This Syllabus is brought to you for free and open access by the NJIT Syllabi at Digital Commons @ NJIT. It has been accepted for inclusion in Physics Syllabi by an authorized administrator of Digital Commons @ NJIT. For more information, please contact [digitalcommons@njit.edu](mailto:digitalcommons@njit.edu).

# Physics 121 (Section 002) Course Syllabus – Spring 2021

Time: Mondays 2:30 pm- 03:50 pm and Fridays 07:30 am – 08:50 am

Room: Virtual/webex

Delivery Mode: Synchronous Online (NJIT Definition: Delivery of instruction in which all course can be completed online through the learning management system, canvas/webex in our case, where students are expected to participate in the class at the day and time specified above)

## Instructor Information

Esmeralda Vataj, PhD

Email: [ev96@njit.edu](mailto:ev96@njit.edu)

Office: 454 Tiernan

Office Hours: Fridays 09.00am-10:20am, other times by appointment

Mastering Physics Course ID **vataj21250**

## General Information

- Description: Physics 121 is a calculus-based introduction to electricity and magnetism, emphasizing fundamental concepts and applications. It is the second course in a three-course sequence.
- Pre-requisites (all with grade of C or better): Physics 111 or 111H, and Math 111 or 111H.
- Co-requisites: Physics 121A (the lab course) and Math 112 (Calculus-II).

## Learning Expectations, Goals, Outcomes

Students will be expected to demonstrate understanding and mastery of calculus-based classical electricity and magnetism up to AC circuits, not including Maxwell's Equations or beyond. The topics covered include electric charge, electric and magnetic fields, forces on stationary and moving charges and currents due to electrostatic and magnetic fields, electrostatic potential and potential energy, Gauss' Law, capacitance, current, resistance, DC circuits, the Biot-Savart Law, Ampere's Law, Faraday's Law, inductance, RC circuits, LR circuits, LCR circuits, AC circuits including "phasor diagrams" and resonant oscillations.

In any/all of the above subject areas, students should be able to do the following:

- Recall and use the conceptual and mathematical definitions and be able to explain them.
- Understand the conceptual and mathematical relationships between quantities used.
- Explain and manipulate equations and techniques developed in the text, lectures, problem examples, and in the course of working problems.
- Use symmetry arguments, sketches and diagrams, graphs, algebra, trigonometry, and basic integral and differential calculus methods for reasoning about nature and in setting up and solving textbook-level problems.
- Critically evaluate the soundness and precision of their own reasoning and answers, explain and interpret their solutions to problems in a way that shows understanding, and identify and appraise the range of applicability of their results, and state the limitations of their solutions.
- Apply the skills above to successfully solve textbook-level problems with numeric, symbolic, or conceptual answers.

Learning outcomes are assessed by means of midterm, a final exam, scores on homework assignments, in-class quizzes.

## Materials for Physics 121

- Textbook (Abbreviation: Y&F): “University Physics”, 15th Edition, authors Young & Freedman (Pearson, 2020). We use Chapters 21 to 31 in Volume 2. Most students now buy the e-text, which is bundled with the Modified Mastering Physics homework system. The ISBN is 978-0135159552.
- Mastering Physics Online Homework System: Each student must obtain an access code kit that allows access to the online homework system specifically for the 15<sup>th</sup> edition of “University Physics”. In addition to having a valid access code, each student must enroll in the Mastering Physics (MP) “course” for her/his Physics 121 section using a course identifier code supplied by each instructor. Homework assignments will be posted on-line in Mastering Physics and will be automatically graded. Specific information will be available directly from all the instructors, and/or their web sites. The access code kit must be for the 15<sup>th</sup> edition specifically.
- NJIT Canvas System: lecture notes, problems, grades, etc. are posted on. So check there often.

