This Syllabus is brought to you for free and open access by the NJIT Syllabi at Digital Commons @ NJIT. It has been accepted for inclusion in Physics Syllabi by an authorized administrator of Digital Commons @ NJIT. For more information, please contact digitalcommons@njit.edu.

Physics 121 (Section 014) Course Syllabus – Spring 2020

Time: Tuesdays and Thursdays 11:30 am – 12:50 pm

Room: 105 Tiernan Hall

Amendment of Course Policy/Syllabus for COVID-19 Outbreak

- Virtual class for the rest of this semester (using WebEx). The first virtual class meets on March 24th.
- Common exam 2 is cancelled.
Instead, a merged exam (Common Exam 2+3) will cover the material of both exams on the original syllabus on the date as originally scheduled for Common Exam 3 (Monday, April 13).
- The grading formula will weight exams 1 and 2/3 at 24% each (instead of 16%+16%+16%).
- The final exam (comprehensive as usual) will remain worth 32% of the term average.
- The exams will be administrated virtually: no face-to-face exam session. You can choose your preferred place to take the exams - most likely your home. NJIT is now implementing a new online proctoring tool called "ProctorU". *Make sure your computer is equipped with a webcam.*
- To benefit students who didn't do well on Exam 1, a student's Exam 1 score will be replaced by his/her Final Exam score when the latter is higher.
- The rest (HW and Quiz) will remain unchanged.
- Do your HW as usual.
- Online tutoring session will be provided (<https://physics.njit.edu/physics-tutoring-sign-sheet>).
- Office hour: Wed 2-4pm (WebEx). Other times, students can approach the instructor by email.
- Student access to Pearson digital materials at no additional charge.

Instructor Information

Prof. Hyomin Kim

Office: 104 Tiernan Hall

Office Hour: Wednesdays 2:00 pm – 3:00 pm, Other times by appointment (either in 101 or 104 Tiernan Hall)

Phone: (973) 596-5704

E-Mail: hmkim@njit.edu

Personal Web Page: <http://web.njit.edu/~hmkim>

Mastering Physics Course ID: PHYS121SPRING2020KIM

General Information

Description: Physics 121 is a calculus-based introduction to electricity and magnetism, emphasizing fundamental concepts and applications. It is the second course in a three course sequence. The topics covered are listed below.

Pre-requisites (all with grade of C or better):

- Physics 111 or 111H, and Math 111 or 111H.

Co-requisites:

- Physics 121A (the lab course) and Math 112 (Calculus-II).

Physics 121A Laboratory must be taken along with Physics 121 unless it has been passed previously. A student who drops Physics 121 automatically drops the lab (and vice versa, no exceptions). Physics 121A is otherwise a totally separate course from Physics 121 in that the lab instructors set the requirements and grades. The lab manual (Physics 121A Laboratory Manual 9th Edition) can be purchased at the NJIT bookstore. The most up-to-date lab schedule will be posted at <https://centers.njit.edu/introphysics/welcome>.

Learning Expectations, Goals, Outcomes

Students will be expected to demonstrate understanding and mastery of calculus-based classical electricity and magnetism up to AC circuits, not including Maxwell's Equations or beyond. The topics covered include electric charge, electric and magnetic fields, forces on stationary and moving charges and currents due to electrostatic and magnetic fields, electrostatic potential and potential energy, Gauss' Law, capacitance, current, resistance, DC circuits, the Biot-Savart Law, Ampere's Law, Faraday's Law, inductance, RC circuits, LR circuits, LCR circuits, AC circuits including "phasor diagrams" and resonant oscillations.

In any/all of the above subject areas, students should be able to do the following:

- Recall and use the conceptual and mathematical definitions and be able to explain them.
- Understand the conceptual and mathematical relationships between quantities used.
- Explain and manipulate equations and techniques developed in the text, lectures, problem examples, and in the course of working problems.
- Use symmetry arguments, sketches and diagrams, graphs, algebra, trigonometry, and basic integral and differential calculus methods for reasoning about nature and in setting up and solving textbook-level problems.
- Critically evaluate the soundness and precision of their own reasoning and answers, explain and interpret their solutions to problems in a way that shows understanding, and

identify and appraise the range of applicability of their results, and state the limitations of their solutions.

