This Syllabus is brought to you for free and open access by the NJIT Syllabi at Digital Commons @ NJIT. It has been accepted for inclusion in Physics Syllabi by an authorized administrator of Digital Commons @ NJIT. For more information, please contact digitalcommons@njit.edu.

Spring 2022: PHYS 122-Section 002 + 004

Electricity and Magnetism for ECE Applications

Syllabus for Physics 122

This course is the second of the calculus-based introductory Physics series. The principal **Learning Outcomes** are to demonstrate understanding and mastery of classical electricity and magnetism up to AC circuits, not including Maxwell's Equations or beyond. The subject matter areas you will be assessed on include electric charge, electric and magnetic fields, forces on stationary and moving charges and currents due to electrostatic and magnetic fields, electrostatic potential and potential energy, Gauss' Law, capacitance, current, resistance, the Biot-Savart Law, Ampere's Law, Faraday's Law, inductance, DC, RC, LR, LCR, and AC circuits, including Phasor diagrams and resonant oscillations.

In any/all of the subject areas noted in the first section of this syllabus, you should be able to:

- Recall and use the conceptual and mathematical definitions and be able to explain them.
- Explain the conceptual and mathematical relationships between quantities used.
- Use symmetry arguments, sketches and diagrams, graphs, field maps, algebra, trigonometry, and basic integral and differential calculus methods in interpreting material using reasoned arguments and also in interpreting and setting up textbook-level problems.
- Explain and manipulate equations and techniques developed in the text, lectures, problem examples, and in the course of working problems.
- Apply the skills above to successfully solve textbook-level problems with numeric, symbolic, or conceptual answers.
- Critically evaluate the soundness and precision of your own answers, explain and interpret your solutions to problems in a way that shows understanding, and identify and appraise the range of applicability of your results, and their limitations.
- Apply conceptual and mathematical definitions including flux of vector fields, scalar potentials, and relevant line, surface and volume integral relationships to vector fields.
- Utilize dimensional arguments, scaling arguments and, limits to determine the validity of calculations.
- Solve symbolically labeled DC circuits with up to three independent currents.
- Be able to carry out algebraic manipulations with complex numbers applied to multiple loop AC circuits.
- Determine the solutions for first-order ordinary differential equations using integration.
- Solve problems with nontrivial current or charge distributions by integration.
- Determine approximate solutions for E and B for limiting cases by truncating a series expansion.
- Solve problems with numeric, symbolic, or conceptual answers. Emphasis will be placed on symbolic solutions.

Instructor: Andrew Gerrard, Professor, Director; Center for Solar Terrestrial Research, Chair, Dept. of Physics
101 Tiernan Hall, gerrard@njit.edu, <http://web.njit.edu/~gerrard>
Office hours: TBD, and other times by appointment

Class Website: <http://web.njit.edu/~gerrard>

Physics 122 Tutoring Hours: TBA

Pre-requisites (all with C grade or better): Physics 111 (111H) and Math 111 (111H), or Math 132 (Calculus-I)

Co-requisites: Physics 121A (the lab course) and Math 112 (Calculus-II) or Math 133.

[Note: Physics 121A Laboratory SHOULD be taken along with Physics 122 unless you passed it previously or have an approved exemption. It is recommended that you take the Physics 121A laboratory at the same time as the course

since the laboratory reinforces the concepts learned in the course. The Lab is otherwise a totally separate course from Physics 122 in that the lab instructors set the requirements and grades.]

Materials for Physics 122:

- **Textbook (Abbreviation: Y&F): “University Physics”, 15th Edition, authors Young & Freedman (Pearson, 2020).** We use Chapters 21 to 31 in Volume 2. Most students now buy the e-text, which is bundled with the Modified Mastering Physics homework system. The ISBN is **9780135206348**. Students may also use the old 13th and 14th editions of the same text for reading assignments, as the sections numbers match. The end-of-chapter problems are numbered differently.
- **Mastering Physics Online Homework System:** Each student must obtain an access code kit that allows use of the online homework system. In addition to using the access code, each student must enroll in the Mastering Physics course using a course identifier code: **gerrard08090**

