WHAT IS A NIJIT?
What is a NiJIT?

You have probably heard of NiJIT as being the nickname of our school, or part of a platter in the Pub. We on the Nucleus staff have adopted a new definition of a NiJIT: A typical NJIT student.

At this point, you may be wondering what is the typical NJIT student? They come in so many shapes, sizes, and colors, that it is hard to paint one picture which encompasses all of their qualities; we used hundreds of pictures to depict the typical and not so typical NiJITs.

NiJITs include males, females, commuters, dormers, Americans, foreigners, involved, apathetic, serious students, party-goers, intellectuals and athletes. Indeed, some of these adjectives should describe YOU, the NJIT.
There is one thing all NJITs have in common, and that is the desire to better themselves. Whether your major is engineering or architecture, computer science, or business administration (or any other), you have come here to NJIT with goals in mind. Indeed our individual goals differ, but they all carry with them an underlying idea and that is to advance.

As you progress through the pages of this book, try to find the NJITs you know, and with each page you turn, you will be proud to be a NJIT, as you remember the good times you spent this year at NJIT.

-C.F.
"From earliest times to the present, the great army of thought has marched — some individuals ahead, some in the rear, a large stragglng army — steadily past one milestone after another, leaving behind some ideas, fashioning new ones, transforming old ones. We do not know the ultimate destination of this long trek, if it has any. But where we have been and what we have learned is worth knowing, for each of us is a part of the army, anxiously searching for signposts and wondering where, in the endless chaos of things, we are."

-Roland N. Stromberg
THE COLLEGE YEARS — AS WE EXPERIENCE THEM

The college years are perhaps the most stressful and difficult, but also the most rewarding times of our lives.

During the college years we are often faced with difficult decisions: decisions concerning our life as it opens up before us, and our dreams become reality. Our ideas are beginning to stand the test of time, and we are reaching points of realization; we may stop and ask ourselves: Is this what I want?

(continued on page 7)
What is a NiJIT?

"Enough, then of worrying about tomorrow. Let tomorrow take care of itself. Today has troubles enough of its own."

(Mt 6:34)

This page

middle - The Bar is Open!!!!!!
bottom left - Studying for tests is a daily battle and struggle, but the grades are worth it.
bottom right - Part of the Miniversity crew giggle about the sticker on the back of Dave.

Opposite Page

bottom - The problem of figuring out what is going on.
top - Alan Wolke introduces the band during the Miniversity.
Many of us will find ourselves, with two or three years invested in pursuit of our degree, wondering how we got here, and asking ourselves if we're in the right place. At this time we are faced with decisions concerning our plans in all areas of our lives, and unfortunately, we are beginning to see things as they confront us: in our path; obstacles which we see preventing us from doing what we dreamed of.

We are all growing up, perhaps faster than ever. We are challenging our ideas: Am I going to be satisfied with the career I chose? Do I want to advance myself with another degree or perhaps higher education? Do I want to go into my own business, and how will I approach this goal? Will I be happy working for someone in the career that I chose?

On another level we may be asking ourselves: Do I want to get married, or do I wish to be single? What kind of person am I looking for? In the experience of meeting other people and making relationships, we are finding out things about ourselves that perhaps we never knew.

Thirdly we are perhaps for the first and only time forming our own set of values. For some of us, this might mean backtracking, and stopping ourselves from being that terrible person we used to be, and finding "The Real Me." For some of us, we turn to religion to give us the strategy for self-improvement and self-realization, and perhaps when we reach this point, religion will be more powerful to us than ever. Others turn to education to find that professional way of projecting ourselves. We are learning from our peers, leaders, parents and family members, and those people who provide us with our education. We are forming our own self with just a little bit from everybody, allowing ourselves to be influenced by some; rejecting the ideas of others.

Last but not least, we may sit back and look at the world we are living in. We question it. Is there a better way? Should I take an active role improving on the accomplishments of others? Do I want to contribute my ideas as much as I can?

Most important of all, we are becoming aware of the world around us and the problems it confronts us with. We are challenged to make this life of ours the best; to stand out above others around us; to set an example for those to follow us and to make this world a better place to live.

Nick Ladomirk
What is a NiJIT?

"It is not the soundness in the structure of our institutions that allows them to stand up to time, but it is the capacity to change with the times."
NJIT is changing with the 80's. With microcomputers, students can now adapt to new ways of writing, calculating, and studying. As the State plans toward their projected goal called University Heights, we will gain resources of other colleges and peoples, and create a more closely-knit college community.
What is a NiJIT?

FOR FRIENDS
Help me to be a friend to all who need me. Show me how to share your love, teach me to see you in others. While I'm here in school, let me see that more important than any books or exams are the friends that I make, the friends I'll come to love and cherish and always remember.

-Joe Corpora
Friendship exists all over NJIT. It helps us to achieve our goals and to enjoy life. Only on a small campus like NJIT, where being a friend is being a NiJIT, is friendship so meaningful.
“Never underestimate the potential of an idea.”

What is a NiJIT?

in Technology

top- Lorraine fights the battle between machine and mind.
middle left - President Saul Fenster discusses some policies with students.
middle right- Nick Cardo solves technical problems with the stereo.
bottom left- Arch. students listen to the lecture of some of the technological problems of the day.
bottom right- Some of the residents of the dorm wonder that is happening with the new dorm.
"...to explore strange new worlds, to seek out new life and civilization, to boldly go where no man has gone before."

bottom left: What program could be on the screen that keeps these NiJITs so interested?

bottom right: Using a scale which measures to 0.001g, this mad NiJIT scientist weighs his plutonium carefully.

As President Reagan pointed out in his State of the Union address, we as Americans have the highest standard of living in the world. It is up to us as individuals to keep America on top. Our generation is responsible for the technological successes that will advance our society to reaching the highest potential possible.

Years ago the Greeks and Romans had the highest standard of living because of their governments and technological innovations. Next is was the Church with its high intuition and organization as well as its philosophy. Later it was those countries with the best ships, who traded with the east and claimed new lands.

During the industrial revolution it was those European countries with the modern machinery and means of production that advanced; not to mention America.

It was Japan (although later) who created those tiny electronic devices which contributed to a higher standard of living in that country.

Now, in America in the 80's and 90's, it is up to you! Can we advance ourselves even higher as we supply the world with the latest technology?

It's important in that way to be a NiJIT; to be at the center of our technological development and to carry our nation on the backs of our ideas, and technological developments.
What is a NiJIT?

A NiJIT is . . .

one who has a programmable calculator.
one for whom FORTRAN is the primary language. English second.
o no longer just a white male anymore.
one who communicates best through equations and graphs.
one who is an expert in video games.
one who is stoop-shouldered from carrying a 50-lb. backpack.
one who pays $600 for his books per semester.
one who has dark circles under his eyes from doing late night projects.
one who spends 5 hours on a calculus problem only to realize he is solving the wrong problem.
from a school that doesn’t give athletic scholarships.
one who would prefer an Apple to an voluptuous member of the opposite sex.
one whose pet project is a car to take apart and put back together again.
one who believes humanities are a unnecessary evil.
one who usually commutes.
one who reads Science Magazine.
one who can’t find a parking space after 8:30 am.

Fill in the blank!!!
ARE YOU A NiJIT?

☐ yes
☐ no
☐ maybe
☐ none of the above
Architectural Studies have been developed.

A number of physical changes have significant impact as you walk around the campus. The erection of the first residence hall in Newark, on the NJIT campus, marked a historic turning point in the life of the Institute and the community. Residence Hall II has just been completed, doubling our student housing space, and extending our campus a block to the south.

Reconstruction and renovation of academic facilities have been important in helping us achieve new levels of distinction. Our new Mechanical Engineering Center helps put our engineering program in the forefront of engineering education. The new architectural design studios incorporate advanced concepts in learning environments. New physics laboratories and new facilities for the computer science programs have recently been completed.

More important than these programmatic and physical enhancements however, is the growth and development of every member of the Class of 1985. You have set and attained personal educational goals. Along the way, you have made contributions to the academic, professional, and social vitality of the campus, and have rendered dedicated service to various professional societies. The Class of 1985 has made an impact, individually and as a group.

I am honored to share your success and joy as you graduate, and to wish you and your loved ones happiness. I am confident that the personal impetus given at NJIT will continue throughout your life, and that you will meet the new challenges of your career with enthusiasm.

Saul K. Fenster, Ph. D.  
President
As Chief Academic Officer of the University, The Vice-President for Academic Affairs has a broad range of responsibilities which encompass overall academic planning and resource allocation. The Vice-President for Academic Affairs is responsible for the School of Architecture, Newark College of Engineering, and the Third College with an enrollment of over 7,200 undergraduates and graduate students. In addition, this office oversees the following areas: Research and Graduate Division; Dean of Student Services; Student Services including Admission, Registrar and Financial Aid; Computer Services; Library; Instructional Media; Division of Continuing Education; and the Office of Extension Programs.

The Office of the Academic Affairs consists of:

GARY THOMAS
DOROTHY LEVY
ARNOLD ALLENTUCH
RAYMOND BOXER
DENNIS DONAHUE
WILLIAM GILE
NEIL HOTZMAN
MERWIN KINKADE
JUDY VALYO
JOHN SCHMID
MORTON SNOWHITE

LESLEI WEISMAN
HOWARD KIMMEL
EDWARD MILLER
WILLIAM REYNOLDS
ERNEST SIMMS
JOSEPH THOMPSON
Dear Graduates:

It is time to say Congratulations - a time for you to be just proudly of your years, days, weeks, hours of hard work, a time for you to appreciate and value your achievements. It is a time when we want you to know how proud we are of you. We wish you every success in all that you undertake in the future.

We ask you to remember that much will be expected of you as a professional in the business world that will often forget or overlook what professional means. We ask of you to remember to work, to live by the standards that you have learned and which are best to which you have aspired. We hope that you will continue to make us proud of you.

Congratulations again, we'll miss you, and don't forget us and Godspell.

Sincerely,

Constance Murray
Dean of Student Services

The Dean of Students are:
CONSTANCE MURRAY, Dean of Student Services
RAY BOXER, Associate Dean of Students
JUDY VALYO, Associate Dean of Student Services
BOB HEDESH, Dean for Evening Students
ANN WRIGHT, Assistant to the Dean of Dean of Students
The overseeing of the three schools at NJIT is not an easy task, but Dr. Yi-Yuan Yu, Dean of the Newark College of Engineering; Dorothy Levy, Dean of the Third College, and Sanford Greenfield, Dean of the School of Architecture manage to keep the operation of each school running smoothly.

NCE covers the disciplines of all the engineering plus the applied Chemistry program. These programs cover about 90% of the school.

The Third College is the newest covering a wide range of programs. All of these majors are majors not covered by the other two schools.

The School of Architecture is a school that is key to the needs of the architecture student. It is one of the finest programs on East Coast. Architecture can be thought of as the thoughtful way of making spaces for people.
The Admissions Office plays a continual role in the student's career here at NJIT. Every semester they go through hundreds of applicants trying to find students that are best qualified for a career at NJIT.

The Registrar Office helps the students with the final selection of classes during the semester. If for some reason, a student can not finish a course or a semester, the Registrar will help the students drop the course. A student can also add a course at the beginning of the semester.

ADMISSIONS

The Office of Admissions consists of:

GRISELDA GARCIA
JAMES KOHTJE
BARBARA DUKE
MARGARET MATOX
SHARON PETTIFORD
PEGGY SCHELL
NEIL HOTZMAN, Director of Admissions Records & Financial Aid
HENRY MCCLOUD, Assoc. Director of Admissions

REGISTRAR

The Office of Registrar consists of:

CAROL HOGAN
TIFFANY CUMMINGHAM
ROSE MARIE GIANNETTA
SYLID PERCY
PEARL TYLER

DOROTHY COHRS
CONSTANCE MASON
MARGARET SULLIVAN
The Library is an essential part of the student's career at NJIT. It is a place for student's many talents. The Library is a place for studying quietly, to do the research that is required, or to finish that program that isn't quite done. When all else fails, it's also a place for a quiet nap.

The Instructional Media Center is located below the theatre. It provides the faculty and students with their audio/visual needs.

LIBRARY  IMC

The Library staff consists of:

- NINA ALEXANDER
- VIRGINIA BYRD
- MARY BONDS
- MARIE CORCORAN
- ALAN LEBISH, Acquisitions Librarian
- MARIORIE NELSON
- MADALYN PAGANETTI
- MARY PAGE, Inter-Library Loan Librarian
- JUDITH SMITH-PARROTT

- DIANA RODRIGUEZ, Head Catalog Librarian
- JANET SAMET, Periodical Librarian
- AMIRA SIDDIQUI
- MORTON SNOWHITE, Librarian
- LINDA STRIMIKE
- ELLEN TALBERT, Circulation Librarian
- SOPHIA WILLIAMS
- CHRISTINE ZEMBICKI, Head Reference Librarian

The Instructional Media staff consists of:

- WILLIAM X. REYNOLDS, Director
- JOHN DEMPSY
- LLOYD STEWART
- WANDA K. WILLIAMS
- BRENDA ANTHONY
The Financial Aid Department is a vital part of many students' career at NJIT. For those that qualified for financial aid, it helps to provide many of the necessary funds to go to school.

The Finance Department helps students keep track of their school bills; they will often remind students of bills which have been forgotten.

FINANCE/FINANCIAL AID

The Finance Department consists of:

JOHN M. CORCORAN, Controller
JOSEPHINE M. GIAIMO
AUGUST DAQUILA, Chief Accountant
GENEVIEVE FRANK
MARY BARR
RENEE CRAWLEY
HARRY TESSLER, Bursar
BENJAMIN GARAY, Supervisor of Financial Aid Accounts
FRANCES BIGG
LORRAINE MAY
JOYCE ROYSTER
BARBARA LEWIS
NINFA MUELLER
ROSALIE LIPKUS

The Financial Aid Department consists of:

MARY R. HURDLE, director
TERI BOYLE, Asst. Director
W. PEARL JENKINS
MARY WASHINGTON
MARY ANN RENGA
KAREN PURLI, Student Employment

ROBERT HOOK, Manager of Payroll and Payables
DEXTER ADAMS
BARBARA ROBINSON, Head Bookkeeper
ROSIE COLEMAN
EVELYN KILLIBREW
MARY JEFFERS
The Division of Continuing Education offers non-credit courses to both alumni and students without earning credits towards an additional degree. The courses are offered in many fields and interests.

