Week #11  
3/31 – 4/6  
MS Project Tutorial – Part 2  
Resource Allocation/ Earned Value  

Week #12  
4/7 – 4/13  
Cost Schedule Integration and Productivity  
Analysis  

Week #13  
4/14 – 4/20  
Advanced Scheduling Techniques – Short  
Interval Scheduling  

Week #14  
4/21– 4/27  
Advanced Scheduling Techniques – Linear  
Scheduling & PERT  

Week #15  
4/28 – 5/4  
Alternate Project Delivery Methods  
Risk Analysis  

Week #16  
5/5– 5/11  
FINAL PROJECT DUE  

Week #17  
FINAL EXAMINATION ON MOODLE  

Lectures for each lesson will be posted Sunday of each week. For example Lecture for Week #4 will be posted on Sunday 2/10. Homework will be assigned on the same day.

Homework is due on Sunday Evening at 11:59 PM of the following week. For example homework for Week #4 will be due on 2/17 at 11:59 pm.

COURSE DESCRIPTION AND OBJECTIVES:

Management tools as related to construction projects are analyzed and applied to individual projects. Emphasis is on network scheduling techniques, time-cost analysis, resource allocation and leveling, cost estimating, bidding strategy, and risk analysis. The course is divided in two key modules: Project Planning, which focuses on the development of financial and operational plans and schedules, and Project Control, which emphasizes performance measurement and control, real-time updating of project plans, control metrics and analysis.

LEARNING OUTCOMES:

Using the cases and background materials, and methodologies covered, you should be able to:

- Plan a construction project and develop realistic and efficient schedules.
- Allocate Resources and adjust usage based on time and cost constraints.
- Set up a project control environment and system.
- Understand the link between estimating and cost control systems.
- Understand project performance measurement, productivity and risk analysis.
- Learn operations management, industrial systems and management science techniques applications to construction planning, scheduling and control.
- Apply the range of management methods to realistic construction company and project cases.
**Basis of Grading:**

Class Participation 5%

Homework / Quizzes = 10%

Midterm = 25%

Report = 30%

Final Exam = 30%

**Homework/ Quizzes:**

Please submit homework in Moodle under each assignment and label per the instructor’s request. Late assignments will not be accepted. No notice quizzes may be given about assigned homework.

**Report:**

The Term Project includes MS Project and report writing submissions.

**Midterm and Final Exam:**

Will be done in Moodle and you will have 2 hours since you begin the exam, make sure your computer is fully charged and you are able to do it without interruptions, extra time will not be allowed.

**Honor Code:**

Students are advised that the NJIT Honor Code will be upheld in this course, and any violations will be brought to the immediate attention of the Dean of Students.

**OTHER REQUIREMENTS:**

Students are required to have access to a computer at least once a week and the installation of software on it.

The course requires the adoption of a computerized project planning and control system. The MS project system and MS Office are provided by NJIT free of charge, they are both required for this class!

Syllabus is Subject to Change due to Class Format
