<https://digitalcommons.njit.edu/ce-syllabi/620>

This Syllabus is brought to you for free and open access by the NJIT Syllabi at Digital Commons @ NJIT. It has been accepted for inclusion in Civil and Environmental Engineering Syllabi by an authorized administrator of Digital Commons @ NJIT. For more information, please contact [digitalcommons@njit.edu](mailto:digitalcommons@njit.edu).

JOHN A. REIF, JR. DEPARTMENT OF  
**CIVIL AND ENVIRONMENTAL  
ENGINEERING**

MECH 234 Hybrid  
**ENGINEERING MECHANICS: STATICS**

Spring 2022

- Text:**
1. Beer, Johnston, Mazurek, **Vector Mechanics for Engineers: Statics, 12th edition**, McGraw-Hill, 2016, ISBN 978-1-259-97726-8
  2. NCEES, Fundamentals of Engineering Supplied-Reference Handbook, 8th Edition, 2nd. revision Can be purchased from bookstore or you can reproduce pages from: [http://www.ncees.org/exams/study\\_materials/fe\\_handbook/](http://www.ncees.org/exams/study_materials/fe_handbook/)

**Classes and** MECH 234-002, Monday, 11:30-1:25, CKB-204

**Instructor:** MECH 234-004, Wednesday, 11:30-1:25, KUPF-118

Prof. G. Milano, P.E., [milano@njit.edu](mailto:milano@njit.edu), 239 Colton Hall, 973-596-5830

**Teaching** Jin Fan, PhD Candidate, [jf372@njit.edu](mailto:jf372@njit.edu)

**Assistant:** **Tutoring via WebEx while in virtual mode. Later in 423-Colton Hall**  
Schedule for Tutoring will be posted on Canvas.

***Prerequisites:** Phys 111, Math 112. Provides an understanding of equilibrium of particles and rigid bodies subject to concentrated and distributed forces.*

**Students must earn a C or better in this course to register for Strength of Materials, MECH237.**

***“Academic Integrity is the cornerstone of higher education and is central to the ideals of this course and the university. Cheating is strictly prohibited and devalues the degree that you are working on. As a member of the NJIT community, it is your responsibility to protect your educational investment by knowing and following the academic code of integrity policy that is found at: <http://www5.njit.edu/policies/sites/policies/files/academic-integrity-code.pdf>.***

*Please note that it is my professional obligation and responsibility to report any academic misconduct to the Dean of Students Office. **Any student found in violation of the code by cheating, plagiarizing or using any online software inappropriately will result in disciplinary action. This may include a failing grade of F, and/or suspension or dismissal from the university.** If you have any questions about the code of Academic Integrity, please contact the Dean of Students Office at [dos@njit.edu](mailto:dos@njit.edu)”*

**Course Policies:**

- Attendance is mandatory whether face-to-face or remote.
- Remote learning will be synchronized via WebEx. The link is in Canvas.
- Hybrid means that some classes will be face-to-face, some synchronous via WebEx, and some learning will be from pre-recorded lectures available in the Media Gallery in Canvas.
- There will be NO need for electronic devices during class time.  
Turn OFF your cell phone and put it away.  
Put away your laptop, tablet, or any other electronic device.
- Bring your textbook to each class meeting or pages from the relevant chapter.
- Take notes. Ask questions.
- Be prepared to participate with class problem solving. Bring your calculator.

**Quizzes, Exams and Grading Policies:**

- There will be **three common exams**. They will be on **Mondays, 4:15-5:45 p.m. on Feb. 7, Mar. 7, and April 18. Check for conflicts now.** Make other arrangements early.  
Common exams will be 65% of your overall grade.
- There will be a Final Exam in week 15 during Finals Week. This will be 25% of your grade.
- Quizzes / exams must have Free-Body-Diagrams with Force Vectors shown. ALL work must be shown for full credit.
- There will be NO make-up quizzes or exams unless there is documentation provided to the Dean of Students Office to validate your absence. Such circumstances may include sickness documented by a doctor or Health Service; a receipt from your mechanic for car failure; etc.
- We do NOT drop the lowest grade.
- We do NOT curve the grades.