The Graduate Division offers many courses towards Masters degrees in Chemical, Civil, Electrical, Industrial, and Environmental Engineering. Computer Science is also offered. A general Masters degree is given to those who major in Engineering Science, Applied Mathematics, Biomedical Engineering, Environmental Science and Toxicology, and Management and Organizational Studies.

CONTINUING EDUCATION/GRADUATE STUDIES

The Continuing Education Department consists of:
ALEX BEDROSSIAN
GLORIA FESKO
SYLIO WALKER
IRENE PIERCE
RUSSELL PIERCE
JOYCE FEDAK

The Graduate Studies Department consists of:
BETTY BILBACH
GAYLE KATZ
TWANIA LEWIS
DR. DINO SETHI
The Alumni Association's purpose is to keep in contact with the alumni of the school. This includes the actual students, companies, and the Institute. Scholarships, athletic awards, the alumnus magazine, some feedback sessions, guest lectures and seminars, and the alumni library collection are some of the opportunities offered by the Alumni Association. One of the Alumni Association largest responsibilities is supporting the school financially.

The Alumni Association consists of:

JOAN BUCHANAN, Associate Director of Alumni Relations
JUNE LAUNAY, Associate Director of Alumni Development
NIKKI BURR
GOLDEN BELL
CLAIRE DOUGHERTY
KATHY MEZABER
JUNE SNOWHEIGHT

ALUMNI ASSOCIATION
The Stop-In Center is a place where students can go for information and assistance with academic and personal concerns, or general information about NJIT. The Stop-In Center is staffed by NJIT students, Peer Counselors, who are trained in helping skills. Peer Counselors can help students negotiate the “red tape” of NJIT, with information on basic college procedures, registration, academic information and financial aid. Perhaps most importantly, Peer Counselors provide an open ear to those who need someone to talk to.

The Counseling Center provides professional counseling to students who feel that they need to talk to someone who is more knowledgeable than their own peers, parents, or friends. Trained professional counselors with degrees in psychology and related fields are very knowledgeable about the life and the conflicts an NJIT student may face.

Any person who is faced with problems and decisions, (and who isn’t) can benefit from counseling. A visit to the Center almost always results in a better understanding of oneself and therefore a stronger person.
The Bookstore is the place to buy brand-new books, lab manuals, supplies, and other essential supplies for the student's stay at NJIT.

The Food Service at NJIT is responsible for the preparation and the serving of the food to both the students and the faculty and staff. The same food is served at both the center cafeteria and the faculty cafeteria located in Cullimore Hall. The food for the many special functions and events is also done by the Food Service employees.
Physical Plant is the department that is supposed to handle all construction, modifications, movement of furniture, and cleaning up of the school, which they do with, hmm, err, interesting response times. They're the ones that empty the garbage once a month or so in the Student Area, replace the paper towels in the bathrooms every now and then, and rarely answer the phone when you call them, even for their yearbook picture. But really, they do a lot of work on campus, including cutting the grass, general maintenance, and should be commended for all their hard and underappreciated work.

POLICE/SECURITY

The Police Security forces consists of:
L. BAEZ  G. MORGAN
J. BLACKMOND  J. O’DONNELL
W. BROWN  R. QUINCE
J. CANZATER  T. SANFORD
V. CONSALES  W. SIMS
G. CREEKMUR  L. SMITH
S. DALY  K. STEPHENS
V. FRAMMIGEN  J. TROIA
L. GREEN  T. TURNER
C. HARDY  E. WILLIAMS
T. HOLMES  J. WILLIAMS
N. LEWIS  E. CHANEY
J. MCANDREW  A. PIPARO
C. MCGHEE  L. HALL
S. MCMILLIAN

PHYSICAL PLANT
The NJIT Center Tap Pub hires student employees during the academic year. Pub workers themselves actually form a little club along with the full time employees who run and manage the Pub. Pub workers create a friendly atmosphere among NJIT students.

The PUB Staff consists of:

DENNIS BOYLE, Manager
CHARLENE BALFOUR
NANCY WITSIK
BRAD VALERIUS
GLENN TRIMBOLO
KATHLEEN SPIELANE
STEVE SEE
JOE SCUDERI
ELADIO RUIZ
ED RIMBACK
BARBARA PERUN
DIANE NELSON
KEVIN MCPHILLIPS
TONY MARCHIONNE
HARRY MAHONEY
RAY KERWIN
JEFF HELLINGER
DOUG HALKENHAUSER

DAN GUADAGNOLI
BILL FULLER
MICHELLE FREELAND
JOE DRZAL III
ALKIS DIMOPOULOS
BRUCE D'AMBOLA
DAWN CONLEY
DAVE CHUNG
JOHN CHAYKO
MARY CARUSO
LAUREL CARD
PETER BURKE
BOB BURGER
CHRISTIANNE BUFFA
JOHN BROCKEN
GAYLE BERKERY
LOU TOMASIULLO
The Center, not the Student Center, is a general place to hang out, eat at either the Pub or the “Caf”, relieve your frustrations on the video games, pick up more 0.5 mm pencil leads from the bookstore, or check out the many student offices in the dungeon, I mean basement, oops, the official title is lower level. Upstairs there a number of conference rooms, a gallery with an art show, usually, the ballroom, and the “temporary” Development Offices. Or if your tired you can veg out in the first floor lounge and watch either the movies or the special SAC events. If you’re really bored you can watch the people go by or bother the groups at the tables.

The Center consists of:
MERWIN KINKADE, DIRECTOR
JODIE COTTRELL
BOB MORAN
GLORIA PHIPPS
DOTTIE WRIGHT
DENNIS BOYLE
WILLIAM REDD
ROBERT HEDISH
ROSE DEL VECCHIO
The Department of Aerospace Studies carries out the Air Force ROTC program “to recruit, educate, and commission officer candidates through a college campus program in response to Air Force requirements.” Air Force ROTC has been doing this as a part of NJIT for 35 years, providing the highly educated officers required in today’s modern Air Force.

Although flying is the primary mission of the Air Force, it is not the only job that has to be done. Today when science and technology are so much a part of national defense, the Air Force needs the best scientists and engineers the nation can produce. It also needs other professional men and women with wide ranges of knowledge and skill. Many young officers who enter the Air Force today do not expect to be pilots or astronauts. They want to be part of the gigantic research and development program or the vast support organization that will keep our country strong and progressive. NJIT ROTC cadets are preparing to be a part of this Air Force team.
The study of Architecture involves designing and decision-making in order to solve environmental problems, and that is just what the staff helps the students with.

NJIT’s Architecture program prepares students to face this challenge by teaching them a wide variety of skills and concepts. The first two years of the architect’s curriculum consists of an introductory program which emphasizes general studies. This is followed by a three-year Architecture program which emphasizes design solutions.

Architecture is not all work, however. There are many fun activities for the students to keep their interests diversified. Some of them include: a scavenger hunt in NYC, a log cabin contest, Beaux Arts Ball, and numerous others.

The Architecture department consists of:
SANFORD GREENFIELD, Chairman
ERIN BALE
DIANA BRYANT
DAVID ELWELL
KAREN FRANCK
LIA GARTNER
HANS GOEDERKING
GLENN GOLDMAN
JEFF HANNIGAN
RICHARD HATCH
DAVID HAWK
SUSAN HENDERSON
BARRY JACKSON
E. JEFFERSON
E. KENNEDY
DOUGLAS KELBAUGH
JOHN LEDBÜSKA

PETER MICKLE
SANDY MOORE
M. MOSTOLLER
PETER PRAN
ANTHONY SCHUMAN
WILLIAM STRAUSS
A. SENKEVITCH
FRED TRAVISANO
DONALD WALL
MICHAEL WEBB
JULIAN WEISS
LESLIE WEISMAN
TROY WEST
KEVIN WILKES
STEPHEN ZPENSKI
JOHN ZOLDOS
Chemical Engineering involves the design and operation of plants which produce chemicals, including plastics, textile fibers, gasoline, and pharmaceuticals. Chemical Engineers are also involved in the search for alternative energy sources, and improvement on energy production, recovery of oil from oil shale, the manufacture of synthetic fuels from coal, and the preparation and recovery of nuclear fuels.
Civil engineering is concerned with the planning, design, and construction phases of an engineering project, including energy, environmental, & economic considerations. It involves dealing with people and cities, producing for the disposal of wastes, and developing efficient transportation, housing, and water systems.

The undergraduate program includes work in the field measurements, construction materials and procedures, structural analysis and design, soil behavior, transportation engineering, water supply, and pollution control. The department offers a set of elective courses through which the student can specialize in such areas as urban planning and urban systems, construction engineering, and surveying.

The civil engineering graduates are well prepared to enter the job market in federal, state, and the municipal agencies, in many consulting firms in the metropolitan area and throughout the country, or with the major industrial firms involved with the aspects of planning, design, or environmental control. Students may also enter the field of research and development.
The Department of Computer and Information Science prepares students for a wide range variety of careers in a rapidly growing field. Building on a solid foundation of math, science, and computer programming, the CIS curriculum teaches an understanding of the information system and its potentials, with applications to management, science, engineering, and computer technology itself. Computer Science majors graduate into a field which gives them a wide variety of options, where high-paying jobs are available, now that the computer is becoming a necessity in any field.

COMPUTER & INFORMATION SCIENCE

The CIS department consists of:

M. BABINSKI
Y. CHIANG
A. LA SALLE
G. MOSHOS
E. SARIAN
S. WOHLGEMUTH
M. BALTRUSH
T. FEATHERINGHAM
D. LUBLINER
E. OSINSKI
J. SCHER, Chairman
M. TUROFF
M. CHEN
C. IlioPOULOS
J. MC HUGH
J. RYON
K. VYRAS
Electrical Engineering is a very diversified and challenging field. It is concerned with the design, development, fabrication, and control of electrical devices on which our society largely depends. There are many areas of study in electrical engineering such as electrical power engineering, design of integrated circuits, computers, environmental and biomedical instrumentation, energy conversion, space vehicle control, electronic engineering, micro processors, and satellite communications.

The electrical engineering curriculum provides a broad base in mathematics, the physical sciences, humanities, and social sciences. Specialties include a systems sequence in communications, control, computers, power, or medical instrumentation. The outcome of the electrical engineering curriculum provides us with engineers who can think analytically and creatively, work effectively, and communicate with others.
The industrial engineering curriculum prepares engineers to make improvements in industry. Industrial engineers are trained to solve problems in design, research and management, among other areas. The I.E. curriculum prepares them to seek solutions in industry by concentrating on product and production process design, work analysis, and management science. During the curriculum, students are exposed to fundamental concepts of engineering, and then later, they are exposed to more specialized areas of research design and development. They are also exposed to manufacturing, distribution, and personal management. Upon graduation, I.E.’s are put into areas where they can improve production and cut costs, so that they improve the efficiency of a company and improve the company overall.
Humanities is a large part of a college education. Studying Humanities, knowing a little history and knowing a little about cultures and trends builds a sound foundation for further engineering education.

Last year the Humanities department opened a new course, Art History. Their aim is to make the NJIT student more knowledgeable about different areas of our trends and cultures. The art course for example, gives the student a better understanding and appreciation of art and its historical perspective. We aim to make our Humanities department the best.

The Humanities Department consists of:

OTTO BADENHAUSEN
EDWARD BARRETT
JANXMES CAMP
LOUISE CASTRONOVA
NANCY COPPOLA
FRANK COSSA
DENNIS DONAHUE
MARISA ESPOSITO
WILLIAM GILE, Theatre Director
HAYDEN GOLDBERG

NORMAN TOBIAS
SAM WALLACE
HENRY WEINFIELD
STANLEY B. WINTERS
JAMES WISE
The Department of Mathematics offers a BS degree in Statistics and Actuarial Science and an MS degree in Mathematics. A very rich variety of courses are given by the Department both for the support of its own programs and to provide the necessary mathematical training for students in the other disciplines at NJIT. The BS program in Statistics and Actuarial Science prepares the student for employment as a statistician or actuary upon graduation, or the pursuit of more advanced degrees. An actuarial science student is exposed to the material necessary to pass the first four actuarial examinations, and is strongly encouraged to take these examinations prior to graduation. A graduate of the MS program in Mathematics is well prepared to begin a career as an applied mathematician or statistician or, if the student is so inclined, to enter a PhD program in these areas. The Department of Mathematics prides itself on the breadth, depth, and quality of its course offerings and excellence of its teaching.
Mechanical Engineering is concerned with the design, development, manufacture and operation of many energy and dynamic systems. M.E.’s use their knowledge of systems design and control, materials, and production methods to develop complex systems including aircrafts, power plants, and combustion engines. These systems must meet design constraints as well as safety and environmental protection requirements. M.E.’s are also involved in the search for alternate energy sources, in response to worldwide energy needs.

An M.E. student may specialize in many technical areas such as air, thermal, and noise pollution control, energy conversion, computer-aided design, and bioengineering. Upon graduation an M.E. student may use his degree as a foundation for graduate studies, or for studies in other fields such as medicine or law.
Engineers do not always stay in engineering; some of them move up and become managers. There they utilize organizational skills learned from the OSS department.

