This Syllabus is brought to you for free and open access by the NJIT Syllabi at Digital Commons @ NJIT. It has been accepted for inclusion in Civil and Environmental Engineering Syllabi by an authorized administrator of Digital Commons @ NJIT. For more information, please contact digitalcommons@njit.edu.
MECH 234 Hybrid / Converged ENGINEERING MECHANICS: STATICS Fall 2020

Classes and Instructors: MECH 234-001, Saturday, 1:00-3:50 p.m., KUPF-210A (Theatre)
MECH 234-003, Mon., 11:00-12:20 and Sat., 10:30-11:50, KUPF-210A (Theatre)
Prof. G. Milano, P.E., milano@njit.edu, 239 Colton Hall, 973-596-5830

Teaching Assistants: Jin Fan, PhD Candidate, jf372@njit.edu
Tutoring in 423-Colton Hall - Schedule for Tutoring will be posted on the door of 423-Colton Hall. The tutoring schedule will also be emailed to you by your instructor.

Prerequisites: Phys 111, Math 112. Provides an understanding of equilibrium of particles and rigid bodies subject to concentrated and distributed forces.

Students must earn a C or better in this course to register for Strength of Materials, MECH237.

“Academic Integrity is the cornerstone of higher education and is central to the ideals of this course and the university. Cheating is strictly prohibited and devalues the degree that you are working on. As a member of the NJIT community, it is your responsibility to protect your educational investment by knowing and following the academic code of integrity policy that is found at: http://www5.njit.edu/policies/sites/policies/files/academic-integrity-code.pdf.

Please note that it is my professional obligation and responsibility to report any academic misconduct to the Dean of Students Office. Any student found in violation of the code by cheating, plagiarizing or using any online software inappropriately will result in disciplinary action. This may include a failing grade of F, and/or suspension or dismissal from the university. If you have any questions about the code of Academic Integrity, please contact the Dean of Students Office at dos@njit.edu”
Course Policies:
- Attendance is mandatory whether face-to-face or remote.
- Remote learning will be synchronized via WebEx. The link is in Canvas.
- Hybrid means that some learning will be from pre-recorded lectures available in Canvas.
- There will be NO need for electronic devices during class time in the Theatre.
  Turn OFF your cell phone and put it away.
  Put away your laptop, tablet, or any other electronic device.
- Bring your textbook to each class meeting or pages from the relevant chapter.
- Take notes. Ask questions.
- Be prepared to participate with class problem solving. Bring your calculator.

Quizzes, Exams and Grading Policies:
- There will be 3 common exams on campus to be announced later.
  Common exams will be 65% of your overall grade.
- There will be a Final Exam in week 15 during Finals Week. This will be 25% of your grade.
- Quizzes and exams must have Free-Body-Diagrams with Force Vectors shown. ALL work must be shown for full credit.
- There will be NO make-up quizzes or exams unless there is documentation provided to the Dean of Students Office to validate your absence. Such circumstances may include sickness documented by a doctor or Health Service; a receipt from your mechanic for car failure; etc.
- We do NOT drop the lowest grade.
- We do NOT curve the grades.

Homework Policies:
- Follow the syllabus and do the homework problems listed in the Syllabus
- Not all assigned problems will be collected. Only a select few will be collected randomly.
- NO late homework will be accepted. Homework should be collected on Saturdays unless otherwise announced. Have it ready to be collected at the beginning of class.
- All homework must be submitted on quadrille 8-1/2 x 11 engineering paper sold at the NJIT bookstore or equivalent sold at any office supply store. Write on ONLY the front of the paper.
- All homework MUST include a Free-Body-Diagram to show Force Vectors. All work must be shown for full credit.
- Homework copied from a solution source will NOT receive any credit.

