Engineer
In
Orbit

Walter M. Schirra, Jr., a Navy Commander and native of Hackensack, New Jersey, attended Newark College of Engineering before he entered the United States Naval Academy, from which he graduated in 1945. He received flight training at Pensacola, Florida. As an exchange pilot with the U. S. Air Force 154th Fighter-Bomber Squadron, he flew ninety combat missions in Korea.

Commander Schirra was one of the original seven astronauts named by NASA in April of 1959.

On October 3 he flew a six-orbit mission on his "Sigma 7" Mercury spacecraft. His flight plan differed significantly from those of the two previous missions primarily because of the greater emphasis placed on the engineering aspects of the flight. He used the automatic stabilization and control system to perform successfully the retrofire and re-entry maneuvers. The landing was four nautical miles from the recovery carrier.

On December 15 and 16, Commander Schirra was the command pilot of the history-making Gemini GT-6 flight, which performed the first rendezvous of two-manned maneuverable spacecraft with the orbiting GT-7. At times the two crafts were within one foot of each other, attesting to the remarkable skill with which Commander Schirra and his co-pilot handled their craft. Such skill in piloting has shown Commander Schirra to be one of the best of the Astronauts. He has been chosen as a Command Pilot for future-manned space exploration.

Special Awards:

Commander Schirra received the Distinguished Flying Cross and two Air Medals for his Korean Service; the NASA Distinguished Service Medal and the Astronauts Wings; a second NASA Distinguished Service Medal and the NASA Exceptional Service Medal for Gemini 6.
The Challenge of Space

In 1957, the world was ushered unexpectedly into the space race. Only a few far-seeing engineers and scientists might have predicted that just ten years later we would stand ready to approach the moon and beyond.

While they dreamed of the stars, others envisioned a modern campus to provide the technical people necessary for the conquest of space. Hundreds of graduates have left Newark College of Engineering since 1957. In many ways, they have contributed to the giant steps forward of our space program.

The challenge of our future space program will require a greater number of young, well-trained engineers: today's graduates. All branches of engineering find areas of contribution. While the civils are designing landing towers, the electricals will be designing the sophisticated data and control sys-
tems needed in precise space experiments. At the same time, mechanical and chemical engineers will combine their efforts to supply the fuels and engines required to propel the rockets into space. Once in orbit, the astronauts using environmental studies of industrial engineering perform the tasks that will permit others to follow.

To meet this ever-growing demand for well-trained engineers, Newark College of Engineering has revised and expanded its campus and curriculum to provide the best available in professional engineering training. From the halls of our new buildings will come talented engineers who may become the astronauts of the future. A recent request from Eugene M. Shoemaker, Chairman of the Astronaut Selection Committee for NASA, emphasizes the efforts of scientists and induces them to become more than earthbound members of the space team.

Utilizing the techniques of chemistry, mathematics, engineering, and the sciences, engineers and scientists will accumulate a growing body of knowledge of the solar system. To aid this search, NASA wishes to enlist engineers as astronauts.
To the Class of 1967:

Your theme for this year's Nucleus, "Engineering Enters Space," is a timely reminder to every member of the graduating class that we are entering upon a new era in engineering which will see advances in the very near future of such dramatic and far-reaching character as literally to stagger the imagination.

The past ten years have laid the groundwork of space technology. It is a significant fact, to prove the validity of the point, that Russia's original Sputnik was launched in October of 1957, almost exactly a decade ago.

The next ten years will profit from the groundwork of recent history in such a manner that engineering itself will become more and more highly sophisticated and consequently more and more demanding upon your talents. This will inevitably be true whether your individual careers develop directly within the disciplines of space technology or within the countless other disciplines developing under the auspices both of industry and government. We have come a long way, indeed, from the old methods and attitudes that were sometimes known as "handbook engineering."

These new developments -- and the pace of these developments -- will mean for each and every one of you opportunities of a magnitude and sophistication that never existed before. They will also mean an attention to continuing education, in whatever specialties you find yourselves, that will be rigorous, demanding and unending. The single word that seems to sum it up best is "challenging."