- Apply the skills above to successfully solve textbook-level problems with numeric, symbolic, or conceptual answers.

Learning outcomes are assessed by means of 3 common exams, a final exam, scores on homework assignments, in-class quizzes, and class participation scores.

Materials for Physics 121

- Textbook (Abbreviation: Y&F): “University Physics”, 13th Edition, authors Young & Freedman (Pearson, 2012). We use Chapters 21 to 31 in Volume 2. The 13th edition is available as an E-text sold online or at the NJIT bookstore bundled with an access code good for the 13th edition homework system. The ISBN is 9780321741257. Used hard copies will be available at the bookstore and/or from online booksellers; there will be no new hard copies of the 13th edition text. Many students are comfortable using only the e-text. We are not using the newer 14th or 15th editions of this text this term.
- Mastering Physics Online Homework System: Each student must obtain an access code kit that allows access to the online homework system specifically for the 13th edition of “University Physics”. In addition to having a valid access code, each student must enroll in the Mastering Physics (MP) “course” for his/her Physics 121 section using a course identifier code to be supplied by each instructor. Homework assignments will be posted on-line in Mastering Physics and will be automatically graded. Specific information will be available directly from all the instructors, and/or their web sites. The access code kit must be for the 13th edition specifically.
- The older “Mastering Physics” platform that we are using (the one you may have used in previous terms) is reached for login using the following url: <http://www.masteringphysics.com>. We are NOT using the newly-introduced “Modified Mastering Physics” platform, reached through a different url.
- Classroom Response System called “iClickers”: Each student needs an “iClicker” (about \$40 at the bookstore). Used models are OK but preferably with an LED; some older clickers have illegible ID’s (an 8 character string on the back) so check before buying. Bring your clicker to each class.
- NJIT Canvas System: lecture notes, problems, grades, etc. are posted on Canvas (PHYS 121014). So check there often.

Grading

Final Letter Grades will be based on a **term average** for the semester’s work that includes the three common exam scores, the final exam, the term’s homework score, in-class quiz scores, and participation measures for clicker use and attendance. Here are the approximate weights to be used for calculating term averages:

- **48%** for all three common exams (16% each)
- **32%** for the final exam
- **20%** for the total of homework plus short in-class quizzes plus participation measures, with the 20% value distributed at each instructors' discretion and announced during the first week of class. Provisionally, the homework assignments weigh 10% and class participation (in-class quizzes and clickers) 10%. Both traditional paper-based and clicker-style quizzes will be given and counted toward your grades (10%). Quizzes will be given typically on Thursdays to briefly review what was covered in the previous week. In most cases, a couple of conceptual questions will be asked.
- The conversion of term average values to letter grades will use the following cutoff values:
- **85% for A, 75% for B+, 65% for B, 56% for C+, 50% for C, and D or F below 50%.**

Examinations

There will be three multiple choice Common Exams plus a comprehensive multiple choice Final Exam. Extra credit problems will not be offered on any of these. The schedule is:

- Common Exam 1: Monday, February 24 4:15 – 5:45 PM
- Common Exam 2: Monday, March 30 4:15 – 5:45 PM
- Common Exam 3: Monday, April 13 4:15 – 5:45 PM
- Comprehensive Final Exam after May 8 5 hours long

The final exam will emphasize the work covered after common exam 3, but also re-caps the whole course. In-class quizzes covering preceding or current work may be given during lectures and/or recitations, and the grades may count toward your final course grade. There will be no make-up quizzes and normally no make-up common exams.

Missed Exams

Students who miss a common exam will receive a score of zero for that exam unless they present a valid excuse within 7 days of the exam. Students expecting to be absent from a common exam should discuss their situation with their instructor **PRIOR TO** their absence. Students who miss two or more common exams automatically fail the course unless they have acceptable excuses. In order to qualify for a (rare) "make-up" common exam a student needs to document the reason for not being able to take the test as scheduled (due for example to an exam conflict or documented illness). NJIT policy requires the documentation to be presented to a student's Physics 121 instructor **AND** to the Dean of Students, both of whom must agree to permit a "make-up" exam. Conflict common exams are usually held from 6:00 to 7:30 PM on exam days; contact Ms. Oertel (christine.a.oertel@njit.edu) for arrangements.