The department offers many courses which help develop skills in areas essential to engineers but not related directly to engineering. Among the areas of study are psychology, labor relations, economics, business management, sociology, and industrial administration. These courses enable engineers to carry out duties to carry management duties as well as their specialty of study in engineering.
1984 brought the Physics Department two new additions. The first addition is a microcomputer laboratory just completed. Now physics students will be able to take physics lab in which computer use is an integral part. The second new addition is the Chairman. In July Dr. Philip R. Goode joined the Department. He comes from the University of Arizona and his research specialty is Astrophysics. Presently research areas in the Department are Atomic and Nuclear Physics, Solid State, and Astrophysics. The Physics Department, as always, looks forward to new adventures in another thrill-packed year.
A New Direction-The 1984-85 Student Senate

Last year a group of people campaigned for office under the slogan “Vote for a New Direction.” It was a slogan with which we hoped to characterize our aspirations, our goals, our achievements, and our failures. We knew our success would be measured in light of the promises we made and hopes we inspired and that failure was always around the corner. But we tried to accomplish what we set out to do and to pursue this direction with a high degree of sensitivity.

Our primary goal was to increase participation by senators and students. This was accomplished. With increasing frequency, students began to turn to the Senate concerning individual and collective problems. The two topics which dominated Vector headlines, talk around campus, and the Senate’s energy were the Common Hour and micro-computer issues. Happily, both were resolved through controlled and effective student pressure, hard work, and compromise. The Common Hours were presented and a differential structure for
Other traditional means of communication have continued. In conjunction with professional societies, the Senate sponsored departmental feedback sessions providing students and faculty with a formal meeting to discuss policies, professors, the curriculum and after suggestions. Forums were also held enabling students to meet members of the administration and to debate issues.

Senate Committees have continued as an integral component of the year’s success. The Semi-formal, Constitution (which updated the Senate’s constitution) and Publicity committees were especially successful.

Though much remains to be accomplished, the 1984-85 Senate has moved in a new direction. It has been successful through the efforts of its members and you. I have been privileged to work with a talented and dedicated group of senators, officers, and work for an increasingly enthusiastic, active, and aware student body. I would like to extend thanks to those students who I have worked with, our advisor Merwin Kinkade for his help and guidance and Bob Moran, Jodie Cottrell and the rest of the Center staff. I would also like to thank the administration which has developed a close working relationship with the Senate. I sincerely hope all of you- students, faculty, staff, and the administration- will continue to seek and value our input.

Emanuel J. Psyhojos
Student Life
MINIVERSITY '84: 
Helping To Get The 
Freshmen Off To A 
Good Start

On August 29th and 30th, the 1984-85 school year began on a positive note with the 9th annual Miniversity. Led by Jodie Cottrell, Bob Moran, Merwin Kinkade, Charlene Balfour, Cris Fatjo, Lorelei Gascard, Tom Tehrani, and 39 group leaders, over 500 freshmen were warmly welcomed by faculty and fellow students.

The goals of Miniversity '84 were the following: to get to know the campus, to get involved, and simply, to have fun. This was accomplished with group sessions, mini-courses, and open activity hours.

During the group sessions, the group leaders would give tour, answer questions, and relate their experiences at NJIT. In addition, "icebreakers" learned at the Training Camp the night before were used in order to get acquainted and relaxed.

Mini-courses ranged from club to computer to sports courses. They were meant to introduce the freshmen to an organization, a major, or even a hobby in a condensed, fun hour.

During the free time freshmen mingled with faculty, staff, and other students. Activities included open physical education facilities, token-selling, book-buying, eating in the Caf, or just relaxing. The second day, however, featured a "Picnic on the Green." Soda, corn-on-the-cob, and watermelon were served. Also, an Organization Fair with 20 NJIT groups was set up under a tent. For more entertainment, folk and pop music was supplied by the Briton Sisters, and WJTB deejayed between sets. To top it off, various crazy contests were held.

All in all, everyone seemed to have a good time. On this page and the next page are comments made by some freshmen.

"Miniversity has been an excellent experience. It's been a terrific introduction to great people and a unique school."

Anthony Arizmendi

"Miniversity is a unique way of being introduced into the college world. As a freshmen, a college campus can be frightening, but Miniversity is a casual way of getting to know the campus and other people."

Danny Yapaola
Pairs of MV leaders and freshmen try to ravel the weight around the wood as Sparky plays Howard Cosell. Training for the stilt-walking contest, some competitors have a tough time learning how to walk in them. The Briton Sisters perform to a capacity crowd. A general view of the Green during the MV picnic.

A group of watermelon eaters stuff their faces. MV coordinator Charlene Balfour does the "prestigious" job of giving out hot dogs. MV coordinator Cris Fatjo hands out yearbook applications while Bonnie, Ken, and Rich figure out ways to assassinate her.

"I have found Miniversity very informative and fun so far. The leaders have told a lot but remained friendly and willing to answer questions. The group sessions before the classes helped me to meet a few people and the leaders helped us and answered all questions regardless of how dumb they seemed to us."

Susan Sherry

RESIDENT ADVISOR’S WINTER WORKSHOP

January 15-17, 1985

During January break, the Resident Hall staff spent several fun-filled snowy days at Sagamore Lodge in the Adirondack Mountains. The students attended workshops on leadership, assertiveness, conflict resolution, listening skills and coping with stress. In addition to Sagamore scheduled workshops, they were able to spend time snow-shoeing, cross-country skiing, skating and hiking.

NJIT THEATRE PRESENTS:
"JUST WHEN YOU THOUGHT IT WAS SAFE TO GO BACK INTO THE THEATRE"

November 15-18, 1984
"A Comedy Revue"

The cast of "Just When You Thought It Was Safe To Go Back Into The Theater" includes the following:

Kathi Spillane
Lorelei Gascard
Mary Caruso
Monika Kugler
Andy King
BJ Gleason
Dave Buck
Doug Witkowski
Eladio Ruiz
Fred Sirols
Manny Parada
Stuart D’Alessio
Rose Holmes
Elaine Kalinosci
Mark Maguo
Rafael Hegroh
Stan Buza
Stephan Betts
Glen Trimboli
Odarka Polanskyj
"This series of work is mostly concerned with the interrelationship of similar patterns. The bold patterns on the figure play off and contrast with those of the background. The figure itself functions as a sort of prop or compositional element and adds form to the flatness of the pictorial space. The extreme cropping tends to focus attention to the design qualities of the painting and expand the physical limits of the canvas. The patterns in general, recall the bold, colorful, and somewhat tropical designs of the 1930's. The paintings are executed in acrylic paint applied with an airbrush and other spray apparatus. This helps to achieve a more photographic sense of realism as well as keep the physical surface flat and free of brush strokes."

Robert Anderson
On "Patterns", an exhibit of paintings at the Center Gallery
September 14 - October 5, 1984
The Estrin Scholars Program grants several annual awards to students who demonstrate outstanding leadership qualities through their participation in New Jersey Institute of Technology extracurricular activities.

Named for its founder and guiding light, Professor Herman A. Estrin who began the program fifteen years ago, the Estrin Scholars are chosen for overall collegiate leadership as well as for leadership in collegiate journalism, athletics, civic and community service, professional societies, sorority/fraternity, and the theater.

We on the NUCLEUS staff would like to congratulate this year's Estrin Scholars, all whom best exemplify the positive aspects of a NJIT. They are: Manny Psyhojos - Overall Collegiate Leadership, Mark Bros and Cris Fatjo - Leadership in Collegiate Journalism, Alexandra Patras - Leadership in Athletics, Eladio Ruiz - Leadership in Civic and Community Service, Jila Ghaffari - Leadership in Professional Societies, Sharon Schmidt - Leadership in Fraternity/Sorority, Kathi Spillane - Leadership in the Theater, and Robert Hoffman - Leadership in ROTC.

(top) (left to right) Manny Psyhojos, Jila Ghaffari, Robert Hoffman, Cris Fatjo, Dr. Estrin, Sharon Schmidt, Mark Bros, Kathi Spillane, Alice Patras, Eladio Ruiz

(bottom) So happy to win the award, six out of the nine winners show off their happiness.
Clubs
K2MFF is an Ameteur Radio Club that operates in Faculty Hall. This small group sponsors trips to hamfests and the like throughout the year. Their plans for the future include expansion.

The Society for the Collegiate Advancement of Morality, formed last year, is made up of brothers from different fraternities. The purpose of this organization is to create a spirit of good will and fair play among the separate houses. The organization hopes to get members from every house to serve as a communication system between the different houses. S.C.A.M. would like to have more events sponsored between the houses such as joint fellowship events and trips. This society represents the individuals who are upstanding, moral, pillars of society.
APO—the nation's service fraternity—is located on the lower level of the Center in Room 109. The purpose of this fraternity is to provide friendship, leadership, and service to its fellow students. This year APO held a volleyball benefit, conducted Used Book Exchange, and held a Pht ceremony on May 17. On top of that, they visited the Children's Hospital in Newark to cheer up sick children during the holidays.

This year's group includes (on right) 1st row—Silverio Baptista, Amy Hemeleski, Stephen Brower, Cindy Lang, Anthony Juliano, Patricia Hemeleski, 2nd row—Greg Schomp, Nick McClary (pledge), Jack Corcoran (advisor), Mrs. and Mr. Brower (advisors), 3rd row—Stephen Stamos (past sectional chairman), Dan Rauch, Betty Rauch, Ron LaSala, B.J. Hageman (all alumni), Mr. Schomp, and Ashok (pledge).
top left- B.J., who has just received an award shows his appreciation to a fellow pledge, Nick McClary.

bottom right- Cindy Goodman, Franck Caceres, and Phyllis Minichini have fun!
SAC, the major programming organization on campus, provides social, cultural, and recreational diversions for the busy NJIT student. Composed of seven committees, SAC presents many events during the weekdays and nights and has recently expanded to provide weekend programming. The committees are mixer, trip, films, day programming, special events, publicity, and technical.

The Vector Staff consists of: Marc Bros, Anthony Marchionne, Peter J. Burke, Paul Damiano, George Caricich, Jeff Hinksmen, Walt Douglas, Kelly Bray, Matt Grubel, and faculty advisor Professor Al Lee.

Every Wednesday, The VECTOR staff gets together and puts out the school's newspaper on Friday for the news hungry students. This year, mark Bros is Editor-in-chief while Anthony Marchionne is their business manager. Anyone wishing to see or visit the Vector office may do so in the lower level of the Center in Rm 113, A or B.

HOST the Hispanic Organization of Students in Technology and formerly known as OLA, organizes Latin American students to make their years at NJIT more fulfilling by running a wide variety of socio-cultural events, open to all students. By providing these activities, HOST establishes relations with many students on this and other campuses.

H.O.S.T. (HISPANIC ORGANIZATION OF STUDENTS IN TECHNOLOGY.)
On this page is a list of those organizations not mentioned earlier in this section for various reasons:

Ambassadors Club
Association of Indian Students
Audio Club
Astronomy and Astrophysics
Barbell Club
Caribso
Chinese Students Association
Christian Fellowship
Filipino Student Association
Forensic Society
Hellenic Club
Intervarsity Christian Fellowship
Judo Club
Korean Students Association
WJTB-Radio
Scoping nijits of the opposite sex has become one of the most powerful diversions on campus. Above: Dressed in her finest, this woman pleases a gathering of students and faculty as she models. Left: Campus entertainment includes talent of all types. This entertainer marvels a large audience in the center.

Backgammon, chess, and checkers gained popularity for those students with strategic talent. Nijits can sometimes be seen carrying portable games of this type to class as well as the Pub or cafeteria.

Taking a study break can be fun, as this couple finds out at the OLA mixer. Monday afternoons were spotlighted by New York City comedians.
A nijit’s life might have included tension filled days of classes and hassles, but favorite obsessions could easily divert one’s attention from study to entertainment. No matter how much homework had to be done, there was always a few extra minutes to be found.

Laughing at the antics of Pub comedians only asked for a few hours of a nijit’s time on a Monday afternoon. And if there was time for the comedians’ humor, there was time to meet some friends at Friday night’s mixer . . . . or stop to see the new SAC movie while taking a short cut through the center . . . . or try for the high score on Star Wars in the game room . . . . or relax on the green and scope the other nijits as they rush to class . . . . or find a small corner in the library to nap through a physics exam. Who could resist scheduling classes around a favorite soap opera or television show? And who could even stop to think about homework while planning what to wear to the semi-formal?

Diversions of these kinds could be seen and tasted everywhere and the temptations to indulge were at times, impossible to resist. There wasn’t always time to have fun, to relax, or even to see friends. Of course, there might have been other things that needed to be done. There could have been a lab report to finish, a chapter to read for Humanities, or a design project to start for studio.

But we all at some point needed to divert ourselves from the daily routine of classes and we managed this by mixing two parts play with one part work.
With all the pressures a nijit becomes a slave to, an occasional break in the daily routine was sorely needed. Comedians from the Big Apple proved to be a most successful intermission from classes and study. With admission being free, rarely was a seat ever available to the newcomer on Monday afternoons in the Student Center Pub.

"It's great to see such a variety of comedy and good humor in one place!" commented a student after an impressive performance, "I come here early every Monday to eat lunch with my friends and we're always early enough to get a good table."

Two comedians share the spotlight every time. From the impressionist and his clumsy doll, to the fateful comic who relies on the embarrassment of the audience to keep the crowd screaming with laughter. "What is he going to do now?!" or "Please don't pick me!" were whispers that could be heard amongst the laughter. The comedians were always full of surprises. Some pulled out dolls, dummies, or threatening-looking masks to cheer the crowd, while others resorted to inanimate objects, members of the audience, or foul language. Even our own Nucleus photographer was abused!

From this experience, it is evident what type of humor the nijit crowd thrives on - dirty, embarrassing, silly, - but fun.
The Wid is known for his use of inanimate objects and children's toys to supplement his routine. "... We are the world, we are the children ..." A group sing-a-long always brightens the mood.

Sometimes comedians embarrassed or harassed a member of the audience. Here, he is pictured as he humiliates our Nucleus photographer. Pure comedy is presented with words alone.
Dress styles of all types fill the party room. These students are ready for a long night of social activity. From preppy combinations to sweatshirts and jeans, any style that suits the student is welcome. Liar, a popular rock group at mixers, entertains a lively crowd.

Dancing to the tunes of Liar, this girl smiles for a picture. Eladio Ruiz is found teaching his date a dance step.
There was never a better time for campus groups to socialize, dance, party, and mix under one roof. Mixer mania only occurred about once a month and SAC, who sponsors this fast growing tradition, encouraged everyone to attend.