You have had a fine basic education at Newark College of Engineering which has prepared you well to enter the challenge of the new decade. Your faculty and administration are proud of your past accomplishments, and look forward to your greater accomplishments in the future.

My heartiest congratulations and best wishes to you all!

Cordially yours,

President
Like, Quo Vadis

New sliderules in shiny leather cases, piles of new books: chem, phys, math, E.G. with pencils falling out of that blue cardboard box and careful! don’t smear that drawing, it took me all night . . . was that the second bell? excuse me, I’m lost, which way is Weston Hall, you see I’m . . . a freshman.

Stress-strain: as on beams, as on students, as on . . . all night with cold coffee at the bottom of the cup and three chapters to go at one in the morning or you don’t pass the mech test so compute the force that . . . keeps me dreaming: I will be an engineer and a good one and there’s only two years to go when you’re . . . a sophomore.

Junior year—professional department, departmental standing . . . four year man, five year man . . . junior man with senior ring and professional society pin and hey! next year it’s all over, next year we’ll be . . .

Seniors! Has it been four years? must have been, look how young the freshmen are coming out of the new buildings . . . wonder if they appreciate how long it took us to watch those buildings go up . . . stone by stone, year by year: new buildings, new seniors looking out over a new campus . . . into a new future. our future, we will build it.
Administration
While dealing with the everyday problems of administration and student services, he projects ahead five years to the needs of a Newark College of Engineering with four thousand full time graduate and undergraduate students. He predicts that county colleges will increase the size of the junior and senior classes which will demand additions in the way of faculty and equipment. The curriculum will be modified to permit greater selection of electives.

Apportionment of funds to satisfy requirements of students and faculty necessitates considerable thought. As Vice-President, Dean Hazell becomes the focal point for many lines of responsibility. By coordinating the inter-school departments, he is exposed to the present and future needs of the individual groups. Thus budget procedures may be applied to academic, research, or student service activities.
ROBERT E. BARTH
ASSISTANT DEAN OF STUDENTS

The Nucleus would like to extend a welcome in behalf of the student body to Mr. Robert Barth. Dean Barth received his Bachelor of Arts degree from Lake Forest College and later obtained his Master's degree from Ohio University. As Assistant to Dean House, he will serve as freshmen adviser. He is also studying the growing problem of off campus housing.
When applying to graduate school, one must pick a college and then submit a multitude of forms and letters. Dean Bedrosian gave information on scholarships and procedures. Even those troublesome letters of inquiry seemed a little more professional when he added just the right word.

L. BRYCE ANDERSON
ASSOCIATE DEAN OF ENGINEERING

Graduate school looms before many seniors, but which of many should he choose? Consultation with Dean Anderson often indicated choices that would best fit their abilities and ambitions. He also conducts a program for juniors to acquaint them with the opportunities and additional skills provided by graduate school.

Dean Anderson has recently become the Chairman of the Graduate and Undergraduate Curriculum Committee. Changes will be made by this group to delete courses which are now outdated and to add subjects of benefit to the modern engineer.

Faculty recruiting and development is another of the Dean’s responsibilities. Dr. Anderson endeavors to encourage the faculty to maintain scholarly pursuits and to attract well qualified professors.

Besides his other administrative tasks as Assistant to the President and Vice-president, Dean Anderson teaches several chemical engineering courses.

"You now have ten seconds to graph the average molecular weight of camel fur versus cost of living with the number of students in the room as a parameter."
THE CLASS

OF 1967
Alpha Pi Mu, the National Industrial Engineering Honor Society, was founded in 1947 at Georgia Tech. The Newark College of Engineering Chapter was founded in 1960. The purpose of Alpha Pi Mu is to confirm recognition upon those industrial engineering students who have demonstrated scholastic proficiency coupled with exemplary character and leadership qualities.
The Highlander Squadron of Newark College of Engineering has been a charter member of the National Arnold Air Society since 1950 when the charter was signed by General James Doolittle, Honorary National Commander. Members are initiated into the society on the basis of scholarship potential and motivation toward the air force.

