This Syllabus is brought to you for free and open access by the NJIT Syllabi at Digital Commons @ NJIT. It has been accepted for inclusion in Chemistry, Environmental and Forensic Science Syllabi by an authorized administrator of Digital Commons @ NJIT. For more information, please contact digitalcommons@njit.edu.

CHEM 244A-002: Organic Chemistry II Laboratory
Spring 2022 Course Syllabus

COURSE INFORMATION

Course Description: This course is designed to acquaint and educate students on the basics of organic preparations and analytical techniques such as distillations, sublimations, purifications of products, liquid-liquid extractions and preparation of organic compounds. The experiments will also help students to understand and learn the instrumental analytical techniques including gas chromatography, thin layer chromatography, infrared-, and UV spectroscopy.

It will be to the student's advantage to continue to read and reread the chapters in their textbooks on laboratory experiments throughout the semester. The laboratory professor or teaching assistant (TA) will usually explain and/or demonstrate these experiments. Students are encouraged to ask questions before it is too late and the mistakes have already been committed.

Number of Credits: 2

Prerequisite: CHEM 124 with a grade of C or higher and CHEM 243 - Organic Chemistry I

Co-requisite: CHEM 244 – Organic Chemistry II

Instructor: Dr. Sagar Roy;
Email: sagar.roy@njit.edu

Laboratory Time & Location: Thursday 8:30 AM – 12:05 PM; Tiernan Hall, Room No- 207

Online: Laboratory lectures will happen at the scheduled laboratory time, via Webex at the following address: <https://njit.webex.com/meet/sagar> or 922 061 566.

Office Hours: With an appointment
Please send an email to schedule an appointment.

If you need assistance and wish to discuss with your instructor, please email to schedule a Webex meeting. I will be more than happy to help.

Required textbook: CHEM 244A, Organic Chemistry II Laboratory Manual, available from the at the NJIT book store for \$20.

Other required material:

- Hard-cover laboratory notebook
- Lab coat (white color, available online)
- Safety goggles (available at the NJIT Bookstore or Home Depot)
- Disposable nitrile gloves (available online or at Home Depot)

Students are **RESPONSIBLE** of bringing their own PPE (Lab Coat, Safety Goggles & Nitrile Gloves) to the lab.

COURSE OUTLINE

Week	Topic	Lab report due
1.	Check-in and safety lecture	
2.	Experiment #2: Pinacolone reduction	
3.	Experiment #2, part 2	
4.	Experiment #3: Pinacol alcohol dehydration	#2
5.	Experiment #3, part 2	
6.	Experiment #4: Esterification	#3
7.	Experiment #4, part 2	
8.	Quiz #1 Experiment #5: Aldol reaction	#4
9.	<i>Spring Recess</i>	
10.	Experiment #6: Aspirin synthesis	#5
11.	Experiment #1: Extraction and purification of caffeine	#6
12.	Experiment #1, part 2	
13.	Experiment #1, part 3	
14.	Quiz #2 Oral presentations Check-out	#1

Each laboratory period will begin with a 30-minute discussion of the theory and procedure of the experiment, as well as safety reminders. The questions will be discussed.

LEARNING OUTCOMES

After completing this course, students will be able to:

- Comply with safety rules in the setting of an organic chemistry laboratory.
- Identify and mitigate potential safety hazards.
- Conduct organic chemistry experiments in a safe and clean environment, and properly manage the waste generated.
- Use a laboratory notebook to record scientific experiments, from the planning stage to the observations;
- Demonstrate the ability to use organic chemistry glassware to perform techniques such as filtration, sublimation, distillation, thin-layer chromatography, etc.
- Demonstrate the ability to use analytical equipment such as IR, GC, and UV.
- Apply their knowledge of organic chemistry principles to solve problems in the laboratory.
- Analyze data and prepare high-quality laboratory reports.
- Present the results of their experiments in a professional and engaging way.

POLICIES

Academic Integrity is the cornerstone of higher education and is central to the ideals of this course and the university. Cheating is strictly prohibited and devalues the degree that you are working on. As a member of the NJIT community, it is your responsibility to protect your educational investment by knowing and following the academic code of integrity policy that is found at: <http://www5.njit.edu/policies/sites/policies/files/academic-integrity-code.pdf>.

