This Syllabus is brought to you for free and open access by the NJIT Syllabi at Digital Commons @ NJIT. It has been accepted for inclusion in Mechanical and Industrial Engineering Syllabi by an authorized administrator of Digital Commons @ NJIT. For more information, please contact [digitalcommons@njit.edu](mailto:digitalcommons@njit.edu).

## ME 315-001 – Stress Analysis

### **Meeting Times & Location:**

T, Th 10:00 – 11:20am  
ME 221

### **Course Description:**

ME315 is an introductory course in stress analysis in mechanical design

### **Prerequisites:**

ME215, Mech237, Math222

### **Textbook Required:**

*"Mechanics of Materials, 4th Edition"*, Roy R. Craig, Eric M. Taleff  
Wiley, 2020  
ISBN: 978-1-119-60375-7

### **Instructor:**

Mr. Anthony Glick  
Office hours: T, Th 2:40 – 3:30pm MEC 333CD or via Zoom by appointment  
Email: aglick@njit.edu

### **Course Objectives:**

1. To develop skills for conducting stress analysis in mechanical design
2. To provide a foundation for the study of machine design

### **Class Topics: (\*Note: the following list should be considered a general outline of topics and not a definitive, chronological list of topics.)**

1. Introduction, stress tensor; equilibrium, transformation of stresses, principal stresses.
2. Mohr's circle for stress, Three-dimensional stresses.
3. Normal and shearing strains, strain tensor, compatibility, transformation of strains.
4. Stress-strain relations.
5. Strain energy, St. Venant's principle.
6. Plane stress, plane strain, Airy stress function.
7. Stress & strain in polar coordinates, Stress concentration.
8. Axisymmetrically loaded members, shrink fit, composite cylinders, rotating disks.
9. Theories of failure.
10. Energy methods, Castigliano's theorem, Virtual work.
11. Elastic stability of columns.

**Grading:**

Final Exam: 30%  
2 Examinations: 20% each  
Homework: 25%  
Attendance: 5%

**Grading Scale:**

A: 100.00 – 90.00%  
B+: 89.99 – 87.00%  
B: 86.99 – 80.00%  
C+: 79.99 - 77.00%  
C: 76.99 - 70.00%  
D: 69.99 – 60.00%  
F: 59.99 – 0%

**Policies:**

Homework submitted after due date will be penalized as follows: ½ credit if one week late and no credit beyond one week.

**Statement on Academic Integrity:**

*Academic Integrity is the cornerstone of higher education and is central to the ideals of this course and the university. Cheating is strictly prohibited and devalues the degree that you are working on. As a member of the NJIT community, it is your responsibility to protect your educational investment by knowing and following the academic code of integrity policy that is found at:*

<http://www5.njit.edu/policies/sites/policies/files/academic-integrity-code.pdf>.

*Please note that it is my professional obligation and responsibility to report any academic misconduct to the Dean of Students Office. **Any student found in violation of the code by cheating, plagiarizing or using any online software inappropriately will result in disciplinary action. This may include a failing grade of F, and/or suspension or dismissal from the university.** If you have any questions about the code of Academic Integrity, please contact the Dean of Students Office at [dos@njit.edu](mailto:dos@njit.edu).*

**Statement on Artificial Intelligence:**

This course expects students to work without artificial intelligence (AI) assistance unless explicitly permitted by the instructor. Additionally, if and when students use AI in this course, the AI must be properly cited. If you have any questions or concerns about AI technology use in this class, please reach out to your instructor prior to submitting any assignments.