Tutoring:
- Tutoring will be provided in room 423-Colton Hall. Additional information concerning the tutoring schedule will be provided in the class and posted on Moodle. Other tutoring should be arranged with the Teaching Assistant, Jin Fan (jf372@njit.edu).
Problems in **Blue are links** to examples from a textbook by Beer & Johnston 6th edition, found at the Reserve Desk, Library, but similar to those found in current edition with different numbers.

| 1    | Ch. 1: Introduction  
Ch. 2: Statics of Particles, Trig Method (sketch force polygon) | Study p. 2 - 15  
p. 16 - 25 | Sketch force polygon, use Law of Sines and Cosines to solve.  
Ch. 2: 2, 6, 10, 12, 15 |
| 2    | Ch. 2: Rectangular Components  
Equilibrium of a Particle | p. 29 - 34  
p. 38 – 47 | Ch. 2: 21 & 31, 23 & 32, 35  
Ch. 2: 43, 45, 47, 62 |
| 3    | Ch. 2: Forces in Space  
Forces and Equilibrium in Space Review and Summary | p. 54 - 63  
p. 67–70  
p. 76 - 79 | Ch. 2: 71 & 72, 91 & 92, 89  
Ch. 2: 100, 112  
**Helpful:** 2-66, 89 & 90, 2-114 |
| 4    | Ch. 3: Rigid Bodies:  
Equivalent System of Forces  
Scalar Products (Dot Products) | p. 84–99  
p. 105-113 | Ch. 3: 3, 7, 21, 23 and 28  
(3.11 done on “examples.htm”)  
Ch. 3: 37, 3.39 find the angle |
| 5    | Ch. 3: Couples and  
Force-Couple Systems | p. 119 – 130 | Ch. 3: 71, 73, 76, 89 |
| 6    | Ch. 3: Equivalent Systems  
Review and Summary | p. 138–152  
p. 161 – 168 | Ch. 3: 101, 102, 105, 114 |
| 7    | Ch. 4: Equilibrium of Rigid Bodies  
Equilibrium of a Two-Force Body  
Equilibrium in Three Dimension | p. 170 – 187  
p. 199 – 202  
p. 207 – 216 | Ch. 4: 4, 13, 15, 19, 27, 36  
Ch 4: 65, 71, and 3D, 91  
**Helpful:** 4.3, 12, 17, 26, 30. [43, 72, 101] |
| 8    | Ch. 6: Analysis of Structures:  
Method of Joints | p. 299 – 311 | Ch. 6: 3, 5, 9, 15, 28  
**Helpful:** 14, 27 [13, 28] |
| 9    | Ch. 6: Truss Analysis:  
Method of Sections | p. 319 – 328 | Ch. 6: 45, 49, 53, 57 |
| 10   | Ch. 6: Frames and Machines  
Review and Summary | p. 334 – 341  
p. 361 – 365 | Ch. 6: 77, 79, 89, 102, 105 |
| 11   | Ch. 5: Distributed Forces:  
Centroids and Center of Gravity | p. 232 - 245 | Ch. 5: 3, 5, 7, 9  
**Helpful:** [25, 32, 34, 79] |
| 12   | Ch. 5: Distributed Loads | p. 262–271 | Ch. 5: 68, 69, 71, 76  
**Helpful:** 5.78, 81, 83 |
| 13   | Ch. 9: Moments of Inertia  
Parallel Axis Theorem/Composites | p. 485 – 493  
p. 497 – 509 | Ch. 9: 4 and 8  
Ch. 9: 31 and 33, 36, 41 |
| 14   | Ch. 9: continued | | |
| 15   | Final Exam | Dates to be announced by Registrar at a later date. | |

**Homework to be assigned by your professor. Problems will be collected randomly per your professor. NO LATE homework can be accepted after the due date.

*Students will be informed in advance by the instructor of any modifications or deviation from the syllabus throughout the course of the semester.

Rev. 1/6/13, 9/11/13
CEE Mission, Program Educational Objectives and Student Outcomes

The mission of the Department of Civil and Environmental Engineering is:
- to educate a diverse student body to be employed in the engineering profession
- to encourage research and scholarship among our faculty and students
- to promote service to the engineering profession and society

Our program educational objectives are reflected in the achievements of our recent alumni.

1 - Engineering Practice: Alumni will successfully engage in the practice of civil engineering within industry, government, and private practice, working toward sustainable solutions in a wide array of technical specialties including construction, environmental, geotechnical, structural, transportation, and water resources.

2 - Professional Growth: Alumni will advance their skills through professional growth and development activities such as graduate study in engineering, professional registration, and continuing education; some graduates will transition into other professional fields such as business and law through further education.

3 - Service: Alumni will perform service to society and the engineering profession through membership and participation in professional societies, government, educational institutions, civic organizations, and humanitarian endeavors.

Our student outcomes are what students are expected to know and be able to do by the time of their graduation:

1. an ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering and make informed judgments which must consider the impact of engineering solutions in global, economic, environmental and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies
