This Syllabus is brought to you for free and open access by the NJIT Syllabi at Digital Commons @ NJIT. It has been accepted for inclusion in Civil and Environmental Engineering Syllabi by an authorized administrator of Digital Commons @ NJIT. For more information, please contact digitalcommons@njit.edu.

CE 341 Principles of Geotechnical Engineering

Fall 2019

Section: 001

Prerequisite: <u>MECH 237</u> with a grade of C or better or equivalent. Corequisite: <u>CE 341A</u>. A study of soil types and properties is made with the objective of developing a basic understanding of soil behavior. The methods of subsurface investigation and compaction are presented. Fundamentals pertaining to permeability, seepage, consolidation, and shear strength are introduced. Settlement analysis is also presented. Lab must be taken concurrently.

"Academic Integrity is the cornerstone of higher education and is central to the ideals of this course and the university. Cheating is strictly prohibited and devalues the degree that you are working on. As a member of the NJIT community, it is your responsibility to protect your educational investment by knowing and following the academic code of integrity policy that is found at:

http://www5.njit.edu/policies/sites/policies/files/academic-integrity-code.pdf.

Please note that it is my professional obligation and responsibility to report any academic misconduct to the Dean of Students Office. Any student found in violation of the code by cheating, plagiarizing or using any online software inappropriately will result in disciplinary action. This may include a failing grade of F, and/or suspension or dismissal from the university. If you have any questions about the code of Academic Integrity, please contact the Dean of Students Office at dos@njit.edu

		, , , , , ,	17.14
			HW - Study for Final
12/16		Final Exam	Final Exam , Chapters
			11,12 and 17

Lecture	Subjects to be Covered	
Lecture 1	Chapter 1 Introduction and Origin of Soils	
Lectures 2 & 4	Chapters 2 and 4 Particle Size and Plasticity	
Lectures 5 & 6	Chapter 5 Soil Classification	
Lectures 7 & 8	Chapter 3 Phase Relationships	

Lectures 9 & 10	Chapter 6	Compaction
Lecture 11	Exam #1	(Chapters 1-6)
Lecture 12-14	Chapters 7 & 8	Permeability/Conductivity and Seepage/Drainage

Lecture 15-16	Chapter 9	Effective Stress
Lecture 17-18	Chapter 10	Stress Distribution
Lecture 19	Exam #2	(Chapters 7-10)
Lecture 20-23	Chapter 11	Consolidation
Lecture 24-27	Chapter 12	Shear Strength
Lecture 28	Chapter 17	Subsurface Exploration
	Final Exam (Chapters 11,12 and 17)	

Course: Soil Mechanics (CE 341), Soil Mechanics Lab Taken Concurrently CE341A)

Instructor: Andrew J. Ciancia, PE

Text: Re: Das and Sobhan, 9th Edition, "Principles of Geotechnical Engineering", 2014

Grading Procedure

Attendance, Class Participation, and Quizzes 10% Homework Problems 15% (Late HW submittals are not accepted) Exam 1 - 25%, Exam #2- 25% Final Exam 25%

Both exams are open book. However, only your book, class notes, HW problems, and a stand-alone calculator maybe used for exams. No solutions manuals, cell phones or computers are permitted.

POLICIES

- The NJIT Honor Code will be upheld and any violations will be brought to the immediate attention of Dean of Students.
- Students will be notified by the instructor to any modifications or deviations from the syllabus throughout the semester.
- Absence from 4 or more weeks will result in a failing grade for the course.
- Make sure that your email address stated in Moodle is correct and you are using it regularly. Communication from the instructor will be sent only to the NJIT e-mail address.
- Always bring your text book, a calculator and writing paper to class.
- All material handed out or discussed in class by the instructor will be part of course material and students will be responsible for studying them in addition to the prescribed sections of the text book.
- Homework/projects must be done on $8\frac{1}{2}$ " × 11" engineering calculation paper, in a manner consistent with professional engineering calculation in practice.
- Electronic versions of homework will not be accepted.
- Please keep a copy of all your work until you received a final grade.
- Please save a copy of your homework before submitting it to the instructor, since it may not be always possible for the instructor to return the corrected homework back in time for you to study for quizzes and examinations.
- All work should be done in a professional manner.
- Homework is due at the beginning of class. Late homework will incur a 50% deduction if handed in the same day, and 100% deduction after that. **Online submissions will not be accepted.**
- The instructor may photocopy and save your assignments and tests, as part of the effort necessary to renew accreditation of our educational programs. The copies, which will be accessible only to faculty, administration, and external reviewers, will be destroyed afterwards.
- No make-up examination will be administered.
- Switch off laptops and cell phones during quizzes and examinations. Plan on bringing a watch to keep time during examinations.
- No recording devices shall be used during

class or examinations. Take notes.

BASIS OF GRADING

Strategies, Actions and Assignments	ABET Student Outcomes (1-7)	Program Educational Objectives	Assessment Measures
Student Learning Outcome develop the ability to apply t		_	nciples of soil mechanics and ring.
Introduce index properties of soils and subsurface investigations.	1	1	Homework, quizzes and exams.
Explore subsurface methods of investigation in design.	1	1, 2	Homework, quizzes, and problem solving in class.
Discuss professional design practice.	2, 7	1, 2	Class discussions and problem solving. Quizzes and exams.
Student Learning Outcome Introduce basic concepts and flow through soils. Apply these principles to	2: Apply principles of s 1 1, 2	seepage through porous med	Homework, quizzes and exams Homework, quizzes, and
problem solving. Discuss application of these principles to engineering	2	1	problem solving in class. Class discussions and problem solving. Quizzes and exams.

2 Exams	50 points
Final Exam	25 points
Homework	15 points
Quizzes, Class Participation.	10 points
Total	100 points

Final Score	Grade
Above 90	Α
89-85	B+
84-80	В
79-75	C+
74-70	С
69-65	D
64 and Below	F

Introduce consolidation	1	1	Homework, quizzes, and exams.
theory and shear strength			
principles			
Discuss analytical methods	2	1	Homework, quizzes, and
to solve different types of			problem solving in class.
settlement problems.			
Discuss professional design	2, 4	1, 2	Class discussions, problem
practice.			analyses, and problem solving.

CEE Mission, Program Educational Objectives and Student Outcomes

The mission of the Department of Civil and Environmental Engineering is:

- to educate a diverse student body to be employed in the engineering profession
- to encourage research and scholarship among our faculty and students
- to promote service to the engineering profession and society

Our program educational objectives are reflected in the achievements of our recent alumni:

- <u>1 Engineering Practice:</u> Alumni will successfully engage in the practice of civil engineering within industry, government, and private practice, working toward sustainable solutions in a wide array of technical specialties including construction, environmental, geotechnical, structural, transportation, and water resources.
- <u>2 Professional Growth:</u> Alumni will advance their skills through professional growth and development activities such as graduate study in engineering, research and development, professional registration and continuing education; some graduates will transition into other professional fields such as business and law through further education.
- <u>3 Service:</u> Alumni will perform service to society and the engineering profession through membership and participation in professional societies, government, educational institutions, civic organizations, charitable giving and other humanitarian endeavors.

Our Student Outcomes are what students are expected to know and be able to do by the time of their graduation:

- 1. an ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
- 2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
- 3. an ability to communicate effectively with a range of audiences
- 4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts
- 5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
- 6. an ability to develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions
- 7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Revised: 2/13/18