The NJIT mixer has traditionally become a meeting place for old as well as new friends. Watching other people dance in a unique way can be just as fun as dancing with your partner or by yourself. From wild break-dancing to cheek-to-cheek, there is a style and pace that suits nearly everyone. Mixers provide an opportunity for nijits to test new dance steps or introduce their own style and talent.

As an attempt to please most, a variety of rock bands have been featured including Strutter and Liar. A special beach mixer has been introduced. BASE and OLA have also featured mixers.

Those of drinking age are permitted in the Pub to enjoy some beer or wine, while in the cafeteria munchies and soda are available.

Mixers include more than just refreshments, music and dancing. In the Pub it was not surprising to see a group of friends huddled around a table playing game after game of backgammon. Similarly, it was not unusual that drinking games such as “Quarters” sometimes spontaneously conceived, became a large part of the night’s events.

On the more sensitive side, some students found that the most fulfilling time was spent continued on page 77.
mixer mania continued
a meeting place for old and new friends

continued from page 75

during moments with the opposite sex. Easy conversation, a slow dance, or a walk on campus were always remembered with a smile.

The mixer was a diversion provided for the student . . . with good times to look forward to during those particularly difficult times.

Page 76

top left- Chris Buta dominates the dancefloor with her smooth style of dancing. bottom left- Always attracting attention to themselves at mixers are Jerry Di Taranto, Nick Cardo, and Alan Wolke. right- A popular rock group for nijits, Strutter is always a big success at mixers.

Page 77

top- Jose and his date take part in a slow dance at the OLA mixer. bottom left- To some nijits, mixers are a time to model the current trends-in fashion. bottom right- Mixers are a meeting place for old as well as new friends.
Life after studying was playfully occupied

Thank God it's Friday!, was probably the main thought on the minds of most nijits when Friday morning was upon them. Most students tried to complete their academic work as much as possible during the week so that the weekend could be spent on entertainment.

But during the week, most found it difficult to overcome the diversion's offered by the Student Center. Who could resist squeezing through the crowd to find a seat or a floor space and watch the new movie featured by SAC every week in the lounge. How many times has a Center video game made a student late to class, or if the game is going well, miss the entire class? “I've become addicted to 'Pole Positions' and it's really starting to show through my wallet!” shouted a video game junkie. Other students were happy to stay with more conventional and less expensive hobbies. The Student Center offered the most in one place - bowling, pin-ball, pool, ping-pong, an art gallery, lounges, and the Pub were only on the surface layer of what the Center had to offer.

Parties given by numerous fraternities, sororities, and other social organizations were another form of entertainment. Nijits were always busy during those long-awaited but short-lived weekends.

If one were interested in saving money, board games like Monopoly, Chess, or Trivial Pursuit were still a favorite form of entertainment. Or the T.V. sitting in the dorm room could relieve the anxiety if General Hospital is missed.
Ping Pong Championship Tournaments are held in the Student Center. The Lounge also sets the scene for mixers, meetings, and SAC movies as well. For those 21 and over, finding fun in the Center usually meant to head straight to the Pub. Both of these fellows become easily amused by our photographer's picture-taking.

Page 79
above- The Center also provides pool tables for the novice and expert. But sometimes it was difficult for the pedestrian to get by without getting poked at least once by a pool stick. bottom left- An organization's lounge area in the Center Basement serves as the perfect place to play chess. bottom right- "Where did those swines move my pool table to?!" Practical jokes at the right times become humorous diversions to spark some laughter.
Senior Pub Night served as a place to meet some old friends. Placing 4 or 5 tables together to make room for friends was always a necessity for the nijit click. Popcorn and beer were popular on Pub Night. With beer only a dollar, some nijits were determined to stay all night. The night wouldn't have been the same without the music provided by the DJ.
Continuing the recently new tradition of Senior Pub Night was high on the list of priorities for Joan Profta, the senior class president. Due to the change in the drinking age from 19 to 21, the Junior class saw their first and last Junior Pub Night last year. But on Thursday, March 14th, 1985, the senior class was determined to let their tradition continue, and it did with great success.

The Senior Pub Night, sponsored by the Pub and the senior class, was not only a night for drinking, it was also a night for dancing and enjoying the music provided by a DJ. The Pub also served everything on its daily menu and green beers were only one dollar. Students did not always have to empty their wallets in order to have a good time. With graduation not too far away, concerns toward coursework grew smaller as the need for celebration grew larger.
seniors celebrate . . . .
a tradition growing with NJIT

**top left** - A friendly wave, an example of apathy, and an unfriendly stare exhibit a variety of opinions towards photographers.

**center** - "No ID - No entrance!" has become the motto of the Pub Checker.

**bottom left** - The time has finally arrived for the clean-up crew's moment of glory.

**bottom center** - This couple enjoys the Pub's hospitality and music.

**bottom right** - The night wouldn't have been the same without the faithful DJ.

**above** - Senior Pub Night's great success was due to the spirit and good humor of the nijits involved.
Nijits know no bounds . . . .

top left- Head-bobs and reading the same page in your text 701 times before realizing it, both occur after about one solid hour of studying. top right- If a nijit isn't careful, a class might be missed while snoozing bottom- Mike takes advantage of the time between classes to “clear his mind.”

Page 85

center left- Sleeping on the job, this DJ can't wait for the partiers to GO HOME! bottom left- Most students can’t help but to sleep after reading the most recent issue of the Vector. bottom right- Catching some rays, clearing one’s mind, and getting some sleep can all be done at one time on the green.
Before the end of a nijit's first semester, head-bobs during a lecture of sleeping through class were experienced more than once. Studying always had its ups and downs, but for the most part it was down. Down as in stretched out on a lounge sofa, across a line of chairs in the library, on the green taking in the rays, or cuddled up in bed.

The grief of studying just didn’t want to mix with the discipline of college life. Eventually, the seat in a nijit’s room was filled before 10:00 PM on Sunday night. By midnight the textbooks were lost somewhere beneath all those crumpled up papers, the coffee container was dry, and the chewed up yellow outliner had reached its limit.

Studying and sleeping always seemed to battle while procrastination and ridiculous excuses for not studying always resulted. After all, “relaxing was an important means of clearing the weary mind and preparing the student for their next homework assignment. All across campus nijits could always be seen “clearing their minds,” in an effort to be ready for their next class - if it is not missed, accidentally of coarse.
SAM is the professional society that deals with students interested in Management. It is composed of students whose majors are Industrial Engineering, Manufacturing Technology, and Industrial Administration. It is one of the fastest growing professional societies on campus.
The Institute of Electrical and Electronic Engineers is a professional society that helps disseminate information about various areas in Electrical Engineering, while at the same time providing a link between the academic and industrial areas of engineering.

The IEEE accomplishes this by having many lectures and publications available to anyone. The activities sponsored by the IEEE include sales of 410 kits, feedback sessions, and project forums.
Besides being the oldest society at NJIT, the student chapter of the American Society of Civil Engineers tries to supply the bridge between academic experience and the real world of civil engineering practice. ASCE accomplished this by sponsoring thought provoking meetings, films and field trips. Leadership, pride and responsibilities are also developed through these activities. Active membership in ASCE is very important to the civil engineering student who wishes to become not only educated but a well informed professional. The group's major event is the Concrete Canoe Race.

Treasurer: Max Piazza
Advisor: Dr. Methi Wacharatana
Secretary: Andrea Cancalosi
The Society of Women Engineers is a relatively new society at New Jersey Institute of Technology. SWE is a professional society for women scientists and engineers. An annual Student Night is held at the United Engineering Building in New York City, SWE headquarters, where coeds have an opportunity to speak with professional women engineers. The society's achievements include a trip to the Third International Conference for Women Scientists and Engineers in Italy, where they presented a paper on behalf of the New York SWE.

President: Dana Y. Filipowicz
Vice-President: David Kropazek
Tresurer: John Nikas
Student Advisor: Mike Kooman

The ANS student chapter exists to make NJIT students aware of our nuclear engineering program, which is the only one in New Jersey. It is also to inform the public about nuclear power, and to provide a social and professional center for nuclear engineering students. Various plant trips, speakers, and films keep these meetings from ever being boring. This year the ANS participated in the New Jersey Engineers Committee for Student Guidance, an ANS Student Conference in Florida, and a national conference in Washington DC.

President: Dana Y. Filipowicz
Vice-President: David Kropazek
Tresurer: John Nikas
Student Advisor: Mike Kooman
The Association of Computing Machinery is a professional society dedicated to the development of information processing as a discipline. The purpose of ACM is to promote an increased knowledge of the science, design and development, construction, languages and applications of modern computing facilities. We wish to promote a greater interest in computing and its applications as well as providing a means of communication between persons having an interest in computing. Membership in the NCE chapter is open to any student majoring in Computer Information Science or in any of the other engineering disciplines. ACM sponsors "feedback" meetings so that students can voice their opinions concerning computer science courses. Many interesting films of both a technical and nontechnical nature are shown at various meetings. ACM sponsored guest lecturers speak on various topics of current interest.

President: Carl Radom

The American Society of Mechanical Engineers is one of the older and more established societies. The purpose of the Society is to advance the profession of mechanical engineering. Members are active at all levels of business, industry, education, and government. Members can purchase special publications and technical papers published by the Society. Over $2000 in cash awards are presented to members each year in the form of various contests. Many members find that participation in ASME activities as a student member eases themselves into an active path in their life's pursuit.

aiche

The American Institute of Chemical Engineers strives to expose students to various aspects of the chemical industry. They do this by sponsoring several plant trips during the year. The society also tries to introduce the students to the aspects of the chemical industry. Furthermore the AIChE provides a means of communication between students and the professors. The group's 140+ members' regular activities include meetings, feedback sessions, and the Tiernan Express.

President: Myron Petruch
Vice-President: Walter Dawydiak
Secretary: Gail Graczyk
Treasurer: Andrew Dundorf
As a society the Student Society of Construction and Contractors coordinates the activities of the Building Contractors Association of New Jersey, the Associated General Contractors of America, and the students of the Construction Engineering curriculum at NJIT. The society also wishes to give the students an insight of the construction industry and to acquaint contractors with the construction engineering students.

President: Peter Grant  
Vice-President: Wesley Swope  
Treasurer: Frank Polera  
Secretary: Mike Majorczak

Page 95: top left- Architecture studio becomes a home away from home. bottom left- Cindy and Nick share common interests as SPO members. bottom right- the nijit scene encompasses many activities from mixers, to jogging across campus.
"What's a NiJIT?"

What constitutes being a NiJIT is something that can only be understood with a look from campus—an exploration of

THE NIJIT SCENE

...ven with all the variety of personalities found on campus, some things always remained the same.

All nijits were exposed to similar surroundings that classes, the campus, and special events had to offer. This exclusive campus environment influenced, without notice, a new student's behaviors and attitudes to fit the mold of the nijit.

A walk around campus proved that New Jersey Institute of Technology was a montage of a unique blend of faces, personalities, and trends. This view is the nijit scene.

Nijits are truly a unique people. With the help from an influence created by the nijit scene, they become capable of things beyond what high school may have taught them. One of these practices being careful contemplation when times of serious study are called for.

The nijit scene has also had an effect on a student's vulnerability to expose hidden talents that lie beneath the surface. Whether these talents be serious or playful, some individuals dared to be different.

A student's involvement in Greeks, clubs, mixers, or other organizations sparked growing interests common to many nijits. These alternative interests all found their way into the already cramped schedules of many students, nevertheless, the nijit scene promotes the growth of special interests.

Communication on the nijit scene took many forms. Self-expression through body language spoke for a nijit during hurried times between classes, or intimate times with a friend.

The next 12 pages will explore these aspects of the nijit scene to help better answer the question, "What's a NiJIT?"
After procrastination has reached its limit, it’s time to prepare for fast brainstorming, the inevitable all-nighter, a large caffeine intake, and CAREFUL CONTEMPLATION.

All-nighters. They happen to the most organized of us, and “all night long” doesn’t refer to the Lionel Ritchie song which states “once you get started you can’t slow down.” Unfortunately, the nijit version of “all night long” is not capable of generating enthusiasm.

The nijit all-nighter is sometimes an inevitable experience when one is forced to stay up all night to meet a deadline . . . or even an extension of a deadline. They are a race with the clock and fatigue - it is a time of careful contemplation without speed-reading the same paragraph a dozen times.

“I swear I’ll never let myself get behind again, Never . . .”

How many times did we say it or hear it?
Though we all began each semester with good intentions, the end was always the same. Somehow with a week left before finals, we always managed to be at least 500 pages behind in our reading. It was a simple fact of life and it almost seemed unavoidable, no matter how hard you tried. Each
High on top of the architecture student's list of priorities was their studio class - usually. Nijits who chose to participate in fraternities or sororities spend some time on study as well. Here, Ed studies his pledge manual for an upcoming fraternity quiz. During finals week, it becomes difficult to find a place to study. The first place to look and the first place to fill up is the Library. Private study rooms in the Library offer a group of students a chance to study together without disturbing others. Although most architecture courses do not offer final exams, the final design project is required.
For those who can concentrate over the music and conversation, the Pub can be a place to study and snack between classes. Lectures, field trips, sketching, and constructing scale models occupy an architect's time more than studying for exams.

Meeting friends in the library always has its good intentions, but somehow the discussions are always focused on the past week's events and upcoming events. A popular place to study between classes is the Center Lounge. Here, Anne Carillo is often seen creating her own study space and socializing with friends. Although at times crowded, the library does have its moments of peaceful solitude.
continued from page 96

semester books go unopened
and papers are not written until
the night before they're due.

And it wasn't only you - it was
almost everyone, all nijits alike. By
the time we became seniors, we
simply learned to accept the fact:
College was just four years of being
behind and struggling to catch up.

Yet, the cause of this was
procrastination and a conflict of
interests. Nijits have to decide when
to participate in extra-curricular
activities and when to spend time
studying.