The society conducts various activities among which are a tutoring program and the annual Military Ball.

The Newark College of Engineering Chapter of Chi Epsilon is dedicated to the purpose of maintaining and promoting the status of civil engineering as an ideal profession. Chi Epsilon was organized to recognize the characteristics of the individual civil engineer that are deemed fundamental to the successful pursuit of an engineering career, and to aid in their development.

The Newark College of Engineering chapter of Chi Epsilon, founded in 1958 as the 50th chapter, holds steadfast to the four pillars of principle of Chi Epsilon: Character, Scholarship, Practicality, and Sociability.
The Eta Kappa Nu Association recognizes those members of the electrical engineering profession who have distinguished themselves and their Alma Mater by outstanding contributions to the field of electrical engineering in later life or significant scholastic achievement as undergraduates. Gamma Kappa Chapter, founded at Newark College of Engineering in 1942, in addition to handling induction procedures serves the electrical engineering student body in general by providing tutoring and information services.

The chapter maintains a close contact with the Department, providing assistance in organizing its new facilities, and conducting tours during Open House. Gamma Kappa has also prepared elective course descriptions, including reviews of the text and sample test problems.
Omega Chi Epsilon, Honorary Chemical Engineering Society, had its inception at the University of Illinois in the spring of 1931. The object of the society, as stated in the national constitution, is the recognition and promotion of high scholarship, original investigation and professional service in chemical engineering.

The Eta Chapter, founded at Newark College of Engineering in 1957, gives recognition in the form of an award to distinguished faculty members and the outstanding senior. As a service to the chemical department, the Eta Chapter has also helped to organize and maintain a departmental reference library in Tiernan Hall.
Omicron Delta Kappa was founded at Washington University under the principle that leadership of exceptional quality and versatility in college should be recognized. Since its founding in 1914, there have been many significant changes in student life. One change that has also been evident in NCE is the remarkable growth of extracurricular activities. Thus in 1950 the Newark Circle of ODK was formed to give recognition to those students who have attained leadership achievement while maintaining high standards of scholarship. To be eligible, the student must exhibit exceptional leadership qualities in a minimum of two areas consisting of athletics, student government, publications, and the fine arts.
Phi Eta Sigma, the National Honorary Fraternity for Freshmen who demonstrate high levels of scholastic achievement, was founded at the University of Illinois. The Fraternity realizes the difficult transition to institutions of higher learning and provides a means of recognition for those who surmount the obstacles. Through its tutoring programs for Freshmen, the Chapter at Newark College of Engineering helps others to successfully meet the scholastic demands of college life.

HISTORIAN ..................... PHILIP KOHN
SENIOR ADVISOR .............. TOM O'CONNELL
Pi Delta Epsilon, the National Honorary Journalism Fraternity, recognizes outstanding undergraduate achievement in collegiate publications. Pi Delta Epsilon encourages its members to render service whenever possible and fosters freedom of thought in college press. Members strive to promote interest, to enlighten readers with factual information, and to represent their institution with a distinguished publication.
Pi Tau Sigma is the National Honorary Mechanical Engineering Fraternity. The Newark Tau Theta Chapter was installed at Newark College of Engineering on May 25, 1951. Members are selected during the junior or senior year not only on a scholarship basis, but on their leadership abilities and personal integrity. Pi Tau Sigma wishes to aid its members in a future successful career in mechanical engineering. As such, it will sponsor functions dedicated to fostering growth in the profession. It arranges group meetings with placement officers and provides tutoring in mechanical engineering courses.
The Tau Beta Pi Association, National Engineering Honor Society, was founded at Lehigh University in 1885 by Dr. Edward Higgison Williams, Jr. "to mark in a fitting manner distinguished scholarship and exemplary character as undergraduates in engineering, or by their attainments as alumni in the field of engineering, and to foster a spirit of liberal culture in the engineering colleges of America."

