**Textbook**

David McConnell and David Steer. *The Good Earth: Introduction to Earth Science*, McGraw-Hill Education. (any edition)

**Grade**

Your numerical final grade will be based upon **3 in-class exams (22% each), and a Final Exam (34%)**. The examinations will be in class and administered on the following dates.

Exam 1	Thursday 10/3 (covers thru week 4)
Exam 2	Thursday 10/31 (Covers week 5-8)
Exam 3	Thursday 11/25 Covers week 9-11)
Final Exam	TBD (all inclusive but ~1/2 after week 10)

Grading formula:  $.22(\text{exam } 1+2+3) + .34(\text{Final})$

If you miss an examination, you will receive a grade of zero that will be calculated into your final grade. There are no make-up examinations (except for illness or work). The following table will determine your letter final grade.

90% to 100%	A
85% to 90%	B+
70% to 85%	B
65% to 70%	C+
55% to 65%	C
40% to 54%	D
0% to 39%	F

Exam grades will not be curved. Exams will consist of multiple-choice and/or true-false questions, all of which will come directly from topics discussed in class and/or topics discussed in the textbook. All exams are closed book and closed notes. Summary sheets will not be permitted

**Earth in Space (Phys 203) and Earth in Space Laboratory (Phys 203A) are independent courses. You can register for either one of these courses without being registered for the other course. Withdrawal from one course does not mean you must withdraw from the other course.**

**Academic Integrity**

All students who cheat during an examination are in violation of the Academic Honor Code. All such students will automatically fail the course and will be reported to the Dean of Student Services so that further action may be taken.