Course Policies

Honor Code Violations or Disruptive Behavior: NJIT has a zero-tolerance policy for cheating of any kind and for disruptive student behavior. Violations will be reported to and judged by the Dean of Students. The penalties range from failure in the course plus disciplinary probation up to expulsion from NJIT. Avoid situations where your own behavior could be misinterpreted as dishonorable.

- Students are required to agree to the NJIT Honor Code on each exam.
- Turn off all phones, wireless devices, laptops, and messaging devices of all kinds during classes and exams.
- Please do not eat, drink, or create noise in class that interferes with the work of other students or instructors.

Attendance will be taken at all classes and exams. More than 3 unexcused absences (in total) is excessive. If you have excusable absences contact your instructor or the Dean of Students (973.596.3466, Room 255 Campus Center). Students may sign in only for themselves on attendance sheets; do not sign in for absent students.

Withdrawal: If you must withdraw from the course, do it officially through the Registrar before the last withdrawal date. If you simply stop attending and taking exams your instructor will have to assign a failing grade in the course.

Course Work

The Class Schedule (see below) lists the topics covered, text readings, and homework assignments, exam dates, etc. week by week throughout the term. Some details may be subject to change depending on the class schedule. Be sure to do the homework problems: it is almost impossible to succeed in physics courses without working a lot of problems. It will not help to use someone else's solutions. It can help to form study groups so long as each group member participates in real discussion and independent thought.

Each weekly work unit starts with a lecture and includes a related homework assignment. Some of the homework problems will usually be covered in recitation class and the final HW submit deadline is typically about a week after material is introduced in lecture class.

- Read the assigned sections of the text before the lecture covering that material.
- Read the instructor's lecture notes before class (if provided) and bring them to class.
- Work on homework problems before they are covered in recitation and certainly before they are due.
- The Mastering Physics online system shows the applicable homework due dates and keeps track of scores.

- Students will receive 5% reduction per day in homework score for late submission

Practice Problems: “Practice problems” (abbreviated “PP”) are posted for each week. These are the solved homework assignments from two earlier textbooks. They are referred to as **PP01** for week 01, **PP02** for week 02, etc. You can find them under Fall 2019 Physics 121 on Janow’s web site (<http://web.njit.edu/~janow>). These problems are solely for your practice and will not be counted toward your grade.

Class Participation: Students are expected to initiate and participate in class discussions by asking and answering questions, participating in clicker exercises, working actively with others during in-class group assignments. When students participate in an active learning environment they become more engaged, learn more, enjoy the course more, and have better success in the course.

Specific Information for the Mastering Physics (MP) homework system:

- You need a valid Mastering Physics account and access code to sign up for the course your instructor sets up on MP. Your instructor will announce the course identifier for you to use when enrolling in your specific class. Use your NJIT email address as the logon ID for your account. Input your name exactly as it appears on NJIT’s records: last name first, followed by a comma and your first and possibly middle name. Likewise, enter your 9 digit NJIT ID where indicated.
- For your own reference, record the unique course identifier announced by your instructor, and your login ID and password. Instructors cannot access forgotten logins or passwords.

Help: If you are having trouble in this course visit or email your instructor; do not simply hope for a miracle and fall further behind. All instructors hold office hours (see above) and will also meet with students at other mutually convenient times.

Tutoring: The Physics Dept usually provides drop-in tutoring on a regular schedule (to be posted). More information will be available from your instructor or the Physics Department office on the 4th floor of Tiernan shortly after the term starts. Physics tutoring is also available through the Learning Centers.

Academic Support and Students Affairs, Academic Advising Centers: These organizations assist students who need to make academic decisions, sometimes needing support to progress toward successful graduation.