Whatever decision is made, it will
have a large influence over the grade
point average.
Casino Night at Alpha Phi Delta gave students a chance to show-off their gambling strategies and card-handling talents. Some NiJITs love to build, whether the materials be wood, paper, or Tinker Toys. The Green is the NiJIT playground. Frisbee games and contests are a common sight during the spring.

Breakdancing was a hidden talent uncovered at the OLA mixer. Musical productions gave Andy King and Glen Timboli the chance to meet other people and discover their hidden talents.
There is more to learn at college besides the education assured by tuition. Self-taught leisure activities were learned with the help of discovering

**HIDDEN TALENTS**

The campus atmosphere had its own way of penetrating a student's shell and bringing out the best of them. Whether it be through a mixer, a campus play, a night in the Pub, a sporting event, NJIT students were given a chance to be themselves, enjoy themselves, and discover abilities tuition can't teach them. Completing a lab, tackling a Calculus problem or de-bugging a computer program might increase our intelligence, but does nothing for our character. The NiJIT scene enables us to focus on ourselves and uncover our special talents every NiJIT holds.
While good grades and studying may have seemed essential, the desire to become involved developed into GROWING INTERESTS.

There's more to college life than meets the calculator. Although students concentrated on their classes and studies, there was more. Somehow, Greek organizations, residence hall activities, religious groups, and special interest clubs all found their way into the already cramped schedule of many students.

The variety of activities and organizations were not known to everyone, but programs such as Miniversity Club Day and Octobertech gave students a chance to acquaint themselves with various organizations — Greeks, Christian Fellowship, The Nucleus, WJTB, The Vector, SAC, The Outing Club, APO, OLA, and The NiJIT Ambassadors were all high on the list of favorites.

One of these groups was SAC, Student Activities Council, which kept students busy with movies in the Center Lounge, comedians in the Pub, mixers on Friday nights, and trips to Atlantic City. Many SAC activities added some spark to what would have otherwise been a boring weekend of homework.

Then there were students with special skills and interests leaning toward helping others; such as the Student Peer Counselors, Residence Hall Assistants, and the Student Senate.

It seemed that all types of student interests were covered, including sports, hobbies, departmental majors, politics, and different cultures. For most of these groups, all that was needed to receive membership was just a show of interest in the organization.

While college may have seemed as an essential, most NiJITs' interests grew along the way, no matter what name it had.
The NiJIT Scene

Whether it be serious or playful, actions can sometimes speak louder than words when listening to BODY LANGUAGE

Communications was a key part of NiJIT life. Whether we’re talking to friends, lovers, parents, or professors, students use words and actions to convey their thoughts and feelings. Many times, students communicated a message they were not even aware of and the old adage, “actions speak louder than words” held true.

How NiJITS walked, talked, partied, danced, dressed, and played all offered clues to a sometimes hidden aspect of their personalities. This concept was called body language. These pages depict these unspoken methods of individual expression.

How students spent their free time was yet another clue to their personalities. Watching television constantly, playing football, reading fiction novels, or always playing Dungeons and Dragons were clues to the hidden character.

The answer to the question, “How are you” could often be found in observing the whole person; their actions, words, and appearance. So watch and be conscious of the language without words — body language.
The NiJIT Scene

PORTRAITS

What's a NiJit? To outsiders a niJit
sounds like a new kind of candy or a
dance done in the 50's. But anyone who spent four
years—or even one—at New
Jersey Institute of Technology
knew that NiJits were people—
all sorts of people.

NiJits ran track, played
basketball, and threw frisbees. A
NiJit was a frat brother or a
sorority sister, an artist,
architect, or engineer. A NiJit
was from New Jersey or from a
foreign country. NiJits didn't
come from anywhere else.

NiJits soaked up rays on The
Green, drank beer at The Pub,
danced at mixers, and listened
to bands at the Student/Faculty
Picnic.

NiJits met other NiJits at
McGovern's, the Library, and
the Student Center. NiJits wrote
"hum" papers, played kazooos,
and partied at the frats.

NiJits studied calc, quantum
mechanics, architectural history,
and CIS.

NiJits listen to WJTB, Z100,
and WPLJ.

NiJits eat California Burgers,
greasy fries, butcher block
sandwiches, and Chicken
McNiJits.

NiJits played Trivial Pursuit,
Walkmans, and Star Wars.

NiJits were everyone and
everywhere at New Jersey
Institute of Technology.

formed a montage of
An outsider may view NJIT from a distance or an unfocused perspective. Because of this distance, the outsider may have an unclear image of what NJIT is and what a nijit is. We have taken a different view of the nijit by focusing from campus and exploring the nijit scene.

"Hanging out at the Center." The Student Center provides a haven for nijits to relax and have fun.

Besides a place to study, the Library also serves as a backdrop to a meeting place for friends.

Nijits are known to help each other when times are rough, whether it be struggling through 50 ME problems or writing an essay for HUM 112.

Sharing good times together is a way to balance the hours of tedious homework. Meeting in the Pub has become a common activity for nijits. Architecture studio class has a reputation for soaking up a student's free time—just like a sponge soaks up water.

Alpha Phi Delta, a national fraternity, whose purpose is the cultural enhancement and general inebriation of its members, was founded in 1913 as the National Italian Heritage Fraternity. APD is active in all IFC sports, and faired especially well during this year’s basketball season. Other highlights were their roadtrips to fellow chapters at Ohio St. and Glassboro, as well as their house in Wildwood NJ this summer for their national convention.

PHI
LAMBDASIGMA
Pi Kappa Phi Fraternity has long been recognized as one of the largest and most active fraternities on campus. With an active brotherhood of 40 men, “Pi Kapp” is involved in many activities such as: intramural sports, intercollegiate sports, yearbook, radio station, student senate and many more. Pi Kapp is known for its parties and its large dance floor, but it is also responsible for a national charity (P.U.S.H.) that supplies play units for handicapped children. Throughout its history, Pi Kappa Phi has contributed a great deal to the N.J.I.T. community and hopes to contribute more in the future.
Since its founding here in Newark back in February of 1938, Sigma Pi has been a leading organization at New Jersey Institute of Technology. This year proved to be no exception.

With the New Jersey State legislation recently passed, raising the drinking age to twenty-one, changes had to be made in the fraternal system. What this law meant was that the majority of freshmen, sophomores and juniors here at NJIT were under age, and could not legally drink. Sigma Pi, recognizing that fact, steeped onto new ground, adopting a policy of dry rush. Dry rush means no alcohol would be served at our rush functions. We were the first house on campus to adopt such a policy, and to this day, are the only house retaining this policy.

The administration of NJIT wholeheartedly accepted our position, proclaiming Sigma Pi to be at the top of the fraternal organization here at school.

As always, Sigma Pi overly contributed service to the Alumni Association and the Newman Center this past year, and will continue to do so for years to come. The 84-85 school year has been a pioneering one for the brothers of the Alpha Mu Chapter of Sigma Pi Fraternity International, and we are optimistically looking forward to our future academic and social advances here at New Jersey Institute of Technology.

After Traveling To Central Pennsylvania On A Visit To Jostens Printing And Publishing, The Nucleus Staff Introduced An Annual Yearbook Staff Tradition

When the decision was made to visit Jostens - the yearbook publishing company, none of us really expected the personalized welcoming sign waiting for us in the lobby, or the sneak preview of Nucleus color pages, or the impressive advanced technology such as the laser scanners and computer typesetting, or the Jostens artist ready to help us plan and design our 1985 theme - "What's a Nijit?"

It was this personal service and a very interesting tour that served as an incentive to begin an annual tradition for the Nucleus staff.

The tour began with an exploration of the Jostens yearbook library. Cris Fatjo searched through about 101 yearbooks for new graphic ideas while Kenny Ng examined a photography exhibit and Nick Ladimirak found a copy of his high school's current yearbook. An informative tour of the plant interrupted the library exploration. Our staff was able to witness every step a single page must pass before it is completed. From copysetting to folding the pages and binding the book, the tour proved to be as interesting as it was informative.

Our trip to the Jostens publishing plant became a unique way for each year's Nucleus staff to officially begin planning the blueprints for the upcoming year's book.

-W-
STATE COLLEGE, Pennsylvania, above, was a five hour destination for the Nucleus staff. Trained consultants at the plant were ready to answer questions, conduct a tour, and assist with the technical planning of the yearbook for the upcoming year.

COMPUTER TYPESETTING, (left), provides speed, accuracy, and a wide range of typefaces to choose from. Every word, headline, and caption of the Nucleus has been processed through these computer terminals at the plant.
OLD MAIN, made a lasting impression on visitors to the University Park campus. Beyond Old Main's expansive colonade and arched doorways are frescoes and objects that tell the story of Penn State. The stately belltower serves as an official timekeeper of University Park as its quarterly chimes are heard.

THE NITTANY LION has become synonymous with Penn State. Nucleus NiJIT's refused to leave University Park without a photo taken on the Nittany Lion Shrine. Below are Nick, Dave, Cris, Ken, and Bonny Levine.
After A Tour Of Jostens Printing And Publishing, The Nucleus NiJITs Visited A Nationally Acclaimed La Vie Staff At Penn State University

VISITING the University Park campus of Penn State University and their La Vie (yearbook) office was high on the list of priorities for the Nucleus staff while they were in State College, Pennsylvania visiting Jostens. The Nucleus staff was able to meet with the Editor-in-Shief, and Business Manager, from La Vie in hopes of learning a few tips that will help the Nucleus improve.

The La Vie office was not nearly impressive as the book. The small room was a maze of desks cluttered with photos, memoes, and layout equipment; the walls were plastered with bulletin boards covered with information, messages, and reminders; the floor was cluttered with storage boxes; and towering over all this chaos were stacks of La Vies. Surprisingly, a yearbook ranked as third best in the nation has been produced from all this confusion and clutter of the tiny office.

After interrogating the LaVie editors, the staff was treated to a tour of the Penn State campus from Bonnie Levine, the Nucleus Jostens Rep. and a proud Penn State alumni.

THE OBELISK is a landmark on the West Mall and is constructed from every type of stone Pennsylvania holds. The legend of the obelisk states that if a virgin walks by it, the obelisk will crumble!

CAMPUS CRITTERS such as squirrels are well fed on the University Park campus. They can be seen daily pleasing animal lovers by eating from their hands or crawling up a leg or arm for a peanut.

- eager anticipation from year to year -

The staff fed the friendly squirrels of University Park, ate grilled stickies from Ye Olde College Diner, walked past the obelisk without it crumbling, tasted the creamery’s homemade ice cream, and managed to gain about 50 pounds.
It's time for my nap!

Alpha Pi Mu is the National Industrial Engineering Honor Society. For membership in the NCE chapter of Alpha Pi Mu, junior or senior industrial engineering standing, at least 40 NJIT credits, a cumulative GPA of 3.0 or better and desirable personality attributes are required.

bottom row (left to right)- Ed DuBeau, Margaret Albar, Martin Cilwik, Marisol Hidalgo top row- Jim Schenk, Greg Leonard, Ed Karski, Steve Rapp, Hossein Goodarz
The Arnold Air Society is an honorary society connected with the Aerospace Studies Program. A commission as a second lieutenant in the United States Air Force is available to any student who completes the Aerospace studies option through the Air Force ROTC program on campus.

Uniforms are never out of style at NJIT!
Chi Epsilon, the National Civil Engineering Honor Society, is a strong, thriving honor society at NJIT. Its present members have each completed an eight hour pledge project and have shown outstanding academic progress. Although Chi Epsilon is not funded by anyone except its own members, it still sponsors an Awards Banquet, an induction celebration and a Civil Engineering faculty/student get together each year. Membership in Chi Epsilon is a reward for hard work and an opportunity to do something for NJIT.
Eta Kappa Nu is the National Electrical Engineering Honor Society. The NJIT chapter, Gamma Kappa, is open to all qualified junior and senior electrical engineering students. To quote the Society's Preamble, one of the goals of Eta Kappa Nu is to bring together those electrical engineers who "have manifested a deep interest and marked ability in their chosen life work" and "... to mark in an outstanding manner those who have conferred honor on their Alma Maters by distinguished scholarship, activities, leadership and exemplary character and to aid these students through association with alumni."

Following this ideal, Eta Kappa Nu provides free tutoring and professional counselling. The Gamma Kappa chapter also provides planned trips to companies such as IBM, Bell Laboratories, Bendix and Hewlett Packard to enhance the members' educational background.

Strano, John Rucki, John Volpe, Dr. Sohn, Nicholas Greenolky, John Kiss, Joseph Zolik, Anthony Menezes, John Hosty, Anthony Kwan, Mark Barron, Colin Dino, Benedict Zoe, Steven Heinsus, Gowton Achaibah, Nohbert Yankielun, Terrence Jackson, John Chan, Adrienne Zoe
Jenny Stark, 1983-84 President, presents this year's Outstanding Sophomore award to Minh DoVan.

Omicron Delta Kappa, the National Leadership Honor Society at NJIT, recognizes outstanding juniors and seniors in the areas of scholarship, athletics, speech and the mass media, the arts and social and/or cultural organizations and events. To become a member of the NJIT circle, one must be in the top 35% of his class and be outstanding in at least one of the above categories.

Although ODK has not had one of their most active years, they nevertheless were able to get various events off the ground. These included two inductions, a Christmas toy drive, the President's Luncheon, and the graduation tailgate party.
Pi Tau Sigma, the National Mechanical Engineering Honor Society, was founded in 1915 to foster the high ideals of the engineering profession, to promote the mutual professional welfare of its members, and to develop in students of mechanical engineering the attributes needed for effective leadership and the assumption of the responsibilities of a citizen in a democracy.

NJIT's Tau Theta chapter has made dynamic improvements in the past. Such improvements include tutoring for all junior and senior mechanical engineering students, representing NJIT at the National Convention of Pi Tau Sigma and sponsoring an Outstanding Senior Award.
The Tau Beta Pi National Engineering Honor Society was established in 1885 by Dr. Edward H. Williams Jr. expressly for engineering students. The main aim of TBP is "to mark in a fitting manner those who have conferred honor upon their Alma Mater by distinguished scholarship and exemplary character as undergraduates in engineering, or by their attainments as alumni in the field of engineering, and to foster a spirit of liberal culture in engineering colleges."