Final Letter Grades: Will be based on a term average for the semester’s work that includes the common exam score, the final exam, in-class quizzes, and the term’s homework score. The approximate weights to be used for calculating the term average score:

- 15% for Exam 1 (in-person exam, proctored, closed book/notes, no calculator needed)
- 15% for Exam 2 (in-person exam, proctored, closed book/notes, no calculator needed)
- 15% for Exam 3 (in-person exam, proctored, closed book/notes, no calculator needed)
- 25% for the Final Exam
- 15% for homework (performed in Mastering Physics)
- 15% for class quizzes (during Recitation Sections)

The term average values used as cutoffs for various letter grades will be in the approximate range of: 85% for A, 80% for B+, 70% for B, 65 % for C+, 55% for C, and 50 % for D and < 50% for F

Examinations: There will be three semester Exams (i.e., Exam 1, Exam 2, and Exam 3) and a comprehensive Final Exam. The Exam schedule is:

- Exam 1: Monday, February 28, 2022 4:15 -- 5:45 PM
- Exam 2: Monday, March 28, 2022 4:15 -- 5:45 PM
- Exam 3: Monday, April 25, 2022 4:15 -- 5:45 PM
- Comprehensive Final Exam during Finals Week, 2.5 hours long

In-class quizzes covering preceding or current work may also be given during recitations, and the grades will count toward your final course grade. There will be no make-up quizzes and normally no make-up common exams.

Students who miss an Exam usually receive a score of zero for that exam. Students who expect to be absent from an exam should discuss their situation with their instructor **PRIOR TO** their absence. In order to qualify for a (rare) "make-up" Exam, a student needs to document the reason for not being able to take the test as scheduled. Under NJIT standard policy, the documentation should be presented to the student’s Physics 122 instructor **AND** to the Dean of Students. **BOTH** the Physics 122 instructor and the Dean of Students must concur in permitting a "make-up" Exam. Students who miss Exams and do not contact and present documentation to their instructor within 7 days of the Exam will receive a score of zero for the Exam.

Mastering Physics Homework System: You will have to create an account on the Mastering Physics system if you do not have one already. You may not be able to sign up for the course your instructor is using until you have a valid Mastering Physics access code. Therefore, acquire one early and contact your instructor if this is a problem. Your instructor will announce a Mastering Physics course identifier (**gerrard08090**) for you to use when enrolling in your specific class. Use your NJIT email address as the logon ID for your account.

The Mastering Physics login is <http://www.masteringphysics.com>. See instructions at end of document to sign-up for homework. The assignments are/will be labeled HW1 to ~HW15.

Withdrawal: If you must withdraw from the course, do it officially through the Registrar before the last withdrawal date. If you simply stop attending and stop taking exams, your instructor will have no option other than to assign a course grade of "F".

Honor Code Violations: NJIT has a zero-tolerance policy for cheating of any kind and for disruptive student behavior. Violations will be reported to the Dean of Students. The penalties range from a minimum of failure in the course plus disciplinary probation up to expulsion from NJIT. Avoid situations where your own behavior could be misinterpreted as dishonorable.

General Class Expectations:

- You should expect to spend a minimum of 2 hours in outside work for each hour spent in class each week.
- You should expect to be assessed on learning outcomes by means of three Exams, a Final Exam, in-class quizzes, and scores on homework assignments.
- Students are required to agree to the NJIT Honor Code at all times.
- Do not create distractions in class that interfere with the work of other students or instructors.
- The schedule below lists the topics covered and text readings. Do the homework problems: it is almost impossible to succeed in physics courses without working a lot of problems. The last column provides additional recommended problems to be covered in the recitation. Please work them out **BEFORE** the recitation.
- In General:
 - Read the assigned sections of the text before the lecture covering that material.
 - Submit the weekly homework assignments before they are due.
 - Do the recitation problems **BEFORE** the recitation.