## Grading

Final Letter Grades:

- **25%** Midterm
- **32%** for the final exam
- **20%** for the total of homework
- **23%** Quizzes
- The conversion of term average values to letter grades will use the following cutoff values: **85% for A, 75% for B+, 65% for B, 56% for C+, 50% for C, 45% D and F below 40%.**

## Examinations

- Midterm: Monday, April 5, 2021, 4:15 – 5:45 PM
- Weekly in class only Quizzes
- Comprehensive Final Exam 2.5 hours long

The final exam will emphasize the work covered after midterm, but also re-caps the whole course.

**The exams will be administrated virtually: no face-to-face exam session. You can choose your preferred place to take the exams.** Brief oral test sessions following the regular exams may be given to mitigate any negative impacts incurred by the new mode of delivery due to COVID-19.

## Physics Department Policy on students missing a common exam or exam

(<https://physics.njit.edu/common-and-final-exams> at the end of the page)

If a student has to miss a common exam or exam due to illness or personal reasons, the student must go to the Office of the Dean of Students to get an official excuse and notify the course instructor. If the excuse is granted by the Office of the Dean of Students, a notice will be sent to

the Physics instructor and the student will be excused from the common exam or exam. The Physics Department will follow the course policy to generate a 'make up' grade based on the common exam material which is on the final exam.

## **Course Policies**

**Honor Code Violations or Disruptive Behavior:** NJIT has a zero-tolerance policy for cheating of any kind and for disruptive student behavior. Violations will be reported to and judged by the Dean of Students. The penalties range from failure in the course plus disciplinary probation up to expulsion from NJIT. Avoid situations where your own behavior could be misinterpreted as dishonorable.

- Students are required to agree to the NJIT Honor Code on each exam.
- Turn off all phones, wireless devices, laptops, and messaging devices of all kinds during classes and exams.
- Please do not eat, drink, or create noise in class that interferes with the work of other students or instructors.
- Needless to say, do not contact any “tutoring services” for help during an exam.

**Attendance** will be taken at all classes and exams.

**Withdrawal:** If you must withdraw from the course, do it officially through the Registrar before the last withdrawal date. If you simply stop attending and taking exams your instructor will have to assign a failing grade in the course.

## **Course Work**

The Class Schedule (see below) lists the topics covered, text readings, and homework assignments, exam dates, etc. week by week throughout the term. Some details may be subject to change depending on the class schedule. Be sure to do the homework problems: it is almost impossible to succeed in physics courses without working a lot of problems. It will not help to use someone else's solutions. It can help to form study groups so long as each group member participates in real discussion and independent thought.

Each weekly work unit starts with a lecture and includes a related homework assignment. Some of the homework problems will usually be covered in recitation class and the final HW submit deadline is typically about a week after material is introduced in lecture class.

- Read the assigned sections of the text before the lecture covering that material.
- Read the instructor's lecture notes before class (if provided) and bring them to class.
- Work on homework problems before they are covered in recitation and certainly before they are due.
- The Mastering Physics online system shows the applicable homework due dates and keeps track of scores.

**Class Participation:** Students are expected to initiate and participate in class discussions by asking and answering questions, doing quizzes, working actively with others during in-class group assignments. When students participate in an active learning environment they become more engaged, learn more, enjoy the course more, and have better success in the course.

**Specific Information for the Mastering Physics (MP) homework system:**

- You need a valid Mastering Physics account and access code (written above) to sign up for the course your instructor sets up on MP. Your instructor will announce the course identifier for you to use when enrolling in your specific class. Use your NJIT email address as the logon ID for your account. Input your name exactly as it appears on NJIT's records: last name first, followed by a comma and your first and possibly middle name. Likewise, enter your 9 digit NJIT ID where indicated.
- For your own reference, record the unique course identifier announced by your instructor, and your login ID and password. Instructors cannot access forgotten logins or passwords.

**Help:** If you are having trouble in this course visit or email your instructor; do not simply hope for a miracle and fall further behind. All instructors hold office hours (see above) and will also meet with students at other mutually convenient times.

**Tutoring:** Updates and webex links to tutoring are posted on: <https://physics.njit.edu/physics-tutoring-sign-sheet>

**Academic Support and Students Affairs, Academic Advising Centers:** These organizations assist students who need to make academic decisions, sometimes needing support to progress toward successful graduation.

