This Syllabus is brought to you for free and open access by the NJIT Syllabi at Digital Commons @ NJIT. It has been accepted for inclusion in Civil and Environmental Engineering Syllabi by an authorized administrator of Digital Commons @ NJIT. For more information, please contact digitalcommons@njit.edu.

**Department of Civil and Environmental Engineering
Course Description and Outline**

**CE 342 – Geology
Sections 001 and 003**

**Fall 2020
Dr. John Schuring**

Course Objective: The course introduces the Planet Earth, including its origin, its history, its materials, and its processes. The first part of the course focuses on rocks and minerals with an emphasis on formative environments. The role of various geologic agents in shaping the surface of Earth is examined next. The student will learn how to analyze topographic maps and satellite images to identify classic geomorphic landforms and deposits. The course introduces selected applications of geology to environmental and engineering projects.

Course Texts:

A: Christiansen, E.H. and Hamblin, W.K., Dynamic Earth, An Introduction to Physical Geology, Jones and Bartlett Learning, Prentice Hall, 2015, ISBN: 978-1-4496-5984-4

B: Hamblin and Howard, Exercises in Physical Geology, 12th Edition, Prentice Hall, ISBN:0-13-144770-X.

Course Format: Each week the schedule will be sent out via email not later than Saturday am. Students will be required to view the background lecture videos posted on Canvas either before or during the “combined” Wednesday class period. Students will then participate in a live laboratory session held in Webex for their respective section. In summary:

Preview background videoss: Wed. 9:00-10:20 am **or any time before** (Sections 001 and 003)

Participate in Webex Lab Session: Wed. 11:00-12:20 (Section 003) and 12:30-1:50 (Section 001)

It is essential that students preview the Canvas videos prior to their Webex lab sessions to enhance understanding of the course material.

Term Assignment: All students are required to assemble an identified collection of rocks and minerals. Information and knowledge for this assignment will be provided throughout the course.

Honor Code: *Academic Integrity is the cornerstone of higher education and is central to the ideals of this course and the university. Cheating is strictly prohibited and devalues the degree that you are working on. As a member of the NJIT community, it is your responsibility to protect your educational investment by knowing and following the academic code of integrity policy that is found at: <http://www5.njit.edu/policies/sites/policies/files/academic-integrity-code.pdf>.*

Please note that it is my professional obligation and responsibility to report any academic misconduct to the Dean of Students Office. Any student found in violation of the code by cheating, plagiarizing or using any online software inappropriately will result in disciplinary action. This may include a failing grade of F, and/or suspension or dismissal from the university. If you have any questions about the code of Academic Integrity, please contact the Dean of Students Office at dos@njit.edu

Course Grading Basis: Labs = 40%; Final Exam = 35%; Rock Collection = 25%.

Instructor Contact: Prof. Schuring: Colton Hall, schuring@njit.edu.

Course Syllabus: *Please see next page.* Students will be consulted on any substantial changes to the course syllabus.

Course Policies:

- Homework and projects shall be submitted as pdf files through the Canvas Assignments portal.

- Homework must be submitted on or before the posted due date and time (typically Tuesday, 11:59 pm). Late assignments will automatically incur a 50% reduction in points and will not be detail graded by the instructor.
- Make-up examinations will not be administered.
- Homework and projects will be subject to the NJIT Honor Code. That is, **they must be the student's own work and written in their own words.** There is no objection to students studying in groups, but when it comes time to do the write-up, the assignment must be unique to the student. Homework that is copied from another student or other sources will be rejected and reported.

**Course Outline: CE 342 - Geology
Fall 2020**

<i>Week Beginning</i>	<i>LECTURE TOPIC</i>	<i>Assigned Reading Text (A)</i>	<i>Assigned Reading Lab Manual (B)</i>
Sept. 1	Role of Geology in Engineering; Historical Notes; Environmental Dimension; Geo Quiz	Ch. 1,2	None
Sept. 7	Earth Structure and Processes; Topographic Map Interpretation	Ch. 1,2	Pg. 81-100
Sept. 14	Introduction to Rock Collection Assignment		
Sept. 21	Minerals: The Building Blocks of Rock and Soil; Mineral Properties and Identification; Minerals with Engineering and Industrial Importance.	Ch. 3	Pg. 6-25
Sept. 28	Igneous Rocks and Processes; Intrusive and Extrusive Structures	Ch. 4	Pg. 26-40
Oct. 5	Sedimentary Rocks and Processes; Stokes Law; Diagenesis; Sedimentary Structures	Ch. 5	Pg. 44-57
Oct. 12	Metamorphic Rocks and Processes; Veins; Rock Cycle	Ch. 6	Pg. 61-70
Oct. 19	Rock Identification Chart; Rock as Construction Material	Ch. 8	Pg. 74-80
Oct. 26	Geologic Time Scale; Absolute Dating; Fossils and Mass Extinctions; Geologic History of New York Metro Area	Ch. 8	Pg. 74-80
Nov. 2	Weathering; Talus Slopes; Physiographic Provinces; Geologic Maps; Rock Engineering; Water Gaps and Wind Gaps; Rock Coring	Ch. 10, 11	Pg. 101-105; Pg. 123-128.

<i>DATE</i>	<i>LECTURE TOPIC</i>	<i>Assigned Reading Text (A)</i>	<i>Assigned Reading Lab Manual (B)</i>
Nov. 9	Global Climate Change; Glacial Systems and Deposits: Till, Glaciofluvial, and Glaciolacustrine	Ch. 14	Pg. 140-143; 151-153
Nov. 16	Plate Tectonics, Seismicity and Earthquakes; Seismic Hazards	Ch. 7, 17, 18	Pg. 216-219; 223-224
Nov. 30	Carbonate Formations and Karst Areas; Sinkhole Hazards;	Ch. 13	Pg. 129-130
Dec. 7	Rock Collection Due (no class)		
Dec. 15-21	Final Exam (Check schedule!!)		

* Laboratory Assignments include problems from Text B, as well as supplemental problems.

Outcomes Course Matrix – CE 342 – Geology

Strategies, Actions and Assignments	ABET Student Outcomes (1-7)	Program Educational Objectives	Assessment Measures
Student Learning Outcome 1: Develop an understanding of physical geological processes of the planet earth and the dynamics of how it changes.			
Introduce the rock types and importance in CE	1	1	Homework, lab identification, exams
Introduce dynamic processes and geologic hazards	1, 3	1	Homework, exams, essay
Introduce mineral resources of the Earth	1, 3	1	Homework, exams, essay

CEE Mission, Program Educational Objectives and Student Outcomes

The mission of the Department of Civil and Environmental Engineering is:

- to educate a diverse student body to be employed in the engineering profession
- to encourage research and scholarship among our faculty and students
- to promote service to the engineering profession and society

Our program educational objectives are reflected in the achievements of our recent alumni:

1 – Engineering Practice: Alumni will successfully engage in the practice of civil engineering within industry, government, and private practice, working toward sustainable solutions in a wide array of technical specialties including construction, environmental, geotechnical, structural, transportation, and water resources.

2 – Professional Growth: Alumni will advance their skills through professional growth and development activities such as graduate study in engineering, research and development, professional registration and continuing education; some graduates will transition into other professional fields such as business and law through further education.

3 – Service: Alumni will perform service to society and the engineering profession through membership and participation in professional societies, government, educational institutions, civic organizations, charitable giving and other humanitarian endeavors.

Our Student Outcomes are what students are expected to know and be able to do by the time of their graduation:

1. an ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
3. an ability to communicate effectively with a range of audiences.
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions.

7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.