Apart from holding smokers, initiating new members and holding its yearly chapter banquet, the chapter also participates in social activities which serve the community. Visits to hospitals, rebuilding playgrounds and assisting handicap camps are some of the social services provided by the chapter.
HONOR SOCIETIES IN ACTION

Not only is a NiJIT adept in Physics and Computers, but a few of them are in great shape due to the Physical Education program offered here. The program’s objective is to get students involved in a sport that suits them. There is instruction, intramural and intercollegiate competition, sports clubs, and open recreation. Not only limited to the campus, the Phys. Ed. department makes use of area facilities to provide even better activities for the students such as skiing and golf to name a few.

Overall record: 4-2
This year's cheerleading squad consists of eight members, two of which are men, Dave Seckinger and Tom Pitt. Because of erratic schedules of some of the squad's members, the squad has learned to modify routines at a moment's notice, which is not easy to do. Also, due to the uniforms that they wore, they were often mistaken for the rival's cheerleaders! Now who could confuse us with them?? On a lighter side, Dave made his debut as a cheerleader this year and he now knows what it's like after the first game!!! This year's captain was Alice Patras, a junior who, like the whole squad (except Dave), hopes to return in top form next year.
WOMEN'S VOLLEYBALL

Dave's women's volleyball team ended its third season with a 10-5 and a 5-1 conference record, which is not at all shabby for a technical school. The Lady Highlanders came in second in the Women's Independent Athletic Conference. This year's team is very young (only three seniors), and with two underclassmen on the All-League team, next year looks very promising. This year's MVP went to senior Becky Miranda, who is also a captain of the team. NJIT did extremely well in their conference matches. There is a total of 11 women on the team and they will hopefully return next year for an unbeatable season.

MEN'S
SOCCER

A very young team has bred its way into the NJIT sports scene in the field of soccer. They may not have had a winning season, but this may be partly because of the many injuries they have sustained throughout the season. Their record for this season is 5-8-3 with a major win over Steven's Tech. One member of this team did make the All-State - Jose Rego. Should he return and bring along other team members who contributed much to this season, Head Coach Efrain Borja feels that the depth that might have been lacking will return and make next year victorious.
The Sons of Efrain Armen Bedrossian, Richard Hoot, Fred Mowczan, Rocco Orlando, Jose Rego, Johnny Bastidas, Robert Paulius, Hani Shouga, Jorge Toscano, Brian Cook, James Beterbaum, Angel Morales, Sam Armojos, Enzo Caruso, Peter Parelli, Vas Vassili, Ed Gbanite, Ricky DePrizio, Peter Aikens, Rick Acuna, Enrique Ortiz.

1985 was a breakthrough for collegiate bowling. For the first time, the Eastern Intercollegiate Bowling Conference (EIBC) was given prominent coverage in the New York papers.

NJIT bowlers travelled over 2500 miles to compete against the best in the country. When it was all over, NJIT brought home numerous awards: Frank Greco earned MVP honors for Outstanding Tournament Achievement, Laurie Werner won her first and second individual titles, George Caricich won high game awards in two tournaments, Captain Bill Soltmann shot the team high series for the year - 700, Ken Yokobosky took high-average with 203. Indeed, 1985 was Pete Montllor's finest team in his three years as a head coach.
This page

The NJIT Basketball team finished one of its best seasons ever with a record of 22-7. Under the direction of Coach Jim Catalano the proud Highlanders were champions of the Independent Athletic Conference, and the East Coast Athletic Conference Metro NY-NJ Tournament. They were even nationally ranked in the top 20 for three weeks.

There were many highlights to this outstanding team. Included in these were Jim Catalano’s 100th victory against Rutgers-Newark, Tom Gallagher becoming NJIT’s all-time leading scorer with 1638 points (breaking Bob Zanzalari’s 1224 point record against NY Poly), and Sal Gagliardo scoring his 1000th point against Norwich. In tournament play, the Highlanders were champions of the Vassar Brewers Tournament. Tom Gallagher and Sal Gagliardo made the All-Tournament team with Tom taking the MVP honor. Also, the team came in second in the Upsala Yule Cup Classic by losing to Upsala, where Tom and Sal again made the All-Tournament team.

The biggest thrill of the year came when NJIT won the ECAC championship. It was a rocky road to the top beginning with the IAC Championship tiebreaker game against Stevens Tech. That was the last easy win for the Highlanders. That game was followed by Jersey City State’s 69-64 last minute win, Lehman’s 57-55 victory by a Warren Rogers’ jumper at :01, and King’s Point 70-68 overtime thriller saved by Tom Gallagher’s 40-foot jumper at :06 and Sal Gagliardo’s steal at :03.

Following the season, the team received many honors. The entire starting lineup made 1st and 2nd All-IAC, senior Tom Gallagher, senior Sal Gagliardo, and sophomore Warren Rogers on 1st team, and junior Ken Chance and sophomore Gus Drosos on 2nd team. Tom Gallagher, in addition to his 3rd IAC and NJIT MVP (NJIT’s 4th straight IAC MVP) also made the All-State and All-Metro teams and was 2nd team on All-East. Finally, Tom Gallagher and Sal Gagliardo were among the New Jersey All Stars for all divisions of basketball.

Nationally, NJIT was 5th in field goal percentage, 13th in scoring, and 7th in scoring margin (all Division 3). In addition, Sal Gagliardo was 4th in individual field goal percentage; Ken Chance, 17th. Tom Gallagher was 40th in scoring and in the top 15 in freethrow percentage.
**bottom row (left to right)**- Gus Drosos, Sal Gagliardo (tri-captain), Paul Martinez, Matt Reinl, Mike Ryan (tri-captain), Steve Sofman (scorekeeper), Asst. Coach Bob Leblein, Asst. Coach Rich Corsetto

IAC Conference record: 8-1
Overall record: 22-7
top left- Team cheers play during IAC championship game. top right- "No kidding Mike, you're not on the bench." Tom tries to convince Mike to get off the Gatorade.

middle left- Norman McGee rises above the crowd, while showing perfect shooting form.

middle right- Gus Drosos effortlessly shoots over a hapless Stevens Tech defender.

bottom left- Warren Rogers goes up for a close shot while Gus, Tom, and Sal watch.

bottom center- Sal gets inside position while Mike gets ready for the long rebound.

bottom right- Gus about to muscle a three-point play.
Under Coach Joe Hannabach, New Jersey Tech completed its finest season ever with a record of 14-3-1, winning the tough Garden Division of the Metropolitan Collegiate Hockey Association. Because of paperwork not being processed on time, the Hockey Highlanders were denied a chance to compete in playoffs. Only two players will not be returning next year, both goalies. They are seniors Lou Obssuth who won the MPV award and Myron Jaremko.

Highlights of the season were the 2.64 goals per game average for Lou Obssuth and dynamic scoring by sophomore Al Sargentelli (43 points) and freshman Darrow Hanesian. Among the defeated foes were power houses such as Fordham, Marist, Pace, William Paterson, Kean, Maritime, Morris, Columbia, Rutgers and Wagner.
bottom row (left to right) - Myron Jaremko, Mark Riscuto, Alan Ryan, Pierre Levesque, Jerry Di Santos, Peter Parelli, Lou Obsuth

top row - Coach Joe Hannabach, Gary O'Connor, Russ Nicloski, Darrow Hanesian, Al Sargenti, Lars Swanson, Joe Kraszewski, Kyle Winslow.

NJIT ICE HOCKEY:
Metropolitan Collegiate Hockey Association
Garden Division Champions!!
top left- "Who me? You're taking MY picture?"

top right- Another fight for the puck.

middle- Goalie Lou Obsuth stares in disbelief at one of the few goals he's given up.

bottom- When in doubt throw your stick!!

Opposite page

top left- Some of the bench rooting for their team.

top right- Converging to one puck.

middle left- An exciting fight on the other side of the rink stops the game.

middle right- Racing towards the goal.

bottom left- With the puck going under the wall, players from both teams look for it.

bottom right- A NJIT player is the leader of the pack.
RIFLE TEAM

Under the direction of Coach Robert Ketzner, the Rifle team competed in the Mid-Atlantic and Metropolitan Rifle Conference and concluded a successful season with a record of 11-7. Team captain Pat Higgins, a senior, was Most Valuable Player totaling a mark of 512.50 for the season behind sophomores Frank Linkowsky (532.60) and John Silva (528.83). Among NJIT's victims were Princeton Rider, Seton Hall and NYSMC.

Top- Some members of the Rifle team. Middle- MVP Pat Higgins shoots his "favorite" target. Bottom left- Bored with shooting, Donna and Sheila check out the sights. Bottom center- Disgusted with her Chemistry class, Sheila Sullivan shoots her professor. Bottom right- Adjusting a rifle.
The members of the 1984-85 Fencing team are Ron Heisler, Daniel Rodriguez, An Peter Lee, Mike Audin, David Cruz, Ernest DeRosa, Paul Laman, Richard Maraschi, Frank Wadas.

Most Valuable Player Ron Heisler, and senior Danny Rodriguez finished four-year varsity careers for the Highlanders, the third-place team in the North Atlantic Fencing Championships. First year award winner Ernie DeRosa placed 30th in the NCAA National Championships. David Cruz and Frank Wadas were medal winners in the North Atlantic Championships.

The team dual meet record was 1-6 under Coaches Robert Lynch and Paul Hauser, but the freshman dominated squad improved over the season. Next year means nothing but more improvement as six of the nine team members return.
MEN'S VOLLEYBALL

NJIT's men's Volleyball team enjoyed another fine season posting a 13-5 record under Coaches Oleg Moissenko and Dave De Nure. The team advanced once again into the Eastern Collegiate Volleyball League, for the 13th straight season. Team Captain Joe Pniewski was voted Most Valuable Player and was honored as a member of the prestigious ECVL All-Star Team. Victories came over Merchant Marine, Yale, Pitt, Navy, Columbia, Penn, Cornell, West Point, and Drexel. The future of the team is very promising as all but two members (Joe Pniewski and Bill Kovar) return.
The members of the 1984-85 men's volleyball team are Joseph Pniewski, Myron Petruch, Ted Laarkamp, Tom Rogers, Vassilis Vassiliadis, Bill Kovar, Jim Livolsi, Chris Mose, Chris Oliver, and Walter Szynalski.

The members of the 1984-85 men's volleyball team are Joseph Pniewski, Myron Petruch, Ted Laarkamp, Tom Rogers, Vassilis Vassiliadis, Bill Kovar, Jim Livolsi, Chris Mose, Chris Oliver, and Walter Szynalski.

Under the direction of Coach Gene Schmid the Highlanders finished the regular season with a record of 15-15, but the Baseball team clinched its 8th Independent Athletic Conference in the past 11 years. Thurman Van Riper was selected by his teammates as Most Valuable Player, batting .325 with four home runs and 20 RBI’s. Serving as tri-captains were Steve Sofman, Jim Mavrakes, and Frank Testa. Testa wound up with a career 102 RBI, tying him for the career RBI record and this year set a season record 10 doubles. Freshman Top Spadafino set a season mark with 26 stolen bases in 28 attempts.
In a troubled inning, coach Gene Schmid comes out of the dugout to discuss strategy. SAAAFE!!

Run for your life!!!

BOOM, there it goes!!

Steve Sofman runs for the ball.

An ever-friendly Steve Sofman socializes with his opponent on first base. Ace Frank Testa.

Waiting for the pitch.

MEN'S TENNIS

Team Most Valuable Player Dean Gaffney, a first-year player, posted an 8-1 record to pace NJIT to a 5-5-1 record, its best finish in three seasons, Coach Stewart Cohen's crew almost clinched the Independent Athletic Conference Championship, but lost to Stevens in a very close match. Senior Anton Pecha was 6-3 at first singles. Hopes are high for next year's team as seven of nine players return and with a little more work, the Men's Tennis team should improve.
The members of the 1984-84 Men's Tennis team are Anton Pecha, Sanjay Patel, Mark Agnello, Phil Baboulis, Dean Gaffney, Ted Gjini, Kevin O'Keefe, Robert Paulius, and Asutosh Shah.

Despite a “less than good record” of 0-6, the NJIT Golf Team showed “future potential” according to Coach Pete Montllor.

Kevin Osetec of Wood-ridge took MVP honors for the second consecutive year. Osetec consistently shot in the 80’s during the season. Other standouts include Ed MacDonald, George Ancuta, and John Liskowicz, all of whom will be returning next year.

The members of the 1985 Women's Softball team are the following: Ilean Wong, Marilyn Dawson, Debbie Richardson, Becky Miranda, Michele Freeland, Gayle Berkery, Andrea Cancalosi, Linda Fortier, Lisa Hillard, Joanne Pepe, Patty Yackovich, Carol Kaiser, Laura Russo, Lisa Nunn, Karen Hemeleski, Donna Mallory.

Second year player Andrea Cancalosi won her first Most Valuable Player award, batting .438. She was one of seven players batting over .300 with Gayle Berkery at .388 and Carol Kaiser .333.

Under the direction of Dave DeNure, the Lady Highlanders record was 0-6, their third straight season without a win (although there were some close defeats). Nevertheless, the team is looking forward to becoming full time members of the Women's Independent Athletic Conference, having a more expanded schedule and returning all but two players.

The Intramural Sports Program is designed so that every interested student, faculty, or staff member can participate. Students can organize almost any sport into an intramural program. In the past, teams were formed in badminton, basketball, flag football, floor hockey, golf, jogging, innertube water polo, paddleball, sailing, soccer, swimming, tennis, track and field, volleyball, softball, and wrestling. More info is available at the Intramural Office located in the Entwisle Gymnasium.
Intramural Champions

Flag Football - The Freddies
Floor Hockey - R.I.P.