Please note that it is my professional obligation and responsibility to report any academic misconduct to the Dean of Students Office. Any student found in violation of the code by cheating, plagiarizing or using any online software inappropriately will result in disciplinary action. This may include a failing grade of F, and/or suspension or dismissal from the university. If you have any questions about the code of Academic Integrity, please contact the Dean of Students Office at dos@njit.edu

Individual grades	
Attendance	5%
Safety and cleanliness	5%
Participation & Discussion Question	10%
Prelab	10%
Infographic assignment	10%
Quizzes	20%
Group grades	
Laboratory reports	30%
Oral presentation	10%

Grading Policy: The final grade in this course will be determined as follows*:

* may vary depending on situation

Your final letter grade in this course will be based on the following tentative curve:

A	100-90%	C	74-70%
B+	89-85%	D	69-65%
B	84-80%	F	Below 65%
C+	79-75%		

The experiments will be conducted as a group of 3-4 students, as chosen by the instructor. Laboratory reports will be a group assignment, and each group will do an oral presentation on one of the experiments at the end of the semester. Each student is however required to attend and participate in the laboratory, by recording their own notes in their laboratory notebook and helping in keeping the lab safe and clean. In addition, quizzes will be given to each student.

Attendance and laboratory notebook usage: Attendance to all laboratory sessions is mandatory. A missed laboratory session without an excused absence will result in a grade of zero (0) for that experiment. A second unexcused absence will result in a grade of zero (0) for the course. An excused absence must be obtained from the instructor before the relevant lab. An excused absence will only be granted for verifiable documented reasons of serious illness or family emergency. Students will be asked to sign the attendance sheet each week when arriving in lab.

Lateness to lab will NOT be tolerated (changes in directions/safety concerns may be given during the pre-laboratory lecture). The instructor reserves the right to dismiss you from the lab and you get a ZERO for the week. College policy states that students must notify faculty within the first three weeks of the semester if they anticipate missing any classes due to religious observance.

Students working in the same group must arrive in lab and begin the experiment at the same time. All students must remain in lab until the experiment is completed. Students working in the same group can perform the experiment together, work on calculations together, but each of them must be filling their own notebook.

See below for the guidelines to good laboratory notebook practices. The completeness and accuracy of the notebook will be checked by the instructor at the beginning of each lab, and its proper usage during the lab period will be checked before students leave.

Safety and cleanliness: Wear your safety goggles at all times while in the laboratory. Clothing that covers your legs and shoulders is required. No shorts or skirts. Everyone will be required to wear lab coats and gloves during all experiments. Closed shoes must be worn at all times. Food or drinks are not allowed in the lab. Turn off cell phones and do not use them in the lab. Properly dispose of waste materials. Clean up your workspace at the end of each lab session and wash your hands prior to leaving the laboratory.

Quizzes: There will be two quizzes during the semester, on the next laboratory period following

experiments #3, and #6. They will each be worth 10% of your grade and can cover any material or safety procedures covered in the course.

Infographic assignment: Each student will be required to prepare an engaging infographic about a chemical compound for in food or common household products. This individual assignment will be worth 10% and the exact guidelines and rubric will be sent to students via email and Canvas.

Laboratory reports: Each group must submit their lab report one week after the end of each experiment. There are 6 lab reports due and they are worth a total of 40% of the grade. The format of the laboratory report can be found below, and the exact rubric used for grading will be circulated to the students via email. Videos were recorded for most of the experiments and will be posted on Canvas on the day of the scheduled experiment. Students are expected to watch the videos, following in their lab manual, and prepare their reports using the information provided in the manual and the video.

Laboratory reports must be submitted on Canvas in .doc, .docx, or .pdf format, and will be checked for plagiarism by Turnitin.

Oral presentation: Each group will present one of the 6 experiments during a 15-20 minutes presentation during the last lab session of the semester. These presentations will occur in person, and the student groups will need to submit their presentation ahead of time. This group presentation will be worth 10% of the final grade. Detailed assignment information and grading rubric will be provided during the semester.

Email Policy: In accordance with College policy, the instructor will use your NJIT email address (@njit.edu) and Canvas to communicate with you about all course-related matters. Please make sure that you check these accounts regularly.

Make-up Laboratory or Quizzes Policy: There will be **no make-up laboratories or quizzes** during the semester. In the event that a student has a legitimate reason for missing an exam, the student should contact the Dean of Students office and present written verifiable proof of the reason for missing the laboratory and/or quiz, e.g., a doctor's note, police report, court notice, etc. clearly stating the date AND time of the mitigating problem. The student must also notify the CES Department Office/Instructor that the laboratory period will be missed so that appropriate steps can be taken to make up the grade.

In addition, any medical excuse that can be taken into consideration (after receiving confirmation from NJIT Dean of Students office) and the purpose of medical excuse is to grant student an extension on any missing class assignments or quizzes without penalty.

Syllabus modification: Any modification of this syllabus will be distributed in class and via e-mail.

Cellular Phones: All cellular phones and other electronic devices must be switched off during all lab times. Such devices must be stowed in bags during exams or quizzes.

ADDITIONAL RESOURCES

Chemistry Tutoring Center: Located in the Central King Building, Lower Level, Rm. G12. Hours of operation are Monday – Friday 10:00 am - 6:00 pm. For further information please click [here](#).