GRADING

3 Common Exams .....65%  
Homework .....10%  
Final Exam .....25%

GRADE RANGE

100-88  
87-82  
81-76  
75-70  
69-65  
64-60  
59 and below

GRADE

A  
B+  
B  
C+  
C  
D\*  
F

**\*NOTE: You cannot register for MECH 237 with a D**

**Homework Policies:**

- Follow the syllabus and do the homework problems listed in the Syllabus
- Not all assigned problems will be collected. Only a select few will be collected randomly.
- NO late homework will be accepted. Homework will be collected electronically and uploaded to **Gradescope** at the specified time. Instructions will be emailed to you.
- All homework must be submitted on quadrille 8-1/2 x 11 engineering paper sold at the NJIT bookstore or equivalent sold at any office supply store. Write on **ONLY** the front of the paper.
- All homework **MUST** include a Free-Body-Diagram to show Force Vectors. All work must be shown for full credit. **SCAN** your pages and upload to **Gradescope**.
- Homework copied from a solution source will NOT receive any credit.

**Tutoring:**

- Tutoring will initially be virtual. The Tutoring Schedule with live links will be on the Canvas website. If NJIT returns to campus, tutoring will be in room 423-Colton Hall. Any additional help can be requested with the Teaching Assistant, Jin Fan ( [jf372@njit.edu](mailto:jf372@njit.edu) ). Prof. Milano will also be available for extra help during office hours or a personal WebEx session.
- Make your request for a personal WebEx session at least 24 hours in advance.

Here is a [LINK](#) to additional solved “Recitation Examples”:

**[Recitation Examples](#)**

Useful solved problems from the Beer & Johnston text, an earlier edition.  
Copies of the older editions are at the Reserve Desk in the Library.

**Refer to the outline on the next page:**

**\*\*Homework problems will be collected randomly per your Teaching Assistant, Mr. Jin Fan. Homework will be scanned and uploaded to Gradescope. Instructions for using Gradescope will be provided. Check your email for notices from your T.A.**

**NO LATE homework can be accepted after the due date.**

**\*Students will be informed of any modifications or deviation from the syllabus throughout the course of the semester.**

Legend: ONL = online via WebEx; F2F = meeting face-to-face in classroom  
(Subject to change)

Problems in **Blue are links** to examples from a textbook by Beer & Johnston 6<sup>th</sup> edition, but similar to those found in current edition with different numbers.

Week	Topic	Study pages	Homework Problems**
1 ONL	Ch. 1: Introduction Ch. 2: Statics of Particles, Trig Method (sketch force polygon)	Study p. 2 - 15 p. 16 - 25	<b>Sketch force polygon</b> , use Law of Sines and Cosines to solve. 2.1, 2.3, 2.5, 2.9, 2.13
2 ONL	Ch. 2: Rectangular Components Equilibrium of a Particle	p. 29 - 34 p. 38– 47	2.21 & 31, 2.23 & 32, 2.35, 2.37 2.43, 45, pulley 2.66
3 F2F	Ch. 2: Forces in Space Forces and Equilibrium in Space Review and Summary	p. 54 - 63 p. 67–70 p. 76 - 79	2.77 & 78, 2.89 & 90 2.103, 2.111 <b>Helpful:</b> <a href="#">2-66</a> , <a href="#">89 &amp; 90</a> , <a href="#">2-114</a>
4 ONL	Ch. 3: Rigid Bodies: Equivalent System of Forces Scalar Products (Dot Products)	p. 84– 99 p. 105-113	3.3, 3.7, 3.21 (3.11 done on “examples.htm”) 3.37, 3.43 find the angle
5 F2F	Ch. 3: Couples and Force-Couple Systems	p. 119 – 130	3.71, 3.73, 3.77, 3.98
6 ONL	Ch. 3: Equivalent Systems Review and Summary	p. 138– 152 p. 161 – 168	3.101, 3.109, 3.115
7 F2F	Ch. 4: Equilibrium of Rigid Bodies Equilibrium of a Two-Force Body Equilibrium in Three Dimension	p. 170 – 187 p. 199 – 202 p. 207 – 216	4.3, 4.7, 4.17, 4.19, 4.46 4.67, 4.71 <b>Helpful:</b> <a href="#">4.3,12, 17, 26, 30</a> , [ <a href="#">43</a> , <a href="#">72, 101</a> ]
8 ONL	Ch. 6: Analysis of Structures: Method of Joints	p. 299 – 311	6.3, 6.7, 6.18, 6.19, 27 <b>Helpful:</b> <a href="#">14, 27</a> [ <a href="#">13, 28</a> ]
9 F2F	Ch. 6: Truss Analysis: Method of Sections	p. 319 – 328	6.45, 6.47, 6.53, 6.57
10 ONL	Ch. 6: Frames and Machines Review and Summary	p. 334 – 341 p. 361 – 365	6.75, 6.77, 6.87, 6.105
11 F2F	Ch. 5: Distributed Forces: Centroids and Center of Gravity	p. 232 - 245	5.3, 5.5, 5.7, 5.9 <b>Helpful:</b> [ <a href="#">25, 32, 34, 79</a> ]
12 F2F	Ch. 5: Distributed Loads	p. 262– 271	5.68, 5.69, 5.71, 5.76 <b>Helpful:</b> <a href="#">5.78, 81, 83</a>
13 ONL	Ch. 9: Moments of Inertia Parallel Axis Theorem/Composites	p. 485 – 493 p. 497 – 509	9.4 and 9.8 9.31 and 9.33, 9.41 (9.36*, 9.43*)
14 F2F	Ch. 9: continued		
15	Final Exam	Dates to be announced by Registrar at a later date.	