In keeping with this tradition, 1967 marks the twenty-fifth anniversary of New Jersey Gamma Chapter at Newark College of Engineering which has provided various services to the school and the undergraduate students.
Candidates for Who's Who Among Students in American Universities and Colleges are nominated from approximately 800 colleges and universities. The publication serves to recognize scholarship, participation and leadership in academic and extracurricular activities, citizenship and service to the school, and the promise of future success.
"No, I'll cut the ribbon and you mow the lawn."
"Okay! Now you let me throw you when my girl comes in!"
The same chemical engineers who are studying this distillation column could work with a combination of highly explosive materials to propel a giant rocket. Air for breathing purposes must be delivered continuously and purified for re-use later. For astronauts traveling without the protection of spacesuits, heat must be supplied to allow them to work in normal clothing.

Activities
APO is more than a fraternity; it embodies leadership, friendship, and service into a vital organ of the school and the community. Its purpose on campus is to provide service to the students and faculty through the operations of a lost and found, a loan service, and a used-book exchange.

For the community, APO conducts an annual Christmas party for the underprivileged children in the Newark area.

Members in the fraternity try to attain personal satisfaction by the desire to help others. Consequently, this national fraternity has become the largest in the country and the first in service.

The Student Council at NCE is a governing organization, composed of members of each branch of Co-Curricular Activities, and devoted to the responsibility of representing the student body.

It is the purpose of the Council to promote student welfare by establishing a liaison between the undergraduates, faculty, and administration, and by stimulating activities, organizations and public relations. The Student Council functions as the legislative and judicial branches of student organizations, and is adviser to all other student organizations. In conjunction, the Council is duty bound to advocate and defend the inherent rights and responsibilities of students, consistent with the principles of academic freedom.

Student organizations at NCE receive financial support by means of the Student Activities fee, which is budgeted and dispensed by the Council. The initiating of new organizations which are beneficial to the student community, is given complete support and once approved, the new groups are eligible for financial backing. With the development of the Operating Board as a committee of the Council, the roll of promoting an activity program has taken on a greater potential which will be exploited in the near future.

COUNCIL
For several decades, fraternities have played an important role in the traditions of Newark College of Engineering. With the increasing enrollment, fraternities will be called upon to play an even larger role in the development of scholarship, leadership training, and socializing. They provide satisfaction to its members through the bonds of brotherhood.

Fraternities are also an excellent area for developing leadership and practicing human relations. The fraternities provide the leadership for most of our campus extra-curricular activities. In the fraternity itself one can develop his leadership potential through accepting positions of leadership and their encompassing responsibilities. He will learn to manage men, to be responsible for making decisions, and to learn how to relate to others which is important in the occupational world. Through a fraternity and its close relationships the student can gain more knowledge of himself and others. These learning experiences can be invaluable to the student after he leaves the college.

Finally, a fraternity offers brotherhood. To the fraternity man it means a close bond of friendship and loyalty between himself and the other members of his group. Brothers help each other with their problems, whether they be personal or academic. These are the men upon whom the brother can rely. In later years as alumni, there will still be a close bond between the individual and the brothers of his fraternity. He will always be welcomed into the homes of brothers and the fraternity house at NCE.

Go GREEK!
Alpha Sigma Mu is a social fraternity for veterans of the armed forces. The Fraternity was organized in the spring of 1954 and, since then, has been a hospitable place for all veterans. Here the servicemen acclimate to student life and hash over their service experiences. Throughout the year, the fraternity sponsors skating parties, picnics and a spring dinner dance. Many athletic events are also included as part of the social program.

The fraternal, social and athletic atmosphere of the fraternity is a great aid in attaining a well rounded college education.

We at Theta Chi have felt a real sense of accomplishment and progress in the past year. In the area of scholastic achievement many of the brothers have seen their names placed on the Dean’s list, and also have received citations from the Professional Development Program. Some of our brothers were invited into honor societies in the past year and two were cited in Who’s Who in American Colleges and Universities.