### **Special Instructions**

Refer to COVID-19 Code of Student Conduct Rules and Regulation.

Week of	Lecture Topics and Classes	Text (Y&F) Readings	Assignments
Jan 18 Jan 22	Jan 18, No class Lecture 01: Vectors, Intro to Fields Lecture 02: Electric Charge & Force	Instructor Notes Sec. 21.1 – 3	Use some recitation periods for Lecture 01 & Lecture 02 Begin HW01, HW02
Jan 25 Jan 29	Lecture 03: Electric Field	Sec. 21.4 – 7	Begin HW03
Feb 1 Feb 5	Lecture 04: Gauss' Law	Sec. 22.1 – 5	Begin HW04
Feb 8 Feb 12	Lecture 05: Electric Potential	Sec. 23.1 – 5	Begin HW05
Feb 15 Feb 19	Lecture 06: Capacitance	Sec. 24.1 – 6	Begin HW06
Feb 22 Feb 26	Lecture 07: Current, Resistance, DC Circuits, Intro to Kirchoff's Rules	Sec. 25.1 – 5, Sec. 26.1 – 2	Begin HW07
March 1 March 5	Lecture 08: Multi-loop and RC Circuits	Sec. 26.2 – 5	Begin HW08
March 8 March 12	Lecture 09: Charges & Currents in Magnetic Fields	Sec. 27.1 – 8	Begin HW09
March 22 March 26	Lecture 10: Sources of Magnetic Field. The Biot-Savart Law, Amperes Law	Sec. 28.1- 7	Begin HW10
March 29	Review Midterm; Friday April 2: No classes		
	<b><u>Midterm: April 5 2021</u></b>	<b><u>Chapters 21-26</u></b>	<b><u>Lecture 1-8</u></b>
April 5 April 9	Lecture 11: Faraday's Law of Induction	Sec. 29.1 – 5	Begin HW11

April 12 April 16	Lecture 12: Inductance, RL Circuits	Sec. 30.1 – 4	Begin HW12
April 19 April 23	Lecture 13: LC & LCR Circuits, EM Oscillations, AC Circuits	Sec. 30.5 - 6 Sec. 31.1 – 2	Begin HW13
April 26 April 30	Lecture 14: AC Circuits, Resonance	Sec. 31.3 - 6	Begin HW14
May 3 May 4	Review for final exam		
	May 4: Friday classes meet	Last day of classes	
	Reading Days: May 5-6	No classes	
	<b><u>Final Exam: May 7-13</u></b>	<b><u>Chapters 21 - 31</u></b>	<b><u>Comprehensive final exam: Chapters 21 - 31</u></b>

### Spring 2021 Academic Calendar

January	18	Monday	Martin Luther King, Jr. Day
January	19	Tuesday	First Day of Classes
January	23	Saturday	Saturday Classes Begin
January	25	Monday	Last Day to Add/Drop a Class
January	25	Monday	Last Day for 100% Refund, Full or Partial Withdrawal
January	26	Tuesday	W Grades Posted for Course Withdrawals
February	2	Tuesday	Last Day for 90% Refund, Full or Partial Withdrawal – No Refund for Partial Withdrawal after this date
February	15	Monday	Last Day for 50% Refund, Full Withdrawal
March	8	Monday	Last Day for 25% Refund, Full Withdrawal
March	14	Sunday	Spring Recess Begins - No Classes Scheduled - University Open
March	21	Sunday	Spring Recess Ends

April	2	Friday	Good Friday - No Classes Scheduled - University Closed
April	5	Monday	Last Day to Withdraw
May	4	Tuesday	Friday Classes Meet
May	4	Tuesday	Last Day of Classes
May	5	Wednesday	Reading Day 1
May	6	Thursday	Reading Day 2
May	7	Friday	Final Exams Begin
May	13	Thursday	Final Exams End
May	15	Saturday	Final Grades Due