Indoor Soccer - Open League - U.N.
Restricted League - Rebels
Basketball - Sudden Impact
Volleyball - C.S.A
Bunny Hop - Men's Division - David Ferrer
Women's Division - Eileen Larney
Paddleball - Solomon Rosenstark
Tennis - Craig Bender
Wrestling - Weight Division Winner
130  Graig Gaspusi
137  Anthony Stefanelly
147  Ken Bosco
167  Thomas Piloto
187  Jeffrey De Ore
197  Kevin Kennedy
200+ Marek Karski
SPORTS AWARD DINNER

The 1985 Sports Awards Dinner was held at the Wayne Manor on Friday, May 17, 1985. Emceed by Tom Gallagher, 1984’s Senior Athlete, the evening provided a chance to honor all NJIT’s intercollegiate teams, coaches, and most of all, athletes.

At press time, only one picture was available from the banquet (a picture we were lucky to get!!) so we have decided to feature some of the MVP’s. The NUCLEUS, however, congratulates ALL athletes and wishes the NJIT Highlanders (or Lasers or Red Devils, whatever will be our nickname next year) the best of luck for the upcoming season.
Award Winners

ALL-IAC
Cross-Country- Mike Drake
   Doug Lischick
Basketball- Gus Drosos

bottom left- The basketball team, IAC Champions for the third time in four years and ECAC Champions.

bottom right- The Volleyball team, in their ECVL Playoffs for the 13th straight year.
Underclassmen
The 1984 freshmen class was welcomed at NJIT on August 30th during Miniversity. Feeling of nervousness and confusion was apparent. Many freshmen seemed lonely as they tried to find their way around the campus.

For many, this is the first time on their own. They are now responsible for all their actions. Their parents won't be around to make sure they attend all the classes. Getting accustomed to college life is not altogether that easy. Being a freshmen is both an exciting and a terrifying experience.

All freshmen majoring in Engineering basically take similar courses, such as Calculus, Physics, Chemistry, Engineering Graphics, etc. All
freshmen Architects take courses on Design and Drawing. BSIA freshmen take Accounting. In addition to these courses, all freshmen are required to take gym and orientation, both worth zero credits.

On campus, freshmen, like other classes, find many activities to keep them busy between classes: they eat in the Caf.; they lounge out in the Center; they camp out on the Green (depending on the temperature outside); they play video games in the Gameroom; or simply go home. Many students get involved with organizations such as the Senate, the NUCLEUS, sports, and fraternities.
Sophomores are known as the people who survive the weeding out process of freshmen year. They are a strong breed.

Sophomore year is also the year most students commit themselves to the major of their choice for their college degree. They have gotten through their nonsense courses, the ones that have nothing to do with their major.

This is also the time most students finally get accustomed to the added work load that comes with attending college, and begin to participate in extra-curricular activities, such as joining clubs, organizations, fraternities, and athletics. Some sophomores already start to move up in each individual activity. For example, in most varsity sports, sophomores have a greater opportunity to display their talents than freshmen. Also, some sophomores already hold executive positions in certain clubs and organizations. Once sophomore year is completed, students look forward to achieving their goals, such as graduation and careers.
As a student becomes a junior, he begins to smell his future success. He's almost out of the college. In his junior year, a student takes courses dealing directly with his major. Courses such as Math, Physics, and Hum., are now history.

Many juniors go on with the Cooperative Education (Co-Op) program offered by NJIT. Here, students get involved with jobs associated with their major and gain experience. Students not entering Co-Op will simply go on to become seniors and to graduate sooner.
Dorm life is a lot of fun. You have the opportunity to make friends that are your own age with different backgrounds. You tend to party a lot with your new friends, to get to know them better. Seeing that you're away from home, you don't have to worry about going to bed late, waking up late, going out anywhere you wish at whatever time you wish, etc. This sense of complete freedom can go to your head and if not handled maturely, it may easily ruin your career.

In order to get the best out of dorm life, you have to be able to handle your independence in an organized way which can benefit your life. You should know when to party and be social, and when to be serious about your studies. You must get your priorities straight. Students learn from their experiences and usually they become more mature and more aware of the consequences if they ruin their studies. Also you're living with people your own age and usually they have similar problems, so you don't feel lonely. You have people by your side at all times and if you handle dorm life maturely, you end up learning much and you come out as a real adult who can then be on his own and go out into the world without having the fear of independence.

Dorm life is a great experience. Everybody is just a big, happy family.
Jeff Friedman
Employer: American Cyanamid Co.
Title: Mechanical Engineering Co-op

I worked in the chemical products division of the company in Linden, NJ, in the Central Engineering Department which is responsible for all but Process (Chemical) Engineering. I worked with both Project Engineers and independently. Typical jobs include designing a new building and purchasing the associated equipment, and drafting, so as to instruct laborers how to install piping and equipment. Recently I designed (and drafted) the new company cafeteria, including the plumbing and electrical design. Overall, I spent the majority of my time at my desk preparing jobs, and performing calculations, and other paperwork.

Rajender K. Daval
Employer: Mr. Ed Roessler
Title: Student Engineer

I worked for GPU (General Public Utilities) at Oyster Creek Nuclear Generating Station. The complex is located on Route 9 South, in Forked River, New Jersey. I worked in the maintenance and training department. I learned how to read Print Book which is used for describing different systems in Nuclear Plants. I was assigned a process control simulation project on the control rod drive system, a system used for controlling nuclear fuel in the reactor. The project involved development of programs, database and interactive graphics related to simulation of instrumentation, mechanical and electronic systems and circuits. The project was created in such a manner that the user can put failures into any section and watch the response of the system. The project is used by the instructor for teaching the system to technicians. He can test the ability of technicians by putting in failures and letting the technicians trouble-shoot the particular problem.

Besides working on my project, I had a chance to get a new experience and practical knowledge which I was lacking in college. I gained confidence in myself. I think every students needs to go out into the fields and get a chance to apply their available knowledge to practical use.
Robert Rokicki
Employer: American Standard, Inc.
Job Title: Chemical Technician

My Co-op job has given me the opportunity to learn about many engineering disciplines. This experience has helped me to make a final major change from electrical to chemical engineering. I was involved in working in a lab, doing technical drawings, and in the purchasing of materials, and the proper disposal of chemical waste materials. I think every student should take the opportunity and get involved in the Co-op program. It is a great experience.

Michael Filippone (Not Pictured)
Employer: General Public Utilities Nuclear
Job Title: Engineering Student-Trainee

When I arrived at the Oyster Creek Nuclear Generating Station, the plant was in the midst of their longest refueling shutdown and modification outage, due to the Three Mile Island incident. I spent a lot of time revising surveillance procedures and watching their testing. After the power plant started producing electricity (in November), I was given engineering tasks, such as a proposed plan for running computer cable which is now being installed. I also had to frequently inspect the plant for any possible electrical problems, especially those pointed out by service information letters, which is common amongst power plants, sent from one plant to another. I researched the history of the backup diesel generator failures, and with the assistance of an electrical engineer, I proposed a 24-pt. inspection checklist and a letter of satisfaction to the nuclear regulatory commission, late in October, which was required for startup.

Nick Ladomirak (Fall Co-op)
Employer: Schering Plough: Union NJ

We were in charge of making service reports for Sub-Contract services, a new department in the company. This included using the IBM personal computer to keep track of service dates for scales, balances, instruments, fork lifts, and other equipment. We compiled monthly and quarterly reports from this information and distributed them to various departments in the company, in addition to taking calls.

The job gave us much exposure to how a large company operates, and we were able to talk to engineers about their work, and offer suggestions to the company where possible. Co-oping was certainly a good experience.

Joan Scales (Spring Co-op)
Employer: Schering Plough: Union NJ

Mixers are the Friday social activity at N.J.I.T. As the name implies, mixers allow students, past and present, a chance to meet each other, dance, converse, and have a good time. The mixers are sponsored by S.A.C. and feature a variety of the hottest rock bands in N.J. including Bystander, The Click, Liar, and The Watch.

S.A.C. tries to vary their mixers by having special themes, costumes and super prize nights. Best of all, unlike a dance club, students of all ages can come and enjoy themselves. Even the Pub has been arranged so all students can go in and enjoy the refreshments and conversation with friends between sets.

Thus, through the course of one's college experience at NJIT, mixers prove to be a good meeting place for old and new friends.
So, you’ve been stuck in Newark for six weeks! Don’t despair, drop by The Center and check out the Trips board. This year’s program included: one day excursions to Broadway, South Street Seaport and Atlantic City; weekend jaunts to Vermont, Lake Placid and Williamsburg; and a seven day excursion to Steamboat Springs, Colorado. The trips are organized to be economical, educational and entertaining.

Yost education doesn’t stop with a baccalaureate degree. It begins there. Once you enter the world of work, you will gain valuable experience and really discover what it’s all about to use what you learned in college.

Take the Air Force for example. As a commissioned officer you’ll be handed executive responsibility on your very first job. You’ll manage people and complex systems. You’ll be expected to perform well, and you’ll be paid well, too. It’s worth working for.

You can get there through the Air Force ROTC program. In fact, we have a scholarship plan that will net you $1,000 a month tax free and pay for all tuition, books and lab fees. And that will free you to concentrate on your studies so you can get well prepared for where you’re headed.

Check it out. Find out how you can get into a “graduate” program like the Air Force. It’s a great way to serve your country, and possibly find your formal education extended at Air Force expense as well.

ALL-STUDENT PICNIC

May at NJIT was brought in with a bang. Wednesday May 1, 1985 from 12:00 PM to 8:00 PM was a day filled with sun and laughter. It was a great day for a picnic and the day was started with music by WJTB and ethnic foods sold by Chinese Student Association, Host, and the Hellenic Club. There was also entertainment by Bounce Ooh-La-La, and Spark Plug. Sponsored by the Nucleus, this act consisted of an outrageous couple and their dog in a vaudeville comedy act. There was also meltdown sponsored by ASME and Pi Tau Sigma. They had a contest for the closest guess to the time it would take the car to die. The winner got $25. Throughout the day the Outing Club was running on obstacle course, which was set up on the Green. It provided a lot of fun for those who ran the course and those who watched it. T-shirts were given for the best time for an individual and a team. In the middle of the day Caribso sponsored a Caribbean Calypso band, BWIA. There was also pie eating contests and non-alcoholic punch contests. The evening was celebrated by free hot dogs and soda which were given out by the Student Senate. There was also a D.J. who played disco, rock, and pop music. The music provided the perfect atmosphere for roller skating, also sponsored by the Student Senate. They roller skated around the Green to the music. For those who lasted the whole day it was ended by The Uncle Floyd Show in the Pub. It was obvious to all who attend the Student Faculty Picnic was a “phenomenal success”.
This year, the NJIT Center held its first annual Student Leadership Training Program. Held off campus (in the boonies of the Adirondacks), the Student Leadership Program was designed to train students to hold leadership offices where they could handle groups in the most efficient ways. Among the people at the training workshop were peer counselors, student government leaders, potential Miniversity Group Leaders, and leaders of small organizations.

In addition to the training program, students were given a short lecture on the history of Sagamore Lodge, where the program was held, and were also given free time to go boating, canoeing, hiking, and other outdoor activities (such as swimming for a few daring young women who decided to go swimming in the 55 degree water).

In addition there was time for group games and time to make friends. The three days spent in the Adirondacks with this group were not only educational, but fun, and proved to be the next best thing to a real vacation, since for many of us there is no time to go on vacation with the college schedule which we take on.
This page
**top right**- The effects of heavy drinking from the Open Bar.
**middle left**- Two-timing Tony. **middle right**- The “typical” table shot. **ovals** (left to right)- Some of the different dancing styles of the evening: “nose-to-nose”, “face-to-face”, and “arms distance away”.

Opposite page
**top left**- Entering the main ballroom, after the cocktail hour.
**circle**- Your welcome to the Aspen, complete with a centerpiece and name card. **middle left**- Hungry after a day of fast, members of the NJIT Outing Club pig out on the cocktails. **oval**- Getting close in slow dance. **bottom right**- Doesn't it look like these people are having fun??
The 1985 Spring Semi-Formal was held on Friday, April 12th, 1985, from 8 pm to 1 am at the Aspen Manor in Parsippany, NJ. The entertainment was provided by the band Roustabouts, who played a fine mixture of dance music, pop, rock, forties and fifties music and of course, slow romantic music. Cocktail hour was from 8 to 9 pm. These cocktails consisted of such delicacies as chicken, shrimp, spare ribs, and salads. Dinner included a fruit cup, salad, prime rib of beef, broccoli, potatoes, and chocolate mouse. Drink from the free Open Bar was all night and the music played from 9 pm until 1 am almost continuously!!

The evening was sponsored by the Senior Class, which was led by Joan Profita. Their hard work and dedication was rewarded with an evening that was enjoyed by all.
Some groups begin their partying before the Semi-Formal. Here's one group. Snugglin' and cuddlin' at the Semi-Formal.

One of NJIT's cutest couples pose for our fearless photographer. Mmmmm, doesn't her corsage taste GOOD?!

Some SACers slow down after a quick beat.

The all-night Open Bar.

A home tradition, the girl pinning her boutonniere on her man.

"Patty Cake, Patty Cake, Baker's May..."

Enjoying the meal.

Tom and Teresa celebrating their two year and fourth month anniversary of their going out.

Nick and his date Karen enjoy their cocktails.

Cindy and Mike having a VERY good time during the cocktail hour.
It was a glorious day that May 23, who cared if it was raining. The excitement was in the air, the parents were all here, champange stashed away under the gown, yup everything set. Just walk up onto the stage, get the diploma, and its all over. No more tests, exams, labs with 50% error margins, and instructors who didn't know English. Now we will have evaluations, project deadlines, and co-workers who don't know English. But the key difference is that we'll be paid to do these things, not the other way around. College is a great breaking away point, gone is the VW with 500,000 miles and measurable compression in one cylinder, taking on odd jobs to pay for the books, and eating at the cheapest places around. Now we'll be able to use all that information the profs taught us, and once honed with real world knowledge, we'll finally make enough to pay back the student loans. Yes, that light at the end of the tunnel is here, and its NOT a train coming the other way.