Our progress athletically is evidenced by the fine winning records of the house’s teams. The intra-mural sports program at NCE also lists a fine representation of Theta Chi’s. The Theta Chi volleyball team advanced well into the final stages of the elimination tournaments.

Theta Chi showed tremendous progress in participation in student government with a number of brothers winning elected positions. The fact that every brother was active in class councils or the various clubs indicated a definite growth in the role that Theta Chi plays in the activities of NCE.

The social calendar of the past year provided many events and certainly many moments which will stand out in our memories. The Friday night parties, theme parties on Saturday nights and the Founders Day Dinner Dance all add up to make our social calendar outstanding. Beach parties, ski trips to Vermont and a canoe trip down the wilds of the Delaware gave the brothers an opportunity to prove their prowess as outdoorsmen.

In retrospect, we at Theta Chi feel that the progress we have made fosters the true sense of fraternalism among the brothers and also is indicative of our motto “Alma Mater first, and Theta Chi for Alma Mater.”

Since its beginning, five years ago, Iota Kappa Phi’s theme has been one of constant growth and improvement. From its start in a small storefront on Warren Street, Iota Kappa Phi has grown to a well-respected member of the fraternal community of Newark College of Engineering.

The fraternity house, which the brothers own, is located on High Street, opposite St. Michael’s Hospital. Much hard work and ingenuity have been required to transform the house into a respectable building with a true fraternity atmosphere.

The brothers have also devoted their efforts toward active participation in each of the IFC sports activities. These teams have always performed with a determination to win, demonstrating true fraternal spirit.

Since its beginning, the brotherhood has won numerous awards, among them, an IFC talent show award, and the IFC’s “Most Improved Fraternity” award. The spirit and enthusiasm which helped win these awards cause an Iota Kapp man to stand out as a leader, a true man among men.

Kappa Xi Kappa’s thirty-five active brothers (and one dog) bend all their ingenuity toward making Kappa Xi a viable part of NCE life. Since its inception two years ago, the College’s only fraternity on University Place has made its presence strongly felt in interfraternal sports, contests, and NCE’s extracurricular life.

This year has been an important one for Kappa Xi. The brothers are involved in an expansion program, as well as a search for new and larger facilities. Feelers have also been sent out to several national fraternities espousing the same ideals of brotherhood, scholarship, and service that guide Kappa Xi.

Perhaps the most memorable event for the brotherhood: the IFC voted Kappa Xi Kappa status as a fully recognized fraternity at NCE last fall.

Pi Kappa Phi was founded here at NCE in 1948. From its inception Pi Kapp has always strived to develop within the Brotherhood the attributes of leadership and social consciousness. Through various programs and activities the Brotherhood performs a service to both the school and community.

Being a social fraternity Pi Kapp, or the “Friendly Fraternity” as we are known on campus, maintains a full schedule of Friday and Saturday night parties. The social highlight of the year is our annual Rose Ball at which we crown the Rose Queen.

The 1966 season proved to be a very fruitful one for Sigma Pi. An all out effort by the entire Brotherhood in many school and fraternity activities was responsible for our second straight “Best Fraternity on Campus” award. This same enthusiasm on the part of our brotherhood was recognized by our national office, for they presented us with the “Beta Province Award” as the outstanding chapter on the East Coast.

Our chapter also had a very successful year in IFC sports. Our athletes brought home the IFC bowling, softball and football trophies. We are especially proud of our football team which was undefeated and unscored upon this season.

The social activities at Sigma Pi always generate a great deal of excitement among the Brothers. Outstanding events on our social calendar include our annual Orchid Ball, held at a night club on Thanksgiving Eve, and our semi-formal Spring Dance, which last year was converted into a spring weekend. Other prominent affairs are the Founders Day Banquet, the Halloween Party, and the Christmas and New Year’s Parties.

During the week there is never a dull moment for the live-ins at the chapter house. The highlight of this season was our apprehension of three car thieves.