TOPIC	TEXT CHAPTERS	RECITATION PROBLEMS
Week 1 (Jan 16): Gerrard has COVID		
Week 2 (Jan 23) Intro to class and settling in		
Week 3 (Jan 30): Vectors, Intro to Fields, Electric Charge, and Force	Chap. 21.1-21.3	1.26, 1.36, 1.37, 1.40, 1.82, 1.86 21.7, 21.11, 21.16, 21.75
Week 4 (Feb 6): Electric Fields	Chap. 21.4-21.7	21.22, 21.26, 21.27, 21.35, 21.50, 21.54, 21.55, 21.79, 21.84
Week 5 (Feb 13): Gauss' Law	Chap. 22.1-22.5	22.4, 22.7, 22.8, 22.9, 22.13, 22.16, 22.19 22.23, 22.31, 22.33, 22.37
Week 6 (Feb 20): Electric Potential	Chap. 23.1-23.6	23.2, 23.11, 23.16, 23.22, 23.34, 23.44, 23.59, 23.62, 23.71, 23.80
February 28, 4:15-5:45 EXAM 1 – Chaps 1, 21, 22, 23		
Week 7 (Feb 27): Capacitance	Chap. 24.1-24.6	24.5, 24.7, 24.12, 24.18, 24.21, 24.25, 24.28, 24.30, 24.39, 24.60, 24.74
Week 8 (Mar 6): Current, Resistance, DC Circuits, Intro to Kirchhoff's Rules	Chap. 25.1-25.5 Chap. 26.1-26.2	25.2, 25.9, 25.15, 25.19, 25.28, 25.32, 25.37, 25.43, 26.2, 26.8, 26.11
March 13-19, 2022, Spring Break		
Week 9 (Mar 20): Multi-Loop and RC Circuits	Chap. 26.2-26.5	26.20, 26.22, 26.23, 26.25, 26.29, 26.34, 26.42, 26.51, 26.59, 26.83
March 28, 4:15-5:45 EXAM 2 – Chaps 24, 25, 26		
Week 10 (Mar 27): Charges and Currents in Magnetic Fields	Chap. 27.1-27.8	27.3, 27.6, 27.9, 27.14, 27.17, 27.22, 27.25, 27.30, 27.31, 27.45, 27.47
Week 11 (Apr 3): Sources of Magnetic Fields, Biot-Savart Law, Ampere's Law	Chap. 28.1-28.7	28.1, 28.4, 28.9, 28.13, 28.16, 28.23, 28.29, 28.33, 28.37, 28.41
Week 12 (Apr 10): Faraday's Law of Induction	Chap. 29.1-29.5	29.1, 29.6, 29.9, 29.14, 29.20, 29.22, 29.29, 29.32, 29.35, 29.37
Week 13 (Apr 17): Inductance and RL Circuits	Chap. 30.1-30.4	30.2, 30.3, 30.6, 30.7, 30.11, 30.16, 30.19,
April 25, 4:15-5:45 EXAM 3 – Chaps 27, 28, 29, 30		
Week 14 (Apr 24): LC and LCR Circuits, EM Oscillations, AC Circuits	Chap. 30.5-30.6 Chap. 31.1-31.2	30.33, 30.34, 30.36, 30.37, 30.52, 30.59 31.1, 31.4, 31.7, 31.11, 31.12
Week 15-ish (May 1): Reading Day 1		

Student Registration Instructions

To register for **PHYS122-Spring2022**:

1. Go to <https://mlm.pearson.com/enrollment/gerrard08090>
2. Sign in with your Pearson student account or create your account.

Instructors, use or create a Pearson student account to register as a student. Don't use your instructor account.

3. Select any available access option, if asked.
 - » Enter a prepaid access code that came with your textbook or from the bookstore.
 - » Buy instant access using a credit card or PayPal.
 - » Select **Get temporary access without payment for 14 days**.
4. Select **Go to my course**.
5. Select **PHYS122-Spring2022** from My Courses.

If you contact Pearson Support, give them the course ID: `gerrard08090`

To sign in later:

1. Go to <https://mlm.pearson.com>
2. Sign in with the same Pearson account you used before.
3. Select **PHYS122-Spring2022** from My Courses.
