This Syllabus is brought to you for free and open access by the NJIT Syllabi at Digital Commons @ NJIT. It has been accepted for inclusion in Biology Syllabi by an authorized administrator of Digital Commons @ NJIT. For more information, please contact digitalcommons@njit.edu.

Course Description

This course will introduce students to the study of biology at the beginning of their course of study. Central ideas in the biological sciences will be highlighted, with an **emphasis on the process of scientific discovery and investigation**. The course will provide the basis for more advanced coursework and learning experiences in biological sciences as students delve into the curriculum of study. This is a required course for all NJIT and Rutgers-Newark Biology majors.

Instructors

Instructor

Dr. Maria Stanko
CKB 340E
mstanko@njit.edu

Office Hours

Mon 2:30-4:00, Tues 10:00-11:30. Schedule using Cisco WebEx link on left-hand menu of Canvas, or email me for an appointment at other times.

Course Website:

<http://canvas.njit.edu/>

Recitation Instructors:

Katie Gallman
kathryn.e.gallman@njit.edu
Sections 001 and 005

Subash Ray
sr523@njit.edu
Sections 003 and 007

Maggie Wisniewska
mw298@njit.edu
Sections 009 and 011

To meet with your recitation instructor, please email to schedule an appointment.

Class Meetings

Class meets twice weekly for lecture and once weekly for recitation.

Lecture: Monday & Wednesday 12:30pm-1:00pm Kupfrian 210 A (Jim Wise Theater)

Lectures will be in the **Converged** Instructional Delivery Mode. This course will include some students physically in the classroom and some attending remotely. If you will be attending in person (i.e., physically in the classroom), you must indicate that using the Back2Classroom app: <https://back2classroom.njit.edu>. If you are attending remotely, use the CISCO WebEx link on the left-hand menu of our course Canvas page. Regardless of which way you attend, the class will be held synchronously meaning everyone is expected to attend class either in person or remotely during the scheduled class period. Please see NJIT's Pandemic Recovery Plan for more information and updates: <https://www.njit.edu/pandemicrecovery/>.

Recitation: Recitations meet once weekly on either Thursday or Friday. ALL recitation meetings will be in the **Synchronous Online** mode, meaning all students will attend remotely during the scheduled class times. Use the link provided for your recitation section on Canvas. (Note: these sections still appear on the back2classroom app, but there is no in-person attendance.)

Section 001: Thursday 7:30am-8:50am

Section 003: Thursday 11:00am-12:20pm

Section 005: Thursday 9:00am-10:20am

Section 007: Thursday 2:30pm-3:50pm

Section 009: Friday 7:30am-8:50am

Section 011: Friday 12:30pm-1:50pm

Course Policies:

- All course materials (including recordings of lectures) are for students' own use only (no sharing or posting anywhere).
- Homework assignments and projects may be submitted late, but 10% of the points available for each 24 hours after the assignment was due will be deducted from late submissions.
- Late submissions (up to 10 days late) of learning journals will receive half credit.
- Review quizzes and exams cannot be completed late without documentation of an excusable absence from the [Office of the Dean of Students](#).
- Each student is expected to do his or her own submitted work **independently**. (See Academic Dishonesty statement on p. 2.)

Disability Statement: Please let me know if you need accommodations for a disability. If you are in need of accommodations due to a disability please contact Chantonette Lyles, Associate Director of the Office of Accessibility Resources & Services (OARS), to discuss your specific needs: <https://www.njit.edu/studentsuccess/accessibility>

- 1. Canvas.** You need to ensure that you can access the course website (<http://canvas.njit.edu>) ASAP! Log-in with your UCID.
- 2. Textbook.** We will use the FREE online textbook Opex Stax Biology 2e: <https://openstax.org/details/books/biology-2e> supplemented with additional readings. All readings will be provided via links on the course website, but you may find it useful to download (free) the OpenStax Biology2e text.
- 3. iClicker.** In order to gauge your understanding of topics we discuss in lecture, I will regularly poll the class using the iClicker REEF app: <http://iclicker2.wpengine.com/students/apps-and-remotes/apps>
- 4. Writing Materials.** You should bring materials to take notes to every class meeting. Handwriting notes is recommended.

COVID-19 Safety Requirements: All persons physically present in any department facility or classroom shall comply fully with the NJIT COVID-19 safety policy at all times. Masks must be worn before entry to all department facilities, and social distancing guidelines must be followed. Individuals who are unable to wear a face mask due to medical reasons should contact the Office of Disability Services or Human Resources. Students who enter a classroom without wearing a mask properly, or remove their mask, will be cautioned by the instructor. The same is true for students who disregard the seating order or guidelines for social distancing. Students with obvious symptoms of respiratory illness should not come to campus and will be asked to leave. Students who do not comply with a request by a department instructor to adjust their behavior, in accordance with the University Policy, will be subject to disciplinary actions. Instructors have the right to expel the student or terminate the class session at which any student fails to comply with the University Policy.