Sigma Pi placed high on its lists of ideals the importance of scholastic achievement and the participation of its members in the extracurricular activities at NCE.

Tau Delta Phi continued to be one of the leading fraternities on campus this year. The spirit aroused for the football season and especially for the traditional rivalry carried over to make the blue and white prominent in sports. The brothers supported each school function with the same enthusiasm as any fraternity function, as can be proved by the trophies which adorn the fireplace. Individually many brothers won recognition. Upperclassmen pledged their respective departmental honor societies, and several brothers were named to Who's Who in American Colleges and Universities. At the National Convention Tau Epsilon Chapter won recognition for their outstanding efforts. But, far and away, the most important recognition came from the brothers themselves for their founders and alumni at the Twentieth Anniversary Formal held in April. Undergraduates and alumni paid tribute to the spirit that molded them into men and will continue to guide them as long as they live, the spirit of fraternalism.
He shall not want

Tau Psi Chapter of Tau Epsilon Phi was founded in 1947 at Newark College of Engineering as a non-sectarian social organization. Since then the brothers have also done their part to serve the community. They have on numerous occasions helped charities and regularly done volunteer work at Newark City Hospital.

They also hold their scholastic responsibilities high, as their purpose is to get an engineering education.

The brothers always strive to live up to their creed which emphasizes: "To live in the light of friendship, to walk in the path of chivalry, and to serve for the love of service."

Kappa Xi Kappa’s thirty-five active brothers (and one dog) bend all their ingenuity toward making Kappa Xi a viable part of NCE life. Since its inception two years ago, the College’s only fraternity on University Place has made its presence strongly felt in interfraternal sports, contests, and NCE’s extracurricular life.

This year has been an important one for Kappa Xi. The brothers are involved in an expansion program, as well as a search for new and larger facilities. Feelers have also been sent out to several national fraternities espousing the same ideals of brotherhood, scholarship, and service that guide Kappa Xi.

Perhaps the most memorable event for the brotherhood: the IFC voted Kappa Xi Kappa status as a fully recognized fraternity at NCE last fall.

Pi Kappa Phi was founded here at NCE in 1948. From its inception Pi Kapp has always strived to develop within the Brotherhood the attributes of leadership and social consciousness. Through various programs and activities the Brotherhood performs a service to both the school and community.

Being a social fraternity Pi Kapp, or the “Friendly Fraternity” as we are known on campus, maintains a full schedule of Friday and Saturday night parties. The social highlight of the year is our annual Rose Ball at which we crown the Rose Queen.

The 1966 season proved to be a very fruitful one for Sigma Pi. An all out effort by the entire Brotherhood in many school and fraternity activities was responsible for our second straight “Best Fraternity on Campus” award. This same enthusiasm on the part of our brotherhood was recognized by our national office, for they presented us with the “Beta Province Award” as the outstanding chapter on the East Coast.

Our chapter also had a very successful year in IFC sports. Our athletes brought home the IFC bowling, softball and football trophies. We are especially proud of our football team which was undefeated and unscored upon this season.

The social activities at Sigma Pi always generate a great deal of excitement among the Brothers. Outstanding events on our social calendar include our annual Orchid Ball, held at a night club on Thanksgiving Eve, and our semi-formal Spring Dance, which last year was converted into a spring weekend. Other prominent affairs are the Founders Day Banquet, the Halloween Party, and the Christmas and New Year’s Parties.

During the week there is never a dull moment for the live-ins at the chapter house. The highlight of this season was our apprehension of three car thieves.

Sigma Pi placed high on its lists of ideals the importance of scholastic achievement and the participation of its members in the extracurricular activities at NCE.

"Well, I think this wash definitely looks whiter!"
This year's NCE soccer team was once again a brilliant success. However, this came as no surprise since Coach J. Malcolm Simon's squad was over abundantly laden with talent.

There was Myron Bakun who enough about cannot be said. He not only repeated his All American and All East honors, but he became the first NCE player to make All America first team.