Graduation
FINALS (yea!!)
On the next six pages are the results of something of an entirely new undertaking for the NJIT Nucleus our first survey series ever attempted by the yearbook. The survey consists of three parts: one on love and romance, one on politics, issues and opinions, and the third on education, ideas and career goals. Starting with the love and romance survey which was released on February 14, 1985, the three surveys were made available at the Center Desk during most of the spring semester.

In addition to perhaps providing answers to some particular questions of my own, about which I continually argue with my friends, the 1985 Nucleus opinion survey series is a detailed comprehensive population study on the NJIT community, and it goes well with our 1985 theme, “What is a NJIT?”

I hope you will enjoy our presentation of the Nucleus Opinion Surveys. Much human labor, as well as computer time was put into making them possible. Please understand that we tried to be as accurate as possible with the results, and we hope that those of you who participated in answering the surveys took them seriously. Secondly, remember that the results of this survey are only true for a certain group of people here at NJIT, and since NJIT has a unique student population, the results of this type of survey may vary drastically at other places.

Nick Ladomirak
1985 NUCLEUS OPINION SURVEY

This is part one of a three part survey from which results will be published in the 1985 Yearbook. All persons participating in this survey should take it seriously. Parts two and three of the survey will be published later in the year and will include politics and career goals. We felt that Valentine's Day was an appropriate time of the year for this part of the survey.* Participants will remain anonymous.

INSTRUCTIONS—CIRCLE THE LETTER OF YOUR CHOICE FOR EACH ITEM.

****** PLEASE RETURN ALL SURVEY FORMS TO THE NUCLEUS SURVEY BOX AT THE CENTER DESK ******

SEX M F AGE 16 17 18 19 20 21 22 23 24 OVER 24

LEVEL OF COLLEGE A FRESHMAN B SOPHOMORE C JUNIOR D SENIOR E GRADUATE

1 ARE YOU? A CATHOLIC B PROTESTANT C JEWISH D MOSLEM E BUDDHIST F ATHEIST G AGNOSTIC H OTHER

2 HOW RELIGIOUS ARE YOU? A VERY RELIGIOUS B MODERATELY RELIGIOUS C SLIGHT RELIGIOUS D NOT RELIGIOUS AT ALL

22 DO YOU FEEL THAT ATTITUDES TOWARDS SEX ARE BEING BADLY INFLUENCED BY THE MEDIA? Y N

23 DO YOU FEEL THAT SEXUAL ACTIVITY IS EXAGGERATED IN OUR SOCIETY TODAY? Y N

24 DO YOU FEEL THAT YOU ARE (HAVE BEEN) A VICTIM OF THE SEXUAL REVOLUTION? Y N

*Note: Some of the preceeding questions have been adapted from the Love & Romance survey Psychology Today Magazine February 1983.
The Love and Romance Survey answered some interesting questions about these topics in a predominantly male school.

In my opinion, the survey produced some fascinating results: First, women seem slightly happier than men here in terms of love and romance, and a higher percentage of women seem to have made some sort of commitment to someone when compared to men. However the differences are not as drastic as expected. Another phenomenon which surprised me was high sexual activity. Perhaps this says that men are more sexually active than women; one must consider the age group of the population studied before one makes a valid conclusion.

As far as I am concerned, being brought up in a very strict Byzantine Catholic family, the results of this survey of sexual activity are not only surprising, but depressing.

If you are interested in more detailed results of this survey, please feel free to contact the Nucleus office.

1985 NUCLEUS OPINION SURVEY — PART 2 POLITICS, ISSUES, AND OPINIONS — DISTRIBUTION DATE 4/3/85

INSTRUCTIONS — CIRCLE THE NUMBER OR LETTER OF YOUR CHOICE FOR EACH ITEM — PLEASE RETURN ALL FORMS TO THE BOX AT THE CENTER DESK —

Sex M F
Age (fill in)
College level F (freshman) S (sophomore) J (junior) S (senior) G (graduate)

1 For the following items state your opinion as (F) for for or (A) for against:
   Seat belt law F A
   Happy hours F A
   Drinking age in general F A
   Prayer in school F A
   ERA F A
   Disarmament F A
   Nuclear energy F A
   Abortion F A
   Communism in general F A

2 Do you feel that in general you are better off than you were four years ago? Y N

3 Did you vote for Ronald Reagan at the last election? Y N, and do you support his policies Y N S for somewhat

For the next 2 questions: A occasionally B seldom C regularly D never

4 Do you Drink? A B C D

5 Do you smoke? (tobacco) A B C D

6 Have you ever smoked Marajuana? Y N If so do you smoke it A occasionally, B seldom, C regularly

7 Have you ever taken drugs Y N If so do you take drugs A occasionally, B seldom, C regularly

8 Have you ever been arrested Y N

9 What kind of music do you listen to? (circle as many as desired) A rock B disco C soul D classical E pop F jazz G cultural H other

10 Do you agree that the government is only as supreme as the people who make it Y N

11 Do you feel that there should be (A) more government (involvement, regulation, etc...), (B) less government, or (C) no change

12 Do you feel that government creates problems by failing to realize that that it can make mistakes (consider the arms race, military decisions, as well as treatment of criminals, etc.) Y N

13 Do you feel that in general laws are fair Y N

Be sure to answer survey parts I and III (part I - love and romance; part III - education, ideas & career goals)
Listed below are the results of the Nucleus Opinion survey - Part 2 -
Politics, Issues and Career goals.

NUCLEUS SURVEY PART III - YOUR EDUCATION, IDEAS AND CAREER GOALS - April 3, 1985

INSTRUCTIONS - CIRCLE THE NUMBER OR LETTER OF THE ITEM OF YOUR CHOICE **** PLEASE RETURN ALL FORMS TO THE NUCLEUS SURVEY BOX AT THE CENTER DESK * * * *

1. What do you like most about NJIT? A the student B the faculty C athletics D fraternities/sororities E the social life F education G school organizations H men/women I location J other

2. Which of the above do you like the least? A B C D E F G H I J

3. How long have you been here at NJIT? (1) less than 1 year (2) less than two years, (3) less than 3 years, (4) less than four years, (5) less than 5 years, (6) less than 6 years, (7) less than 7 years, more than 7 years.

4. Have you completed any degree program other than the one you are in pursuit of here? Y N

5. Do you plan on working at another degree after you complete your degree at NJIT? Y N

6. Would you consider yourself a (an) (1) Immigrant, (2) First generation American, (3) Second generation American (4) Third (or greater) generation American?

7. Do your parents have a college degree? M (mother has degree) F (father has degree) B (both have a degree)

8. To what degree do you feel that what you have learned here at NJIT is applicable this far in your life? (degree courses) A I am applying less than 10% of what I learned, 10%, 20%, 30%, 40%, 50%, 60%, 70%, 80%, 90%, B More than 90%

9. To what degree do you feel that your other courses have been applicable? (Humanities, OSS, etc.) A less than 10%, 10%, 20%, 30%, 40%, 50%, 60%, 70%, 80%, 90%, B More than 90%

10. If you are employed is what you learn in school, is your degree program job related? Y N

11. Do you do anything besides go to school (circle any that apply) A run a business, B work full time, C work part time, D involved in small organizations, E involved in politics, F involved in community service, G go to church or religious institution regularly, H other

12. How many hours a week do you spend studying outside of class (write in)? ; how many credits are you carrying?

13. Do you feel that it is poor teaching practice to have class average that is lower than perhaps 75%. Y N

14. Which would you prefer: (A) a low class average and low passing level where many students pass although the test are very difficult. (B) a high class average and very easy tests with strict standards for passing. (C) Tests fairly difficult with provision for extra credit or (D) removal of the lowest test grade.

15. Do you feel that you are learning, in any of your technical courses about materials, systems, or practices which are now obsolete? Y N

16. Are you (A) for or (B) against microcomputers for the incoming freshmen?

17. Number in order of importance the following life time goals: A to be a professional engineer in you field of study in a large company , B to be involved in management of a division of a large corporation , C To own your own business , D to be a successful politician, E to teach in your field of study , F to be successful in sports, G to be successful in entertainment; e.g. music, drama, etc. , H marriage and family. I Others (list):

If you haven’t already done so, be sure to answer part II politics, issues and opinions and part I Love and Romance (nicknamed the sexsurvey)
Survey Results

PRELIMINARY INFORMATION

**QUESTION #1**
WHAT DO YOU LIKE MOST ABOUT NJIT?
- STUDENTS: 12
- FACULTY: 5
- ATHLETICS: 4
- SOCIAL LIFE: 2
- EDUCATION: 34
- ORGANIZATIONS: 3
- MEN/WOMEN: 3
- LOCATION: 8
- OTHER: 8

**QUESTION #2**
WHAT DO YOU LIKE LEAST ABOUT NJIT?
- STUDENTS: 2
- FACULTY: 4
- ATHLETICS: 2
- FRAT: 1
- SORR: 9
- SOCIAL LIFE: 16
- EDUCATION: 4
- ORGANIZATIONS: 3
- MEN/WOMEN: 4
- LOCATION: 27
- OTHER: 3

**QUESTION #3**
HOW LONG HAVE YOU BEEN A NJIT?
- AVERAGE: 3.1 YEARS

**QUESTION #4**
DO YOU PLAN ON ANOTHER DEGREE?
- YES: 48
- NO: 21

**QUESTION #5**
AVERAGE - SECOND GENERATION AMERICAN

**QUESTION #6**
DO YOUR PARENTS HAVE A COLLEGE DEGREE?
- FATHER ONLY: 17
- MOTHER ONLY: 4
- BOTH: 12
- NEITHER: 36

**QUESTION #7**
THE AVERAGE

**QUESTION #8**
BELIEVE THAT THEIR DEGREE PROGRAM IS JOB RELATED.
- YES: 37
- NO: 32 or 46%

**QUESTION #9**
WHICH WOULD YOU PREFER (CONCERNING GRADING EVALUATION PROCEDURES - REFER TO SURVEY):
- A: 8
- B: 2
- C: 33
- D: 22

**QUESTION #10**
58% OR 40 PEOPLE BELIEVE THAT THEY ARE LEARNING ABOUT THINGS WHICH ARE OBSOLETE.

**QUESTION #11**
MICROCOMPUTERS: 33 - FOR, OTHERS AGAINST, DIDN'T ANSWER OR COMMENT.

**QUESTION #12**
A TYPICAL COMMENT WAS THAT UPPERCLASSMEN SHOULDN'T PAY FOR THE COMPUTERS - THERE WERE 5 SUCH COMMENTS.

**QUESTION #13**
AVERAGES WERE 18 HOURS AND 14 CREDITS

**QUESTION #14**
TOTAL POINTS = PRIORITY CHOICE OR POINT VALUE ÷ NUMBER CHOSEN; A LOW NUMBER INDICATES A HIGH PREFERENCE OR HIGH OMISSION OF THE ITEM.
A Message
From The Editor

On that April day in 1984, I was almost unanimously chosen to be the 1985 Editor-in-Chief of the NUCLEUS. I didn't realize what I got myself into, but had I known, I don't think I would have taken the job!!

After careful planning throughout the summer (reorganizing the office, doing my ladder diagrams, drawing consistent layouts, choosing the theme "What is a NiJIT?", etc.), Miniversity arrived and with it, the new school year. After a successful Miniversity mini-course and increasing interest in the yearbook developing in school, I thought making the yearbook would be a cinch. WRONG!!

First of all, NONE of the students in my mini-course ever materialized (thanks people), and my staff seemed to dwindle as the year went on. They never had any idea of what was going on (some still don't know how to write up a sale!!). Photography sessions were missed and deadlines were not made. Worse, most NJIT students still don't know that the yearbook is NOT JUST FOR SENIORS, and that it was not free! All these problems led me to cry "I'm NOT going to be editor next year!!" (many, many times).

Despite all these disasters, the yearbook hasn't been that bad. Without it, I would not be a member of ODK (now Pres.), a Miniversity coordinator, and an Estrin Scholar. I also would not have met all the nice students, faculty, and administrators (all the NiJITs) I have. The yearbook has truly been a challenge which I have successfully accomplished, which will help me in future challenges I may have. It has helped me to deal with all different types of people and with crises. Also, having previous yearbooks to compare with, I think this year's book is the best that NJIT has ever had. (Pardon my modesty!)

There are people I must thank. First of all, I'd like to thank my staff: Ken, Nick, Amy, Cindy, Nancy, Dave D., Dave P., Dave B., Bob, Andrew, JS, Joan, Dipi, Loretta, and Bonnie. I'd like to thank Beim for their pictures and the Senate for their generous budget. I'd like to also thank the Phys. Ed. dept. for their contributions for my sports pages and all the clubs, professional and honor societies, fraternities and administrative departments that responded to our constant pleas. Most of all, I'd like to thank Tom (my boyfriend) and my mother and late father for a shoulder to lean on, and God for hearing and answering many prayers. Finally, I'd like to wish Neils Schwartz, the 1986 editor-in-chief, the class of '85, and all NJITs in general the best of luck in the future and in life.

Sincerely,
Cristina C. Fatjo
Editor-in-Chief
1985 NUCLEUS

SPECIAL THANKS to:

Bonnie Levine, our yearbook representative, for her unending guidance and assistance that made this yearbook come to be. She is a good businesswoman, but more than that, a very special friend who was always there when we needed her.

Kenneth Ng for his photography, fast typing, and bending over backwards doing errands when I was at my busiest. He was also my “punching bag” when yearbook problems arose!! My thanks to him for putting up with me.

The NJIT Outing Club (too numerous to single out) for covering the office and handling sales when my staff or I was not around (which was too often). Also, my special thanks for cheering me up when I was down and for making the Student Organization Area a lot more livelier!!

Dave Beagin, our former yearbook member now at Penn State, for bailing me out at the end of the year by offering me his services and his superior page designs.

Loretta Kieffer, our photo representative, for going out of her way to improve the photography services at Beim.

My staff in general, Beim Photographers, Jostens, and anyone I have not mentioned who helped me make this book a reality.

“CF”