Assessment of Learning – Components

- 1. Learning Journal** – Every week, you will have an assigned prompt asking you to reflect on your own learning and progress in the course, to which you must respond via your personal forum on Canvas. Journal entries are assigned over the weekend. Only instructors can see your entries, and points are awarded (2 pts per weekly entry) for complete, thoughtful responses.
- 2. Lecture participation** - Lecture participation will be assessed using iClicker questions. Each lecture will include at least a couple clicker questions. You must answer (correct or not) at least 80% of the questions to receive full credit for this component; lower response rates are scaled accordingly.
- 3. Online Quizzes** - During the course, there will be 4 quizzes (administered via Canvas) to assess your understanding of concepts that we have covered in class and your ability to apply that knowledge. These are intended to provide practice as part of your preparation for exams and to give you an opportunity to mark your progress. You will also take a Pre-Quiz and Post-Quiz; this quiz is used to assess scientific literacy before and after the course.
- 4. Homework** - There will be several homework assignments throughout the course that will require slightly more in depth work on a topic and application of knowledge. Homework assignments will be discussed during Recitation and completed assignments will be submitted on Canvas.
- 5. Projects** – Science often requires pulling together information from multiple sources to arrive at an end result. The course will include two projects that consist of several components that build towards a final goal.
- 6. Exams** – There will be two exams that cover the application and understanding of the material covered in the course. These exams will also require you to apply the skills that we have emphasized. Exams will be open-note, open-book **online** exams that must be completed completely independently during the scheduled class time (Exam 1) and the scheduled final exam time (Exam 2).

Course Grade

Your grade for this course will be based on the components described on the left. You can choose how your grade is calculated by determining the weight of each grade component as a percentage of your total semester grade, within the given ranges. Your final grade will be the highest of two possible grades: the grade that results from your selected weight (Your %) or the one resulting from the standard weight (Standard %).

Grade Component	% Range	Standard %	Your %
Learning journal	5-12%	9.33%	
Lecture participation	4-10%	6.67%	
Quizzes	6-14%	10%	
Homework	10-18%	14%	
Projects	22-30%	26.67%	
Exams	30-38%	33.33%	

Grades will be determined by the percentage of the possible weighted points earned, following the standard grade scale.

A	> 90%
B+	85-90%
B	80-85%
C+	75-80%
C	70-75%*
D	60-70%
F	< 60%

Grades are not curved, and do not ask for extra credit.

*You must earn a C or better in order to progress within the Biology major.

Academic Dishonesty: Academic Integrity is the cornerstone of higher education and is central to the ideals of this course and the university. Cheating is strictly prohibited and devalues the degree that you are working on. As a member of the NJIT community, it is your responsibility to protect your educational investment by knowing and following the academic code of integrity policy that is found at: <http://www5.njit.edu/policies/sites/policies/files/academic-integrity-code.pdf>. Please note that it is my professional obligation and responsibility to report any academic misconduct to the Dean of Students Office. Any student found in violation of the code by cheating, plagiarizing or using any online software inappropriately will result in disciplinary action. This may include a failing grade of F, and/or suspension or dismissal from the university. If you have any questions about the code of Academic Integrity, please contact the Dean of Students Office at dos@njit.edu.

A. Biological Principles

Students will be able to....

1. Identify mechanisms of evolutionary change and explain how they lead to genetic change in populations through time.
2. Describe the structural characteristics of nucleotides (DNA/RNA) and explain how they are related to the functions of these molecules.
3. Identify the basic steps involved in gene expression and describe ways that gene expression can be regulated so that different cells produce different proteins.
4. Be able to transcribe information from DNA to RNA and to translate mRNA into amino acid sequences.
5. Interpret information depicted on a phylogenetic tree.
6. Outline the stages of cell division (mitosis and meiosis), explain what occurs during each stage, and describe how the nuclear DNA of daughter cells compares to that of the original cell.
7. Be able to utilize a Punnett square to predict the potential genotype/phenotype of offspring.
8. Define and give some examples of interspecific interactions and describe how different types of interactions affect the population sizes of the species involved.
9. Identify the different trophic levels in a community and explain how energy moves through them.
10. Explain traits related to an organism's life history and what influences the evolution of different life history strategies.

Individual class sessions will have more specific content outcomes, based on what is being discussed that week and how it relates to the larger goals of the course. Look for those in the lecture slides for each topic.

B. Learning, Reasoning, and Problem-Solving Skills

Students will be able to...

1. Monitor and adapt their personal learning strategies throughout the semester.
2. Develop a plan for their continued learning beyond this course.
3. Propose hypotheses to explain observed phenomena.
4. Design a basic experiment to test a hypothesis, taking into account the ethical and methodological considerations for proper experimental design.
5. Identify and describe patterns in data and interpret statistical analysis of others' results.
6. Communicate scientific information effectively in written and graphical form.
7. Attribute primary sources for scientific writing using proper citation format.
8. Synthesize concepts from multiple biological scales.
9. Apply knowledge to solve problems in biology.
10. Cooperate with their peers to solve problems as part of a team.