There was goalie Pete (Shutout) Jansons who was simply outstanding in the nets for NCE. He was voted the team's most Valuable Player award while also receiving All East Honorable mention recognition.

There, too, was Gundar Richters who also made All East honorable mention. However, he is only a Junior and will serve as tri-captain next year with stalwarts Paul Tubbs and Joe Sestillio. Thus the immediate future of NCE's booters is left in most able hands.

Who can forget the steady, hard-nosed play of Angelo Pompeo and big Oleg Moiseenko who along with Bakun tri-captained this year's squad. The inspired play of Pompeo and Moiseenko was instrumental in earning the NCE team a reputation for its tough and aggressive defensive antics.

There were the goals by Anthony Baeta, Roman Skripkus and Mich Kachmar, and there was the play of Harry Habermas, Sal Scardigno and senior, Gerry Kurth who rounded out the NCE attack.

Although our players will always remember how they faltered in that big game against Trenton State, they will remember too, the overwhelming sense of pride and team coherence that Coach Simon instilled in them. Truly, had it not been for this, they would have remained throughout the season the same ineffective team which took the field that first day against Navy.

### TRI-CAPTAINS

*Myron Takes Charge*
The 1967 edition of NCE fencers is led by senior co-captains Bruce Killy and Oleg Moiseenko. Killy is a poised four year veteran with an enviable style who this year has been forced to switch from foil to epee' since George Potoczniak and Stan Karmizen were lost to this year's team through graduation.

Moiseenko and seniors Rudy Rosenfeld, John Spina, Joe Potoczniak and Manny Polizzi have proven to be a most capable and consistent group of swordsmen. In particular, Rosenfeld and Spina specialize in a flashy, but fierce offensive tactics.

Coach Paul Hausser has had a winning fencing team for 14 consecutive years, and with his hard-working close-knit 1967 forces who have a distinct pride in themselves, this year should be no exception.
Graduation hit the NCE cager's hard last year as the team lost perennial stars Richie Schroeder and Jack Walsh. Gone too, for 1967 was coach Joe Fitzgerald who turned over the guiding reigns of NCE basketball to Lou Torcicollo.

However, the NCE hoopsters were not to be denied as new stars arose to replace the old. Coach Torcicollo did a fine job in his first year as he guided NCE to a 10-8 season and a third place finish in the holiday tournament.

6'7" Richie Olsen remained a tower of strength both offensively and defensively for the Engineers. This year he received lots of help, however, as Ben Gazdowicz and Bob Mulder also displayed fine shooting and strong rebounding. Big Bob Kivitt also did a commendable job off the boards when he saw action.

Tom Gawley continued his impressive play in the backcourt along with his cohort "shuffle guards", George Stramback, Terry Bergen, John Buchanan and John Heath, all of whom displayed some fine ball-handling and aggressive defensive work. The basketball maturity of Terry Bergen was finally manifested as his play was a most pleasant and welcome surprise this year.

The brilliant play of newcomers Joe Galvao, Steve DeSteno and John Bober as they came off the bench to inspire many a rally leaves the NCE cagers in sound shape for the future.

Bob gets two ... ... so does Terry!

Introducing the starting five
THE SENIORS

SENIOR CHEERLEADERS
NCE's varsity nine is led this year by seniors George Stramback, Jack Yadvish, and Bob Ziegler. However, it is with basically a young team that Coach Paul Hausser is forced to deal with his opponents, for inexperienced personnel is his biggest opponent of all.

NCE's baseball forces have virtually always outhit its foes and this year's offensive attack is true to NCE tradition. Along with the trio of Stamback, Yadvish, and Ziegler, all of whom are four year veterans, such "stickers" as Dave Robinson, Jerry Rozanski, and George Kiemle form a potent NCE lineup.

Although pitching has always been a perennial problem of Coach Hausser's, fireballing Big Jim McDonald and curve ball artist Steve Schieni handle the bulk of this year's hurling assignments with competence for the Engineers. Waiting in the wings should the front-line pitching falter are relief specialists Bill Rivera and Steve Zapoticzny.

