final answer accompanied by its units. DO NOT HAND IN CLASS NOTES.
6. Staple the problems in proper numerical order with a single staple in the upper left-hand corner.

Additional Note*:

Attendance will be taken at the beginning of the class and could affect your final grade.

In case of any student misses a class / quiz, or fail to submit an assignment on time, the Office of the Dean of Students is the only entity that would determine the legitimacy of the absence or the situation via a written email addressed to the course instructor.

It is the student’s responsibility to contact the office mentioned above and make his/her case with proper documentations.

Please note that your final grade will reflect your work and calculated exactly as indicated in the above breakdown, no extra credits will be given.

</table>
Provide examples of several analytical methods to determine the mechanical behavior of materials under various load conditions.

| Provide analytical techniques for the types of mechanics problems, which commonly occur in the industries, which employ chemical engineers. | 1, 2 | 1 | Homework and exams. |

**Student Learning Outcomes 4: Apply problem solving techniques to real world situations.**

| Provide development of structured problem solving techniques for various classes of mechanics problems. | 1 | 1 | Homework and exams. |

### CEE Mission, Program Educational Objectives and Student Outcomes

The mission of the Department of Civil and Environmental Engineering is:

- to educate a diverse student body to be employed in the engineering profession
- to encourage research and scholarship among our faculty and students
- to promote service to the engineering profession and society

Our program educational objectives are reflected in the achievements of our recent alumni:

1. **Engineering Practice:** Alumni will successfully engage in the practice of civil engineering within industry, government, and private practice, working toward sustainable solutions in a wide array of technical specialties including construction, environmental, geotechnical, structural, transportation, and water resources.

2. **Professional Growth:** Alumni will advance their skills through professional growth and development activities such as graduate study in engineering, research and development, professional registration and continuing education; some graduates will transition into other professional fields such as business and law through further education.

3. **Service:** Alumni will perform service to society and the engineering profession through membership and participation in professional societies, government, educational institutions, civic organizations, charitable giving and other humanitarian endeavors.

Our Student Outcomes are what students are expected to know and be able to do by the time of their graduation:

1. an ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of
public health, safety and welfare, as well as global, cultural, social, environmental and economic factors

3. an ability to communicate effectively with a range of audiences

4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts

5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives

6. an ability to develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions

7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Revised: 2/13/18