Accommodation of Disabilities: Office of Accessibility Resources and Services (***formerly known as Disability Support Services***) offers long term and temporary accommodations for undergraduate, graduate and visiting students at NJIT.

If you are in need of accommodations due to a disability please contact Chantonette Lyles, Associate Director at the Office of Accessibility Resources and Services at **973-596-5417** or via email at lyles@njit.edu. The office is located in Fenster Hall Room 260. A Letter of Accommodation Eligibility from the Office of Accessibility Resources Services office authorizing your accommodations will be required.

For further information regarding self-identification, the submission of medical documentation and additional support services provided please visit the Accessibility Resources and Services (OARS) website at <http://www5.njit.edu/studentsuccess/disability-support-services/>

Important Dates See: Spring 2022 Academic Calendar
<https://www5.njit.edu/registrar/spring-2022-academic-calendar/>

January	17	Monday	Martin Luther King, Jr. Day
January	18	Tuesday	First Day of Classes
January	22	Saturday	Saturday Classes Begin
January	24	Monday	Last Day to Add/Drop a Class
January	24	Monday	Last Day for 100% Refund, Full or Partial Withdrawal
January	25	Tuesday	W Grades Posted for Course Withdrawals
January	31	Monday	Last Day for 90% Refund, Full or Partial Withdrawal, No Refund for Partial Withdrawal after this date
February	14	Monday	Last Day for 50% Refund, Full Withdrawal
March	7	Monday	Last Day for 25% Refund, Full Withdrawal
March	14	Monday	Spring Recess Begins - No Classes Scheduled - University

			Open
March	19	Saturday	Spring Recess Ends
April	4	Monday	Last Day to Withdraw
April	15	Friday	Good Friday - No Classes Scheduled - University Closed
April	17	Sunday	Easter Sunday - No Classes Scheduled - University Closed
May	3	Tuesday	Friday Classes Meet
May	3	Tuesday	Last Day of Classes
May	4	Wednesday	Reading Day 1
May	5	Thursday	Reading Day 2
May	6	Friday	Final Exams Begin
May	12	Thursday	Final Exams End
May	14	Saturday	Final Grades Due
May		TBA	Commencement

Laboratory notebook guidelines:

This is a research journal. In it you will record exactly what you did. Below is the format you will use:

- Fill in all sections on the top of the page on every page you use.
- Before you come to class:
 - List all chemicals you will be using in the lab in your notebook. Include the chemical name, the chemical formula, and the CAS number.
 - Copy the reaction scheme
 - Make a table showing the physical properties of the reagents
 - Outline the experimental procedure, objectives and safety in your laboratory notebook.

The instructor will verify and initial this entry and your Lab Manual at the beginning of each class. Failure to complete the list and provide your lab manual will result in a maximum of 10-point penalty.

The laboratory notebook is a journal that records your activities in the lab in detail. It is written in “stream of consciousness”; that is...as it is happening. You should record:

- Everything you do in enough detail that a stranger could reproduce your work using only your lab notebook as a guide.
- All observations as you see them.
- All values including masses, lengths, pressures, volumes...etc using correct significant figures and units.
- All calculations. Any calculations should be done in your notebook. If they are done outside of class, you should submit the carbon copies of the work in the next lab session.
- Before leaving class you must:
 - Sign and date the bottom of every completed page
 - Have the instructor sign your last notebook page completed in the lab session.
 - Submit the carbon copies of your notebook pages for that lab session.

Corrections to the notebook

Mistakes will occur when recording data as you collect it. The proper way of correcting mistakes in a laboratory note is to cross out the mistake with a single or double line as seen below and initial the correct entry. Do not scribble out mistake. The mistake must be clearly readable under the line. (This is a legal requirement because laboratory notebooks are legal documents admissible as evidence in court) Cross out mistake and initial it.

Unused space on notebook page

When you are done with a page, you must draw a diagonal line through any blank unused places on the page before you sign, date and submit the carbon copy. This is also a legal requirement. It prevents anyone from adding additional information to the page after the fact.

The shift to remote and converged teaching due to the COVID-19 pandemic

The shift to remote and converged teaching due to the COVID-19 pandemic has required that both instructors and students make changes to their normal working protocols for courses. Students are asked to practice extra care and attention in regard to academic honesty, with the understanding that all cases of plagiarism, cheating, multiple submission, and unauthorized collaboration are subject to penalty. Students must properly cite and attribute all sources used for papers and assignments. Students may not collaborate on exams or assignments, directly or through virtual consultation, unless the instructor gives specific permission to do so. Posting an exam, assignment, or answers to them on an online forum (before, during, or after the due date), in addition to consulting posted materials, constitutes a violation of the university's Honesty policy. Likewise, unauthorized use of live assistance websites, including seeking "expert" help for specific questions during an exam, can be construed as a violation of the honesty policy. All students should be familiar with the **NJIT Academic Integrity Code**.