The 1967 Varsity Baseball Team is one of which NCE can be proud. It proved to be a close-knit bunch of hard-working young men who wore their red and white colors well. Consequently, when the smoke had cleared and the season had ended, the NCE nine had indeed tasted its share of victory.
Scooping up the ball...

Co-Captains Jim and Dave

Rounding first
GEORGE STRAMBACK

Now this is what we're going to do ...
Jim takes over ...

Lay it down on the 2nd pitch ...

BIG JIM MCDONALD

Jim takes over ...

BOB ZIEGLER
Judo has finally emerged as a varsity sport of prominence at NCE through the guiding efforts of its charter members who were lost to the team last year through graduation. Gone are Ray Kasbarian, Gene Sheninger, Paul Meade and Harry Stoll to whom we remain grateful.

Now in its fourth year at NCE, the Judo team is unique in that it is not limited to inter-collegiate competition but also exists for those students who wish to partake in physical activity and who want to learn some finer aspects of self-defense.

The Judo group is led by the expert instruction of Coach Yoshisaoa Yonezuka who is a former varsity captain of the champion Nippon University team. His dedicated leadership was recently rewarded when the team became East Coast champs.
Oh, it ain't necessarily so!
"Maybe I should put my jacket on."
Awright! The first mug
what steps outa line...
So I asked her, "What's wrong with the way I'm dressed?"

"And you can see how we, ha-ha, can't help but find you guilty"
Ha-Ha!

Yoo-hoo! Mister! Can I have a fortune cookie too?
So that’s what a physics test looks like.

"There’s nothing like a Lark."
"For the last time—it's not my cup."

"Wait! I know it! Uh, I=ER, Right?"

"What do you mean will I write on the top of the board?"

"Wait! I know it! Uh, I=ER, Right?"

Class of '65
"You load 16 tons and what do you get."

"The ... name ... of ... the ... man who ... shot ... me ... was ... was ... Choke ... Arrgh!"
This is TWA Flight 218, sir! Nice to have you aboard!
I still like “Playboy’s” brochure best.
Ikky! Someone put a worm in your French fries!

Bubble; bubble toil and trouble, now to add the malt.
AHERN, J. E.—1966-67 President of Eta Kappa Nu, Tau Beta Pi IEEE member.

ZWASKIS, ANTHONY—Intramural Basketball, Class Council (Class Rep.), ASME member.
"Dick Tracy calling Joe Jitsu."

"Yes, but it's the highest F I've ever given to a student!"

"Why don't you get a new story. I heard that one in my freshman year."
"It's ... it's ... by God! It's Miss June"

"Until the wind changed I thought Secaucus was the other way."

"We did it! We knocked the eagle off the Colonades."
Welcome Seniors

The NCE Alumni Association welcomes you to its ranks, and wishes you the best of luck, and a successful career in the years ahead.

The doors of the Alumni Center are open at all times, and the facilities and services of the Association are always available to you. The Association is your strongest link with NCE.

You make possible through your support of
the Annual Alumni Fund:

- Seminars and Conferences on Topic of Importance to Engineers
- Scholarship Program
- Student Placement Loan Program
- The NCE Alumnus Magazine
- Junior Career Night
- Scholastic Recognition Programs
- Athletic Awards
- The Alumni Senior Smoker
- Doctorate Fellowship
- Guest Lecturers

You join 10,000 Alumni who have contributed in the last four and a half years

$95,000 to the Annual Alumni Fund

$343,000 to the Alumni Building Fund

GOOD LUCK

Class of 1967

Our four years of study at Newark College of Engineering is now finished. Using the education, skills, and professionalism that we acquired at NCE, we, as knowledgeable engineers, will scatter across the nation and many overseas areas. Before leaving, however, we would like to express our sincere thanks to the Administration, the Faculty, and members of the Maintenance Department.

Finally, we wish success to the members of the Class in all their endeavors.
The Interfraternity Council

Congratulates the Class of 1967 and
Wishes Them Success In All Future Endeavors
