## POLICIES

**DMS Course Policies:** All DMS students must familiarize themselves with, and adhere to, the **Department of Mathematical Sciences Course Policies**, in addition to official **university-wide policies**. DMS takes these policies very seriously and enforces them strictly.

**Grading Policy:** The final grade in this course will be determined as follows:

Quizzes and Projects	25%
Common Midterm Exam I	20%
Common Midterm Exam II	20%
Final Exam	35%

Your final letter grade will be based on the following tentative curve.

A	90 - 100	C	60 - 69
B+	85 - 89	D	50 - 59
B	75 - 84	F	0 - 49
C+	70 - 74		

**Attendance Policy:** Attendance at all classes will be recorded and is **mandatory**. Please make sure you read and fully understand the **Math Department's Attendance Policy**. This policy will be strictly enforced. Absences from class will inhibit your ability to fully participate in class discussions and problem solving sessions. Tardiness to class is very disruptive to the instructor and students and will not be tolerated. Students might be withdrawn from the class or receive an "F" because of absences.

**MATLAB:** MATLAB is a mathematical software program that is used throughout the science and engineering curricula. Several MATLAB assignments will be given out. These assignments have been designed to help you learn how to use this software in order to visualize many of the concepts taught in class.

**Projects:** It is vital that you complete the required assignments by the specified dates.

**Quiz Policy:** A short quiz based on the homework problems will be given weekly.

**Exams:** There will be two common midterm exams held during the semester and one comprehensive common final exam. Exams are held on the following days:

Common Midterm Exam I	October 2, 2019
Common Midterm Exam II	November 13, 2019
Final Exam Period	December 14 - 20, 2019

The time of the midterm exams is **4:15-5:40 PM** for daytime students and **5:45-7:10 PM** for evening students. The final exam will test your knowledge of all the course material taught in the entire course. Make sure you read and fully understand the **Math Department's Examination Policy**. This policy will be strictly enforced.

**Makeup Exam Policy:** To properly report your absence from a midterm or final exam, please review and follow the required steps under the DMS Examination Policy found here:

- [http://math.njit.edu/students/policies\\_exam.php](http://math.njit.edu/students/policies_exam.php)

**Cellular Phones:** All cellular phones and other electronic devices must be switched off and put away during all class times.

## MATLAB Projects for M337: Linear Algebra, Fall 2019

Visit the [textbook website](#) for supplementary materials including a guide to getting started with Matlab. For additional help, the math department has Matlab TA's. Click for [locations and times](#) when they are available.

The first thing you need to do is to install the LayData toolbox on the computer where you will be using it. Here are the steps. I will assume that you have Matlab installed or are using Matlab on a campus PC.

- Download the [LayData Toolbox](#).
- Uncompress the file and move the unzipped directory to the location on your computer where you want it.
- Add the toolbox to the Matlab search path. To do this run Matlab, and at the >> prompt, type pathtool to bring up the path management window. Click Add Folder, and select the folder containing the toolbox. Be sure to save it.

Subject	Week Due	Notes
Getting Started with MATLAB	September 17, 2019	Section 14: Some recent versions of Matlab use <b>New -&gt; Script</b> instead of <b>New -&gt; M-file</b> . Do install the Laydata programs and set the path as described in section 16 for next assignment.  <b>DO NOT HAND IN.</b>
Practice Row Operations and Reduced Echelon form and ref	October 1, 2019	Note that there are two separate short assignments here.
Lower Triangular Matrices	October 22, 2019	Problem (1c) and (2b) ask you to prove a result about lower triangular matrices. If you have trouble doing this in general, try it first with $(2 \times 2)$ lower triangular matrices, then $(3 \times 3)$ until you see the pattern. For general Matrices, try using the $(\Sigma)$ notation for the $((i,j))$ entry of a matrix product.
Using backslash to solve $Ax=b$	November 5, 2019	
LU Factorization	November 26, 2019