Revised by milano,10/2001, 1/2002, 1/2003, 1/2004, 9/2004, 1/2005, 8/2005, 9/2007, 8/2008, 8/2009, 1/2010, 1/2011, 8/2011, 8/2012, 1/2013, 8/2013, 7/2014, 8/2015, 1/2016, 1/2017, 7/2017, 1/2018, 8/2019, 7/29/2021,1/2022

Outcomes Course Matrix; MECH 234 Engineering Mechanics: Statics

Strategies, Actions and Assignments	ABET Student Outcomes (1-7)	Program Educational Objectives	Assessment Methods
<b>Student Learning Outcome 1: Provide transition from Physics (science) to Statics (engineering).</b>			
Present engineering approach and problem solving techniques used for vector analysis while building on math and physics fundamentals relevant to force systems in equilibrium.	1, 2, 4	1	Homework, exams and success in future courses.
Illustrate applications to practical problems of torque, moments, and couples. Reinforce the application of geometry and trigonometry to realistic-type problems and demonstrate the application of math skills such as cross products and dot products.	1, 2, 4	1	Homework, bonus problems, and exams.
<b>Student Learning Outcome 2: Master the concept of two-dimensional and three-dimensional vectors.</b>			
Illustrate 2D vector components and orientation using trigonometry and proportions.	1, 2, 4	1	Homework and exams.
Use vivid Power Point examples to demonstrate analysis technique for force systems on beams and trusses and frames.	1, 2, 4	1	Homework and exams.
Demonstrate logical approach to spatial vectors by visualization of forces, moments. Provide basic concepts for visualizing orientation of spatial components to develop techniques using geometry and projections.	1, 2, 4	1	Homework, exams, and bonus challenge problems.
<b>Student Learning Outcome 3: Master the concept of developing free body, diagrams and how to formulate and structure problems solving techniques which is fundamental to the solution of all engineering problems.</b>			
Demonstrate the ability to translate a problem statement into a FBD and distinguish tensile and compressive members in trusses and frames while emphasizing the importance of vector directions.	1, 2, 4	1	Homework, bonus challenge problems, and exams.
Illustrate the approach of going from the FBD to the problem solution by formulating the appropriate equation set as applied to beams, trusses, and frames.	1, 2, 4	1	Homework, bonus challenge problems, and exams.
Provide numerous solved problems available on web that reinforce the technique of problem solving strategy.. Require numerous homework problems weekly.	1, 2, 4	1	Homework, exams and bonus challenge problems.
			Rev. 1/6/13, 9/11/13

**CEE Mission, Program Educational Objectives and Student Outcomes**

The mission of the Department of Civil and Environmental Engineering is:

- to educate a diverse student body to be employed in the engineering profession
- to encourage research and scholarship among our faculty and students
- to promote service to the engineering profession and society

Our program educational objectives are reflected in the achievements of our recent alumni.

1 - Engineering Practice: Alumni will successfully engage in the practice of civil engineering within industry, government, and private practice, working toward sustainable solutions in a wide array of technical specialties including construction, environmental, geotechnical, structural, transportation, and water resources.

2 - Professional Growth: Alumni will advance their skills through professional growth and development activities such as graduate study in engineering, professional registration, and continuing education; some graduates will transition into other professional fields such as business and law through further education.

3 - Service: Alumni will perform service to society and the engineering profession through membership and participation in professional societies, government, educational institutions, civic organizations, and humanitarian endeavors.

Our student outcomes are what students are expected to know and be able to do by the time of their graduation:

1. an ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering and make informed judgments which must consider the impact of engineering solutions in global, economic, environmental and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Rev. 4/4/12, 9/11/13, 2/13/18, 5/18/18