Physics 121 (Section 014) Class Schedule for Spring 2020

** PP = Solved practice problems posted on <http://web.njit.edu/~janow> (then navigate)

Date	Topics	Text (Y&F) Readings	Recitations & Assignments** (exact due dates to be announced)
------	--------	------------------------	---

1/21, 1/23	Lecture 01: Vectors, Intro to Fields Lecture 02: Electric Charge & Force	Instructor Notes Sec. 21.1 – 3	Use recitation periods for Lecture 01 & Lecture 02 Begin HW01, HW02, PP02
1/28, 1/30	Lecture 03: Electric Field	Sec. 21.4 – 7	Recitations: HW01/02 Two Assignments Begin HW03, PP03 Quiz #1
2/4, 2/6	Lecture 04: Gauss' Law	Sec. 22.1 – 5	Recitations: HW03. Begin HW04, PP04 Quiz #2
2/11, 2/13	Lecture 05: Electric Potential	Sec. 23.1 – 5	Recitations: HW04. Begin HW05, PP05 Quiz #3
2/18, 2/20	Lecture 06: Capacitance	Sec. 24.1 – 6	Recitations: HW05. Begin HW06, PP06
2/24 (Monday, 04:15 – 5:45 P. M.)	Common Exam 1		Covers Lectures + HWs 01, 02, 03, 04 Vectors & Fields + Ch. 21 + Ch 22
2/25, 2/27	Lecture 07: Current, Resistance, DC Circuits, Intro to Kirchoff's Rules	Sec. 25.1 - 5, Sec. 26.1 – 2	Recitations: HW06. Begin HW07, PP07 & PP08A Quiz #4

3/3, 3/5	Lecture 08: Multi-loop and RC Circuits	Sec. 26.2 – 5	Recitations: HW07. Begin HW08, PP08B Quiz #5
3/10, 3/12* (3/12 class cancelled due to COVID-19 Outbreak)	Lecture 09: Charges & Currents in Magnetic Fields	Sec. 27.1 – 8	Recitations: HW08. Begin HW09, PP09 Quiz #6
March 15 to March 22 Spring Break	No Class	Spring Break	
3/24, 3/26	Lecture 10: Sources of Magnetic Field. The Biot-Savart Law, Amperes Law	Sec. 28.1- 7	Virtual class begins. Recitations: HW09 Begin HW10, PP10 Quiz #7
3/30 (Monday, 04:15 – 5:45 P. M.)	Common Exam 2 (Cancelled)		Covers Lectures + HWs 05, 06, 07 Chapters 23, 24, 25, & 26.1
3/31, 4/2	Lecture 11: Faraday's Law of Induction	Sec. 29.1 – 5	Recitations: HW10. Begin HW11, PP11 Quiz #8
Friday, April 10	No Class	Good Friday Holiday	

4/7, 4/9	Lecture 12: Inductance, RL Circuits	Sec. 30.1 – 4	Recitations: pre-empted by holiday Begin HW12, PP12. Quiz #9
4/13 (Monday, 04:15 – 5:45 P. M.)	Common Exam 2/3		Covers Lectures & HW 05-10 Chapters 23, 24, 25, 26, 27, 28
4/14, 4/16	Lecture 13: LC & LCR Circuits, EM Oscillations, AC Circuits	Sec. 30.5 - 6 Sec. 31.1 – 2	Recitations: HW11 Begin HW13, PP13 Quiz #10
4/21, 4/23	April 21 to April 27 Lecture 14: AC Circuits, Resonance	Sec. 31.3 - 6	Recitations: HW 12 Begin HW14, PP14 Quiz #11
4/28, 4/30	April 28 to May 05 Use final periods as Recitation 13 and 14. Follow Friday schedule on May 05	Sec. 31.3 - 6	Recitations: HW13, 14. Last classes on Tuesday May 05
5/5	Friday classes meet.		
5/6, 5/7	Reading Days	No classes	Review Sessions

5/8 - 5/14	Final Exams (Tue, 5/12, 2:30-5:00PM, TIER111)		Comprehensive final exam: Chapters 21 - 31
------------	--	--	---