Succeeding in Concepts in Biology

Learning is an active process, and it requires actively thinking, discussing and writing. Being successful at this process necessitates you understanding how you best learn biology. That requires thinking about more than just what you are learning, but how you are learning it. This is referred to as metacognition. Practicing this process will make you more efficient learners and better able to learn and integrate new material.

1. **Be Present.** Whether or not you are physically in the room, it's important to "show up" to class. Limit your distractions, be prepared to take notes, and be active in your participation with the class. Engagement in class activities means that you will learn more and struggle less when you work on your own later.
2. **Be Proactive.** This applies to a number of contexts. For example, cramming for an exam is something that students love to do, and sometimes it even feels vaguely successful—especially when memorization of something for short-term recall is the goal. Memorization of facts is not the point of this course though, so that strategy is even less likely to work here. Being proactive also means that you need to think about how you are doing and make an effort to improve. In other words, don't wait until you see your final grade posted online to care about how you are doing in the course.
3. **Talk.** Talking through an idea can help with your understanding. Discussion will be a big part of this course, so we will encourage your active discussion during lecture and recitation, whether you're in person or online. But, talking things through shouldn't end when you walk out of class. Form study groups, meet virtually, and talk about the class. You all have access to a WebEx account that you can use to hold online meetings with your fellow students!
4. **Look at the Learning Outcomes.** I have provided the overall goals for you just above this section and will include more specific ones throughout the semester. These are posted for your benefit to help guide your studying and illustrate key ideas and skills you should work to master.
5. **Test Yourself.** Take some time to think about the material that has been covered in class. Potentially, ask yourself (or your classmates) questions like:
 - What were the main topics from this class session? (Objectives? Questions?)
 - What do I need to know in order to understand that concept, question or problem?
 - Can I break the topic into smaller parts? What parts can I explain in a manner that makes sense to me?
 - What parts are unclear or don't make sense yet?
 - How does today's class session relate to the larger goals of the course?

Clues to the answers to several of these questions will be found in the specific learning outcomes emphasized for each class/topic.

I want you to do well in this course. In fact, I want to help you develop skills in this course that will help you do well in every course you take from this point forward. So, don't treat these things as a chore you just have to do for this course. These are all suggestions that can be helpful in any class that you take.

Course Schedule

Schedule: Dates listed by week; lectures will meet twice every week and recitation will meet every week, unless otherwise noted. Please note that this is the proposed schedule and is subject to change. A more detailed schedule will be continually updated via the course Canvas site.

Week of	Week #	Lecture Topic	Recitation	Assignments/Noes
8/31	1	Mon - No Lecture Intro: Syllabus, Class goals	Introduction	HW 1 Pre-Quiz on Canvas NO LECTURE on Mon 8/31
9/7	2	Mon – No Lecture (Labor Day) TUES 9/8 - What is Biology? Experimentation/Graphing	Interpreting graphs	TUES 9/8 – NJIT on MON schedule HW 2
9/14	3	Evolution/Natural Selection Adaptation/Fitness	Selection	HW 3 Review Quiz 1 on Canvas
9/21	4	What is flu? DNA/RNA Discovery & Structure	Disease spread	HW 4
9/28	5	DNA Replication Transcription/RNA Processing	Copying DNA (PCR)	HW 5
10/5	6	Translation Regulation of Gene Expression	Project 1	Project 1, Part 1 Review Quiz 2 on Canvas
10/12	7	Mutation Phylogenetic Trees	Project 1	Project 1, Part 2
10/19	8	COVID-19 Scientific Writing	Project 1	Project 1, Part 3
10/26	9	Exam 1 What is DFTD?	DFTD	HW 6
11/2	10	Cell Cycle/Mitosis Cancer	Cancer Genetics	HW 7 Project 1, Part 4
11/9	11	Meiosis Epigenetics	Project 2	Project 2, Part 1 Review Quiz 3 on Canvas
11/16	12	Inheritance Population Genetics	Project 2	Project 2, Part 2
11/23	13	Interactions / Competition Wed - No Lecture (Fri schedule)	NO Recitations	
11/30	14	Predation / Trophic Cascades Interaction Networks	Project 2	Project 2, Part 3 Review Quiz 4 on Canvas
12/7	15	Life History Strategies Future for Tasmanian Devils	NO Recitations	Project 2, Part 4
12/15-21		Exam 2 and PostQuiz - During Final Exam Period*		Final Exam Schedule will be posted here: http://www.njit.edu/registrar/exams/

*Do not schedule travel during the final exam period until after the NJIT final exam schedule has been announced.
