COURSE DESCRIPTION AND OBJECTIVES:

Management tools as related to construction projects are analyzed and applied to individual projects. Emphasis is on network scheduling techniques, time-cost analysis, resource allocation and leveling, cost estimating, bidding strategy, and risk analysis. The course is divided in two key modules: Project Planning, which focuses on the development of financial and operational plans and schedules, and Project Control, which emphasizes performance measurement and control, real-time updating of project plans, control metrics and analysis.

LEARNING OUTCOMES:

Using the cases and background materials, and methodologies covered, you should be able to:

- Plan a construction project and develop realistic and efficient schedules.
- Allocate Resources and adjust usage based on time and cost constraints.
- Set up a project control environment and system.
- Understand the link between estimating and cost control systems
- Understand project performance measurement, productivity and risk analysis.

- Learn operations management, industrial systems and management science techniques applications to construction planning, scheduling and control
- Apply the range of management methods to realistic construction company and project cases.

Basis of Grading:

Class Participation 5%

Homework /Quizzes = 10%;

Midterm = 25%

Report = 30%,

Final Exam = 30%

Homework/ Quizzes:

Please submit homework in Moodle under each assignment and label per the instructor's request. Late assignments will not be accepted. No notice quizzes may be given about assigned homework.

Report:

The Term Project includes MS Project and report writing submissions. More details to follow on Moodle near Week 5.

Midterm and Final Exam:

Will be done in Moodle and you will have 2 hours since you begin the exam, make sure your computer is fully charged and you are able to do it without interruptions, extra time will not be allowed.

Honor Code:

Academic Integrity is the cornerstone of higher education and is central to the ideals of this course and the university. Cheating is strictly prohibited and devalues the degree that you are working on. As a member of the NJIT community, it is your responsibility to protect your educational investment by knowing and following the academic code of integrity policy that is found at: <http://www5.njit.edu/policies/sites/policies/files/academic-integrity-code.pdf>.

Please note that it is my professional obligation and responsibility to report any academic misconduct to the Dean of Students Office. Any student found in violation of the code by cheating, plagiarizing or using any online software inappropriately will result in disciplinary action. This may include a failing grade of F, and/or suspension or dismissal from the university. If you have any questions about the code of Academic Integrity, please contact the Dean of Students Office at dos@njit.edu OTHER REQUIREMENTS:

Students are required to have access to a computer at least once a week and the installation of software on it. Computers are free to use at any lab on the NJIT Campus.

The course requires the adoption of a computerized project planning and control system. The MS project system and MS Office are provided by NJIT free of charge, they are both required for this class! MS Project is not available for Mac computers. Students must be able to use a PC.
